QUESTION 1

In a Software-Defined Data Center (SDDC) that has a distributed firewall, where are the firewall policies enforced?

- A. Guest operating system
- B. Uplink ports
- C. Virtual machine's virtual interface
- D. Host

Correct Answer: D

QUESTION 2

Which cloud environments are automated with the help of VMware NSX (Choose two)?

- A. Intranet Cloud
- B. Public Cloud
- C. Private Cloud
- D. Developer Cloud
- E. Multi-Tenant Infrastructure

Correct Answer: DE

QUESTION 3

What are two functions of a DLR control VM (Choose two.)

- A. Communicates with the NSX manager and sends routing updates to the NSX controller.
- B. Performs Address Resolution Protocol (ARP) entry lookup.
- C. Establishes routing protocol sessions with other routers.
- D. Forms adjacencies with edge routing peers.

Correct Answer: AD

QUESTION 4

Which internet security protocol does NSX Edge use to interoperate with all major VPN vendors' equipment?

- A. TLS

- B. TCP/IP
- C. HTTPS
- D. IPSec

Correct Answer: D

QUESTION 5

Which version of communication protocol is used in a virtualized network?

- A. VTFP
- B. Ipv2
- C. IPv6
- D. RIPv1

Correct Answer: A

QUESTION 6

What are three common problems for administrators when managing application with network security models that are not virtualized? (Choose three.)

- A. Lack of Interoperability and automation creates error-prone manual work.
- B. Integration of third-party security products with home products is not possible.
- C. Deploying and managing third-party security products become difficult.
- D. Load balancing by vMotion is not possible.
- E. There is limited visibility into a workload's security posture and policies.

Correct Answer: ACE

QUESTION 7

What is the maximum number of instances that VMware NSX can extend for the networking and security of either within or across data centers?

- A. Nine
- B. Eight
- C. Seven
- D. Five

Correct Answer: D

QUESTION 8

What are the two core components that VMware NSX leverages for North-South traffic flow with an external network? (Choose two.)

- A. vSphere Standard switch
- B. Edge Services Gateway (ESG)
- C. vSphere Controller
- D. DLR Control VM

Correct Answer: BD

QUESTION 9

Which of these allows static or dynamic grouping based on inclusion and exclusion of objects such as virtual machines, vNICs, cSphere clusters, and logical switches?

- A. uplink
- B. Active Directory (AD)
- C. Port
- D. Security group

Correct Answer: D

QUESTION 10

Which technique best explains the use of the grained policies and network to enable security inside the data center?

- A. Micro-division
- B. Bifurcation
- C. Dissection
- D. Micro-segmentation

Correct Answer: D
