QUESTION 1

The storage administrator wants to monitor and perform diagnostics on the topology of back-end SAS interconnect of an Oracle FS System. Identify which command the storage administrator should use.

A. the FSCLI pilot command

B. the FSCLI topology command

C. the FSCLI profile command

D. the FSCLI system command

Correct Answer: C

QUESTION 2

Which two are basic guidelines for adding Drive Enclosures (DEs) to an FS1 System?

A. DEs are added by using the maximum number of available strings to keep strings balanced.

B. Each Controller should have only four SAS cards installed.

C. When multiple DE strings and DE types are specified in a system, the DEs within each string should include a mix of the different DE types in order to improve I/O performance.

D. Cable connections are made using FC cables.

Correct Answer: BC

QUESTION 3

Which option describes an event notification?

A. a simple mail transfer protocol (SMTP) email message that notifies recipients of specified system events

B. a simple mail transfer protocol (SMTP) email message that notifies recipients of default system

C. a call-home email message that notifies recipients of specified system events

D. a call-home email message that notifies recipients of default system events

Correct Answer: D

QUESTION 4

Which four statements are true about MaxRep?

A. The replication license in MaxRep is separate for asynchronous and synchronous.

B. MaxRep supports Application consistent Data Recovery (Windows, Oracle DB). Additional charges apply.

C. MaxRep can replicate data only across FC link.

D. vSnap is mainly used for test, integrity checking, and single file recovery. It is not for use in heavy I/O.

E. MaxRep Rollback is an irreversible process.

Correct Answer: ACDE

QUESTION 5

How does the Oracle FS System Manager indicate that an alert has occurred?

A. by displaying an exclamation-point (!) icon in the dynamic status bar

B. by changing the system status icon to an exclamation-point (!) icon in the dynamic status bar

C. by displaying a star (*) in the dynamic status bar

D. by changing the hardware status icon to red in the dynamic status bar

E. by displaying a question mark (?) in the dynamic status bar

Correct Answer: C

QUESTION 6

Identify the FS1 feature that migrates data between storage tiers based on workload.

A. Quality of Service (QoS)

B. System Locality Information Table (SLIT)

C. QoS Plus (Auto-Tiering)

D. Port Masking

Correct Answer: C

QUESTION 7

How can you create a new administrator account?

A. To be able to access the Create Administrator Account dialog box, you must first select Administrator Accounts in the navigation bar under Global Settings. Then you have three options: Click the Actions drop-down menu and select Create or right-click on the context panel and select Create, or click CNTL n to open the dialog box.

B. On the Global Settings tab, under Global Settings, select Create from the Actions drop-down menu to open the Create Administrator Account dialog box.

C. On the System tab, under System, select Security from the Actions drop-down menu to open the Create Administrator Account dialog.

D. On the Global Settings tab, under Global Settings select Security from the Actions drop-down menu to open the Create Administrator Account dialog.

E. It is not possible to create a new administrator account. The FS system supports only one default administrator account, named administrator.

Correct Answer: D

QUESTION 8

Which set of steps is the recommended cabling sequence with FS1-2 hardware components?

A. 1. Pilot 1: Install CMA, plug all cables, and route them Power first, Ethernet Last.

2.

 Pilot 2: Same as above.

3.

 Controller 1: Install CMA, plug and route cables Power first, Ethernet, SAS Controller Interconnects, SAS Controller to Strings and Front End Network Connections respectively.

4.

 Controller 2: Same as above.

5.

 DEs per string sequence.

B. 1. Controller 1: Install CMA, plug and route cables Power first, Ethernet, SAS Controller Interconnects, SAS Controller to Strings, and Front End Network Connections respectively.

2.

 Controller 2: Same as above.

3.

 Pilot 1: Install CMA, plug all cables, and route them Power first, Ethernet last.

4.

 Pilot 2: Same as above.

5.

 DEs per string sequence.

C. 1. Controller 1: Install CMA, plug and route cables Power first, Ethernet, SASController Interconnects, SAS Controller to Strings and Front End Network Connections respectively.

2.

 Controller 2: Same as above.

3.

 DEs per string sequence.

4.

 Pilot 1: Install CMA, plug al cables and route them Power first, Ethernet Last.

5.

 Pilot 2: Same as above.

D. 1. Pilot 1: Install CMA, plug all cables, and route them Power first, Ethernet last.

2.

 Pilot 2: Same as above.

3.

 DEs per string sequence.

4.

 Controller 1: Install CMA, plug and route cables Power first, Ethernet, SAS Controller Interconnects, SAS Controller to Strings, and Front End Network Connections respectively.

5.

 Controller 2: Same as above.

Correct Answer: C

QUESTION 9

From which three sources can the system information be collected and placed into the system log bundle?

A. hardware components information

B. event logs

C. client logs

D. Storage Manager

E. SAN Switch

Correct Answer: ACD

QUESTION 10

The storage administrator is creating a user account for a new user. This new user will not be allowed to perform system-wide operations. Identify the correct role forthe new user.

A. Primary Administrator

B. Administrator3

C. Administrator1

D. Administrator2

Correct Answer: C

QUESTION 11

Which statement is true about Performance and Capacity SSDs being intermixed on the same Drive Enclosure?

A. You need to assign different types of disks to different disk groups, SSDs within a disk group must be of the same type.

B. You cannot mix SSD types within a Drive Enclosure. All SSDs within a DE must be the same type.

C. SSDs require different carriers than those that they are shipped with. When adding different types of SSD in a DE, you must exchange the drive carrier with the extra drive carrier that is included in the kit.

D. You can assign different types of disks to different disk groups. SSDs within a disk group can be of a different type.

Correct Answer: B

QUESTION 12

Where in the Oracle FS System Manager can a storage administrator locate the number of users currently logged in?

A. Dynamic Status Bar

B. Menu Bar

C. Content Pane

D. Navigation Pane

Correct Answer: D
