**QUESTION 1**

Which two are the default settings for Disk Path Monitoring? (Choose two.)

- A. all disk paths are monitored
- B. only disk paths to shared devices are monitored
- C. reboot\_on\_path\_failure is enabled
- D. reboot\_on\_path\_failure is disabled

Correct Answer: AD

---

**QUESTION 2**

Which three are characteristics of the High Availability environment provided by Sun Cluster? (Choose three.)

- A. ability to run a single instance of Solaris across multiple nodes
- B. automated application restart in the event of node failure
- C. uninterrupted service in the event of any hardware failure
- D. load sharing by scaling an application across several nodes
- E. minimal service outage during hardware and software upgrades
- F. possibility to combine different platform architectures in one system

Correct Answer: BDE

---

**QUESTION 3**

A three-node cluster contains three resource groups which have these Nodelists:

one-rg has a Nodelist: node1 node2 node3

two-rg has a Nodelist: node2 node3 node1

three-rg has a Nodelist: node3 node1 node2

The Fallback property on each of the resource groups is set to FALSE.

Following a maintenance outage in which node1 and node2 have been shut down and rebooted into the cluster with node1 joining the cluster before node2:

Where will the resource groups be located, and which command should be run to move the resource groups to their preferred nodes?

- A. one-rg will be on node1 two-rg will be on node2 three-rg will be on node3 No command will need to be run.

- B. one-rg will be on node3 two-rg will be on node3 three-rg will be on node3 clrg remaster +
- C. one-rg will be on node1 two-rg will be on node1 three-rg will be on node3 clrg remaster +
- D. one-rg will be on node3 two-rg will be on node3 three-rg will be on node3 clrg evacuate -n node3 +

Correct Answer: B

---

#### QUESTION 4

Which statement is incorrect regarding the in.mpathd daemon?

- A. IPMP uses ping to contact any router listed in the routing table.
- B. If no router exists, IPMP submits a ping to the all-hosts multicast address.
- C. If static host routes are available, these hosts will be contacted using ping.
- D. You can configure link state monitoring on Solaris 9.

Correct Answer: D

---

#### QUESTION 5

If the cluster administrator wants to restart a process, they have to be sure it is NOT one of the cluster daemons.

Which two daemons listed below can you send a kill -HUP signal to without affecting Sun Cluster 3.2? (Choose two.)

- A. rgmd
- B. rpc.pmfd
- C. inetd
- D. syslogd
- E. rpc.fed

Correct Answer: CD

---

#### QUESTION 6

Which is a reason for using link-state testing rather than "ping testing" for public network adapters in IPMP groups in Solaris 10?

- A. Link-state testing is always more robust.
- B. IPMP will do repair detection and fallback only if you use link-state testing.
- C. The cluster will only be able to monitor the state of IPMP groups if you use link state testing

D. You do NOT have to consume public network IP addresses for test addresses if you use link- state testing.

Correct Answer: D

---

#### QUESTION 7

In Sun Cluster 3.2, what command is used to view the status of IPMP group members on all nodes?

- A. scstat -IPMP
- B. IPMP status -v
- C. clnode status -m
- D. clrg public -v all

Correct Answer: C

---

#### QUESTION 8

Which component of Sun Cluster 3.2 provides global naming consistency for shared storage?

- A. the CCR
- B. the RGM
- C. DID devices D. PxFS

Correct Answer: C

---

#### QUESTION 9

Which components need to be available before creating an NFS resource called nfs-rs?

- A. A /global/zfs/admin directory and dfstab.nfs-zs file.
- B. On each node a SUNW.nfs directory and a dfstab.nfs-rs file are required in local storage.
- C. A SUNW.nfs directory and a dfstab.nfs-rs file located on a global or failover file system.
- D. Nothing has to be created, but the components must be available before the resource is enabled.

Correct Answer: C

---

#### QUESTION 10

You run cldg status to view the status of your device group. What must be true about the node that is listed as the

Primary?

- A. It is the preferred node for the device group.
- B. It is the current primary node for the device group, not necessarily the preferred node.
- C. A global file system configured on a volume of the device group can only be accessed from that node.
- D. The device group can run only on that node. If that node fails, the device group will become unavailable.

Correct Answer: B

---

#### QUESTION 11

If you choose to encapsulate the boot disk using Veritas Volume Manager 4.x and above, you must create a disk group that will contain the disk.

Which two statements are correct? (Choose two.)

- A. The the name of the disk group cannot be rootdg.
- B. The name of the disk group must be rootdg.
- C. You can choose any name for the group that you would like except bootdg.
- D. Veritas will use the reserved name bootdg to link to the name that you provided.

Correct Answer: CD

---

#### QUESTION 12

One of the cluster nodes is at the ok boot prom prompt. You want to boot that node to multiuser and into non-cluster mode. Which command will accomplish this?

- A. init 6
- B. boot -x
- C. boot -sx
- D. /etc/reboot -- -x

Correct Answer: B
