**QUESTION 1**

Which two cloud service types as defined by the National Institute of Standards and Technology (NIST) may be used for self-service provisioning of an Oracle Database Environment?

- A. Infrastructure as a Service
- B. Software as a Service
- C. Platform as a Service
- D. RAC as a Service
- E. SQL as a Service

Correct Answer: AC

---

**QUESTION 2**

Which Enterprise Manager Cloud Control 12c role enables a user to set up the Infrastructure as a Service (IaaS) self-service portal?

- A. EM\_CLOUD\_ADMINISTRATOR
- B. EM\_SS ABUSER
- C. EM\_ALL\_ADMINISTRATOR
- D. EM\_SSA\_ADMINISTRATOR
- E. EM\_USER
- F. EM\_CBA\_ADMIN

Correct Answer: ADE

---

**QUESTION 3**

You are asked to propose Cloud computing solution for your company that will potentially lower costs and improve productivity of your IT department.

Which two features of the Cloud computing model would help achieve these aims?

- A. Consolidation
- B. Abstraction
- C. Self Service
- D. Service Level Agreements

Correct Answer: AC

---

#### QUESTION 4

How does Enterprise Manager Cloud Control 12c discover an OVM server?

- A. The central agent connects to the OVM Agent on the OVM server.
- B. The OVM Manager used to initiate the discovery connects to the OVM Agent on the OVM server.
- C. The management agent for the OVM Manager used to initiate the discovery connects to the OVM Agent on the OVM server.
- D. The OMS connects to the OVM Agent on the OVM server.

Correct Answer: C

---

#### QUESTION 5

You register OVM Manager on host with ovroragr01.example.com by using the Oracle Enterprise Agent on managed host with host01.example.com.

Which two statements are true about the agent on with host01.example.com?

- A. The agent is required for the registration of OVM Manager and can be shut down afterwards.
- B. The agent is required for the registration of OVM Manager and must be left running afterwards.
- C. The agent is required for the registration of OVM Manager and can be uninstalled afterwards.
- D. The agent is required for the registration of OVM Manager and can be removed from Cloud Control 12c afterwards.
- E. The virtualization plug-in must be installed on the agent for the registration of OVM Manager to succeed, and was automatically deployed on the agent during the registration job.
- F. The virtualization plug-in must be installed on the agent for the registration of OVM Manager to succeed, and was manually deployed to the agent before initiating the registration process.
- G. The virtualization plug-in must be installed on the agent for the registration of OVM Manager to succeed, and was manually deployed to the agent during the registration process.
- H. The virtualization plug-in must be installed on the agent for the registration of OVM Manager to succeed, and can be un-deployed after the registration is complete.

Correct Answer: AE

---

#### QUESTION 6

How does the National Institute of Standards and Technology define a Community Cloud?

- A. A common environment for use by a group of related organizations
- B. A combination of private and public Clouds for multiple organizations
- C. Separate environments for use by multiple organizations
- D. Separate environments for use by a single organization

Correct Answer: A

The cloud infrastructure is provisioned for exclusive use by a specific community of consumers from organizations that have shared concerns (e.g., mission, security requirements, policy, and compliance considerations). It may be owned, managed, and operated by one or more of the organizations in the community, a third party, or some combination of them, and it may exist on or off premises.

### QUESTION 7

How can Enterprise Manager 12c Cloud Control self-service chargeback metering data be accessed by external billing systems?

- A. By using an RSS feed from the Chargeback home page
- B. By defining the external billing system as an Enterprise Manager target that may connect to the Chargeback application
- C. By running `emcli get_metering_data` and importing the output into the billing system as required
- D. By defining the external billing system as an Enterprise Manager target that then uses a 81 Publisher report to obtain the billing data

Correct Answer: B

---

### QUESTION 8

You have two Platform as a Service (PaaS) infrastructure zones, `paaszoneone` and `paasZoneTwo`.

The managed host `paas03.example.com` is already part of `paasZoneOne` and you notice that its resources are underutilized.

You are considering including `paas03` in `paasZoneTwo` as well as `paaszoneone` to take advantage of unused capacity. Which statement is true?

- A. `paas03` can be added to `paasZoneTwo`, but cannot be used for the same type of pool as in `paasZoneOne`.
- B. `paas03` cannot be added to `paasZoneTwo` unless it is removed from `paasZoneOne`,
- C. `paas03` will only be available to self-service users with quotas on both `paaszoneone` and `paasZoneTwo`.
- D. Service templates that are published to the pools on `paas03` will automatically be available in `paasZoneTwo`.
- E. `paas03`'s capacity will be halved for the purposes of placement calculations.

Correct Answer: C

---

#### QUESTION 9

Which two are true regarding the use of custom consolidation scenarios when using Enterprise Manager 12c Cloud Control Consolidation Planner?

- A. Mutually exclusive source servers that may not map to the same destination server may be defined based on nodes of a Real Application Cluster (RAC) database.
- B. Compatible source servers that may map to the same destination server must match on three or more criteria.
- C. Metric data to be used to estimate source server demand can be restricted to a date range.

Correct Answer: AB

---

#### QUESTION 10

How would you publish the same self-service database deployment procedure to different Platform as a Service (PaaS) infrastructure zones and enable them for different SSA-enabled roles with differing configurations?

- A. Duplicate the deployment procedure, modify the attribute settings as appropriate for each distinct combination of PaaS zone and SSA role, and create one template for each procedure.
- B. Create one template for each distinct PaaS zone and one template for each separate SSA role\* the appropriate default settings for the unlocked deployment procedure attributes.
- C. Unlock all the locked attributes in the deployment procedure and then grant the procedure to each SSA role. Users are required to enter all the attributes at deployment time for whichever zone and pool they choose to use.
- D. Create one template for each distinct combination of PaaS zone and SSA role with the appropriate default settings for the unlocked deployment procedure attributes.

Correct Answer: A

---

#### QUESTION 11

Which three are true concerning Enterprise Manager Cloud Control 12c users who have been granted the EM\_SSA\_ADMINISTRATOR role?

- A. They may administer resource quotas for self-service portal users.
- B. They may only administer Infrastructure as a Service (IaaS) Clouds, or Platform as a Service (PaaS) Clouds but not both.
- C. Users who may administer Platform as a Service (PaaS) Clouds, may administer Database as a Service (DBaaS) or Middleware as a Service (MWaaS) clouds.
- D. They may create Cloud infrastructure components, such as configuring Oracle Virtual Machine Manager.

E. They may administer privileges for self-service portal users.

Correct Answer: ACE

## QUESTION 12

Which three are examples of a Platform as a Service Cloud Model?

- A. Single Instance Oracle Database as a Service
- B. Oracle Fusion Applications as a Service
- C. Oracle Self Service HR as a Service
- D. Real Application Clusters (RAC) Database as a Service
- E. Oracle WebLogic Middleware as a Service a
- F. Oracle Clusterware as a Service

Correct Answer: DEF
