-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which entry in a Data Pump parameter file ensures consistent export using Data Pump migration to Autonomous Database?

- A. PARALLEL
- B. LOGTIME
- C. METRIC
- D. FLASHBACK_TIME

Correct Answer: D

QUESTION 2

Which two migration methodologies can you use for migrating on-premises databases to Autonomous Database with Oracle Zero Downtime Migration (ZDM)? (Choose all correct answers)

- A. Physical Online
- B. Logical online
- C. Physical Offline
- D. Logical offline

Correct Answer: BD

QUESTION 3

When selecting a migration method for moving your database to the cloud, what would you NOT take into consideration?

- A. Database Version
- B. High Availability
- C. Schema Name
- D. Database Size

Correct Answer: C

QUESTION 4

How much network latency is tolerated by the Remote Apply process of Oracle GoldenGate?

- A. 8 ms
- B. 16 ms
- C. 4 ms
- D. 6 ms

Correct Answer: C

QUESTION 5

Which TWO statements are true about cross-endian migration using Transportable Tablespaces? (Choose all correct answers)

- A. Tablespaces must be converted by either RMAN CONVERT Or DBMS_FILE_TRANSFER.
- B. system and sysaux can be migrated cross-endian.
- C. Tablespaces may not be encrypted.
- D. Tablespaces must be compressed.

Correct Answer: AC

QUESTION 6

You run a database instance on Oracle Database 11.2 and you want to migrate to Oracle Cloud. In which case is it required to upgrade your source database before migrating to the cloud?

- A. if you are using virtual machines
- B. if you are using Recovery Manager (RMAN)
- C. if your target is Exadata Cloud Service
- D. if you are using unplug/plug

Correct Answer: C

QUESTION 7

Which FOUR Oracle Data Pump impdp parameters should you use when migrating to Autonomous Database? (Choose all correct answers)

- A. TRANSFORM_PORTABLE=ALWAYS
- B. TRANSFORM=SEGMENT_ATTRIBUTES:N
- C. TRANSFORM=CONSTRAINT_USE_DEFAULT_INDEX:Y

D. TRANSFORM=DWCS_CVT_IOTS:Y

E. REMAP_TABLESPACE=DATA

F. REMAP_SCHEMA=SYSTEM

Correct Answer: BCDE

QUESTION 8

Your source tables are in an on-premises Oracle Database. You are creating a data server in Oracle Data Integrator (ODI) topology. Which THREE configuration items are needed to successfully test an on-premises Oracle Database connection ? (Choose 3 all correct answers)

A. name of the Oracle Instance (SID) or service

B. network name or IP address of the machine hosting the Oracle Database

C. database link

D. list of all schemas

E. listening port of the oracle listener

Correct Answer: ABE

QUESTION 9

Which four Oracle Database CloudServices are supported as a target database using Oracle Zero Downtime Migration?

(Choose all correct answers)

A. Oracle Database Cloud Service

B. oracle NOSQL Database Cloud Service

C. Autonomous Database

D. Oracle MySQL Database Cloud Service

E. ExadataCloud at Customer

F. Exadata Cloud Service

Correct Answer: ACEF

QUESTION 10

When integrating data from multiple sources into a Data Warehouse schema, you want to check a length constraint that you have imposed on one of the target columns before the rows arrive in the target table. All the rows that do not pass

this quality check will have to be isolated in error tables. For this, you have chosen an Integration Knowledge Module (IKM) that supports flow control. You have also chosen the value raue for this parameter to enable this check. At compile time, you see that Oracle Data Integrator (ODI) throws an error and the execution cannot start. What is the reason?

- A. Primary key was not defined on the target table.
- B. The Check Knowledge Module was not set in the physical design.
- C. The integration type was not set in the logical design.
- D. There were no rows compliant with imposed constraint.

Correct Answer: B

QUESTION 11

Which of these can be used to unload and load data via DataPump? (Choose two.)

- A. Dumpfile
- B. Streamfile
- C. Network mode (with database links)
- D. Backupset

Correct Answer: AC

QUESTION 12

Which TWO statements are true about online pluggable database (PDB) relocation? (Choose all correct answers)

- A. Database version downgrade can be achieved with PDB relocation.
- B. A PDB with the ASCII character set can be relocated to a container database (CDB) with the AL32UTF8 character set.
- C. PDB relocation with no version change can be performed with near-zero downtime.
- D. Online PDB relocation can achieve a zero downtime upgrade.

Correct Answer: CD

QUESTION 13

You have executed the mappings with Change Data Capture (CDC) on the source data store and you are now going through the code in the operator log for debugging. Which two tables or view do you need to inspect in the database to see whether the CDC process is writing changed data or not in Oracle Data Integration (ODI)? (Choose all correct answers)

- A. JV\$D view
- B. J\$ table
- C. JV\$ view
- D. JW\$ view

Correct Answer: AC

QUESTION 14

Which TWO object types should be excluded from an Autonomous Transaction Processing database? (Choose all correct answers)

- A. SCHEMA
- B. DB -LINK
- C. constraint
- D. cluster

Correct Answer: BD

QUESTION 15

Which statements are true about Data Pump? (Choose two.)

- A. It supports cross-endian formats
- B. Both the source and target database must be of the same version
- C. It supports cross-platform migration
- D. A best practice is to invoke Data Pump using SYS as SYSDBA

Correct Answer: AC
