**QUESTION 1**

The system administrator needs to create a new role named adminuser and assign the following authorizations to the adminuser role:

Solaris.admin.logsvcs.purge Solaris.admin.usermgr.pswd Solaris.system.shutdown Solaris.admin.fsmgr.write adminuser

Which command would the system administrator issue to create the adminuser role?

A. `roleadd -m -d /export/home/adminusr -c "admin assistant" -A`

Solaris.admin.logsvcs.purge,Solaris.admin.usermgr.pswd,Solaris.system.shutdown,Solaris.admin.fsmgr. write adminuser

B. `useradd -d /export/home/adminusr -c "admin assistant" -P`

Solaris.admin.logsvcs.purge,Solaris.admin.usermgr.pswd,Solaris.system.shutdown,Solaris.admin.fsmgr. write adminuser

C. `useradd -m -d /export/home/adminusr -c "admin assistant" -A`

Solaris.admin.logsvcs.purge,Solaris.admin.usermgr.pswd,Solaris.system.shutdown,Solaris.admin.fsmgr. write adminuser

Correct Answer: A

QUESTION 2

Given the `add_install_client` script executed with the options:

```
# ./add_install_client -d -b "input-device=ttya" -b "output-device=ttya" SUNW.i86pc i86pc
```

Which two statements are true? (Choose two.)

A. The console is directed to a serial port.

B. The console is directed to the video port.

C. This applies to all x86-based systems being network installed using PXE.

D. This applies only to the system with a host name of SUNW.i86pc being network installed using PXE.

E. The system to be installed using PXE must be booted using a diskette before it accesses the network.

Correct Answer: AC

QUESTION 3

In preparation of an outsourcing operation, the current NIS domain needs to be split in two. Which statement is true about creating a second NIS domain on the same server as the existing domain?

A. You can create a second NIS domain which is served by the same `ypserv` daemon.

B. This cannot be done because you can only run one NIS domain on the system at a time.

C. You can create a second NIS domain on the same server as the existing domain only if you create a new zone and run the NIS server in that zone.

D. You can create a second NIS domain on the same server as the existing domain as long as the second NIS domain is a subdomain of the master domain.

Correct Answer: A

QUESTION 4

You believe that you have a correctly configured boot server on the local network for the SPARC system you are currently attempting to install. Your JumpStart configuration is based on files only, and does not use a naming service at any stage. Upon running the following command:

```
boot net -install
```

the client repeatedly displays the following message:

```
Timeout waiting for ARP/RARP packet
```

What are two causes of this error? (Choose two.)

- A. The in.rarpd daemon is not running on the boot server.
- B. The sysidcfg file for the client is missing an ether entry.
- C. The client does NOT exist in the rules.ok file on the boot server.
- D. The /etc/bootparams file on the boot server has duplicate entries for the client.
- E. The /etc/ethers file on the boot server does NOT have an entry for the client.

Correct Answer: AE

QUESTION 5

Which two commands list the profiles assigned to user fred? (Choose two)

- A. profiles fred
- B. profiles -l fred
- C. profiles --list fred
- D. grep --w fred /etc/security/prof_attr
- E. grep --w fred /etc/security/po1icy.conf

Correct Answer: AB

**QUESTION 6**

The administrator of the dbzone zone has requested a dedicated file system on which to install a database. The administrator requests that this be mounted as /database within the zone. The host system has a metadvice d120 that has been

allocated for dedicated use for this purpose.

The dbzone zone is currently NOT booted.

```
# zonecfg --z dbzone
```

```
zonecfg:dbzone > add fs
```

```
zonecfg:dbzone:f s >
```

Which four commands are necessary to complete the administrator's request? (Choose four.)

- A. set type=ufs
- B. set special=rw
- C. set dir=/database
- D. set raw=/dev/md/rdisk/dl20
- E. set special=/dev/md/dsk/dl20
- F. add inherit--pkg--dir dir=/database
- G. set zonedir=/export/dbzone/database

Correct Answer: ADCE

QUESTION 7

You want to implement ZFS on your server, but before attempting to use the ZFS software, you must first verify that your server meets the minimum requirements. Which answers describe the hardware and software requirements that your server must meet before ZFS can be implemented? (Choose three.)

- A. 1GB of RAM is recommended.
- B. The minimum disk size is 1GB.
- C. The minimum disk size is 128 Mbytes.
- D. A storage pool requires a minimum of 64 Mbytes.
- E. A storage pool requires a minimum of 128 Mbytes.

Correct Answer: ACD

QUESTION 8

Given the default coreadm settings in the local zone and the following configuration for the global zone:

```
# coreadm global core file pattern: /var/core/core.%f.%p global core file content: all init core file pattern: core.%f.%p init
core file content: default global core dumps: enabled per-process core dumps: enabled global setid core dumps:
disabled per-process setid core dumps: disabled global core dump logging: enabled
```

This configuration will cause two core files to be generated and saved when a process in the local zone terminates abnormally.

Where are the two core files saved? (Choose two.)

- A. in the process current working directory as core
- B. in the local zone as core.%f.%p in /var/core
- C. in the global zone as core.%f.%p in /var/core
- D. in the process current working directory as core.%f.%p

Correct Answer: AC

QUESTION 9

You have a stable and mature system that is running out of disk space in the /var file system. You want to avoid the creation of unix.X and vmcore.X files. By default, the system will transfer crash dump information following a panic into unix.X and vmcore.X files when the system reboots. Which command disables this default behavior?

- A. dumpadm -n
- B. dumpadm -y
- C. dumpadm -s
- D. dumpadm -c

Correct Answer: A

QUESTION 10

Which Solaris tools allow a system administrator to remotely manage Solaris 10 OS updates for a number of remote systems from a centralized server location? (Choose two.)

- A. /usr/sbin/smpatch
- B. /usr/sbin/patchmgr
- C. /usr/sbin/patchadd
- D. /usr/bin/updatesmanager

Correct Answer: AD

**QUESTION 11**

If your system uses a large number of mirrors, make sure that you have an adequate number of state databases. If you create too few state database replicas, performance could be negatively impacted. What is the recommended number of state database replicas for mirrored volumes?

- A. At least two state database replicas per RAID-1 volume.
- B. At least three state database replicas per RAID-1 volume.
- C. One state database replicas per RAID-1 volume.
- D. At least five state database replicas per RAID-1 volume.

Correct Answer: A

QUESTION 12

Which three statements accurately describe soft partitions? (Choose three.)

- A. Soft partitions are an alternative to Solaris Volume Manager software volumes for organizing disk storage.
- B. An unlimited number of soft partitions can be created from a volume.
- C. A soft partition can be grown to use any available space on a volume.
- D. A soft partition can be included in a volume and directly accessed by an application simultaneously.
- E. Soft partitions can be extended without moving or destroying data on other soft partitions.
- F. Soft partitions provide a mechanism for dividing large storage spaces into smaller, more manageable sizes.

Correct Answer: CEF
