- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

**QUESTION 1**

You are migrating an on-premises Linux 11.2.0.4 Database to a Database Cloud Service by using the Cross-Platform Transportable Tablespace Backup Set. Which statement is true?

- A. The Database Cloud Service target version must be 12.1 or later.
- B. The Database Cloud Service target version must be 11.2.0.4.
- C. The Database Cloud service target is a container database (CDB).
- D. FOR TRANSPORT and TO PLATFORM clauses are not supported in RMAN on version 11.2.0.4.

Correct Answer: B

---

**QUESTION 2**

What TWO ways does Data Pump use to move data to the cloud? (Choose all correct answers)

- A. RMAN Backup and Restore
- B. pdb unplug/plug
- C. import over Oracle Database database link
- D. import dump file from OCI Object Storage

Correct Answer: CD

---

**QUESTION 3**

For a source database to be successfully migrated, you must view and apply the prerequisites. Which TWO prerequisites must pass before the source database can be migrated using Oracle Zero Downtime Migration (ZDM)? (Choose all correct answers)

- A. The database must be stored in an Automatic Storage Management Cluster File System (ACFS).
- B. ArchiveLog must be enabled
- C. The database must have a configured TDE wallet if the version is Oracle Database 11g Release 2 or 12c Release 1.
- D. The database must have Transparent Data Encryption (TDE) enabled.
- E. Port 22 on the source database server must allow incoming connections from the ZDM service host.

Correct Answer: BE

---

**QUESTION 4**

Which port number do all the OCI GoldenGate Microservices environments use for port forwarding through NGINX?

- A. 1521
- B. 22
- C. 1680
- D. 443

Correct Answer: D

---

#### QUESTION 5

You encounter error ORA-00245 while performing ZeroDowntime Migration of an Oracle RAC database. What might be the reason for this?

- A. The RAC instances are running in ArchiveLog mode.
- B. Port 1521 is open.
- C. TDE Wallet is configured.
- D. SNAPSHOT CONTROL is not pointing to a shared location on all OracleRAC instances.

Correct Answer: D

---

#### QUESTION 6

Which are THREE target database prerequisites for database cloud migration with Oracle Zero Downtime Migration? (Choose all correct answers)

- A. Transparent Data Encryption (TDE) must be enabled.
- B. The database can be created only after migration has begun.
- C. The database db\_name should be the same as the source database.
- D. The TDE wallet status must be open.
- E. The TDE wallet status must be closed.

Correct Answer: ACD

---

#### QUESTION 7

Which four Oracle database versions are supported for source databases when migrating with Oracle Zero Downtime Migration? (Choose all correct answers)

- A. Oracle Database 11g Release 2 ( 11.2.0.3 )

- B. Oracle Database 10 g Release 2
- C. Oracle Database 12c Release 2 ( 12.2.0.1)
- D. Oracle Database 11g Release 2 ( 11.2.0.4 )
- E. Oracle Database 19
- F. Oracle Database 12c Release 1 ( 12.1.0.2)

Correct Answer: ADEF

---

#### QUESTION 8

Which type of Zero Downtime Migration (ZDM) can you use for Inflight Upgrade?

- A. Both Physical and Logical Migration is supported.
- B. ZDM does not support Inflight Upgrade.
- C. Logical Migration only
- D. Physical Migration only

Correct Answer: C

---

#### QUESTION 9

Which knowledge modules are supported by Oracle Data Integrator (ODI)?

- A. IDB DB2
- B. All of the options
- C. Spark
- D. Hive
- E. ADW

Correct Answer: B

---

#### QUESTION 10

Which TWO statements are true about online pluggable database (PDB) relocation? (Choose all correct answers)

- A. Database version downgrade can be achieved with PDB relocation.
- B. A PDB with the ASCII character set can be relocated to a container database (CDB) with the AL32UTF8 character set.

C. PDB relocation with no version change can be performed with near-zero downtime.

D. Online PDB relocation can achieve a zero downtime upgrade.

Correct Answer: CD

---

#### QUESTION 11

Which TWO object types should be excluded from an Autonomous Transaction Processing database? (Choose all correct answers)

A. SCHEMA

B. DB -LINK

C. constraint

D. cluster

Correct Answer: BD

---

#### QUESTION 12

You have an on-premises non-TDE-encrypted Linux 19c container database (CDB) that is already being regularly backed up to Oracle Cloud Infrastructure (OCI) Object Storage via the Database Backup Cloud Service. You plan on using Recovery Manager (RMAN) to migrate it to Database Cloud Service. What is the valid strategy to migrate?

A. Create a new OCI DB Service instance and use the "instantiatefrom backup" option in the console. This will automatically take care of the encryption.

B. Create a new OCI DB Service instance, delete the existing database, and use the DBaaS tooling to configure the DB Cloud Backup Module to point to the existing bucket, and then restore the backup by using the console.

C. Create a new OCI DB Service Instance, copy the backup data from the bucket to the FRA, and then use the console to perform a DB restore.

D. Create a new DB Service instance, delete the existing database, manually install the DB Cloud Backup Module pointing it to the backed where the on-premises backups are located, and perform a completed RMAN RESTORE AS encryption operation.

Correct Answer: D

---

#### QUESTION 13

Which entry in a Data Pump parameter file ensures consistent export using Data Pump migration to Autonomous Database?

A. PARALLEL

B. LOGTIME

C. METRIC

D. FLASHBACK\_TIME

Correct Answer: D

---

#### QUESTION 14

Which file types can be imported using SQL Developer Web?

A. All of the options

B. Excel

C. AVRO

D. CSV Delimited

E. JSPN

Correct Answer: A

---

#### QUESTION 15

You have decided to use Oracle Data Integrator (ODI) on Marketplace to load data from an onpremises Oracle Database to Autonomous Database on Oracle Cloud Infrastructure (OCI). Which TWO methods can be used to connect to the on-premises Oracle Database from OCI? (Choose all correct answers)

A. Oracle directory

B. VPN Connect

C. Terminal service

D. Fast connect

Correct Answer: BD
