QUESTION 1

Which vRealize Automation feature provides companies a lot of flexibility in using their own customized service politics and business logic?

- A. Accelerated application deployment
- B. Intelligent Resource Governor
- C. VMware vRealize Orchestrator plug-in
- D. Self-service end user portal

Correct Answer: B

QUESTION 2

A company has recently bought out a competitor and is now integrating them into their existing architecture. Which VMware NSX component or feature will allow the company to place newly- created virtual machines on the best compute resources regardless of whether those resources are at the main site or the new branch location?

- A. Edge Service Device
- B. Distributed Router
- C. VXLAN
- D. Advanced Service Designer

Correct Answer: C

QUESTION 3

A manager wants to know why traditional usage metering tools are less effective in a private cloud environment than they are in physical environments. What statement provides the best response?

- A. Traditional monitoring tools won't work in a cloud environment.
- B. Traditional metering tools require agents to be installed, which don't work in virtual machines.
- C. Resource usage is based on the overall demand of all virtual machines instead of per server.
- D. This is not true, traditional usage metering tools are still the best choice.

Correct Answer: B

QUESTION 4

A company needs a solution that allows moving some of the datacenter's workload to a public cloud during peak

hours. The company does not want to pay for unused capacity during non-peak hours. Which VMware product will fulfill this task?

- A. vRealize APIs
- B. vCloud Connector
- C. vRealize Automation
- D. VMware NSX

Correct Answer: C

QUESTION 5

A manager is planning for an upcoming transition to vRealize Automation and wants to know if the existing vSphere 5.5 infrastructure can be leveraged for the implementation. What statement accurately answers this question?

- A. The existing vSphere infrastructure cannot be used as vRealize automation can only utilize vCloud director based resources.
- B. The existing vSphere infrastructure can be used, but a minimum of two vRealize Automation endpoints must be deployed.
- C. The existing vSphere infrastructure can be used but the vCenter Server must be reinstalled.
- D. The existing vSphere infrastructure can be used to deploy vRealize Automation with no major changes.

Correct Answer: C

QUESTION 6

An administrator wants to automatically manage virtual machine change requests and services as well as remove virtual machines when they are no longer needed. Which product includes a lifecycle management capability to help you accomplish these tasks?

- A. vRealize Automation
- B. vCenter Server
- C. vRealize Operations
- D. NSX Manager

Correct Answer: B

QUESTION 7

A public cloud provider is looking for a method of delivering services through a user interface that:

Is specific to the user who logs in

Delivers services that adhere to the specific service level Agreement of each customer Which cloud product would best enable the provider to meet these requirement?

A.

vRealize Automation Self Service Catalog

B.

vRealize Orchestrator

C.

vSphere Web Client

D.

vRealize Automation Advanced Service Designer

Correct Answer: D

QUESTION 8
