QUESTION 1

After a task flow has been deployed as a new shared library, which step is required in the portal extension project to make this task flow visible from WebCenter Portal?

- A. Update only weblogic.xml.
- B. Update only MANIFEST.MF.
- C. Update both files.
- D. None, because a shared library is used.

Correct Answer: C

QUESTION 2

Which statement is true?

- A. If you want to use a certain page style to create a portal page, you have to upload it on the assets page of this portal.
- B. You cannot create a subpage that has a different security from its parent.
- C. When creating a portal page/subpage for a new portal created in 11.1.1.8, you are also creating a navigation item for its default portal navigation.
- D. You cannot change a portal page's direct URL after its creation.

Correct Answer: C

QUESTION 3

What are the three capabilities provided by the Document Explorer taskflow?

- A. It allows users with the appropriate privileges to create folders in WebCenter Content.
- B. It shows version histories of files.
- C. It allows users to save a filtered view of the folder being viewed.
- D. It allows users to synchronize files to their local file systems.
- E. It allows users to customize which document properties to show in the columns of the view.

Correct Answer: ABD

QUESTION 4

Which option best describes the resource catalog?

- A. A resource catalog is a file that lists all the users registered with WebCenter Portal.
- B. A resource catalog is a runtime tool that is loaded with WebCenter Portal, which allows users to communicate with back-end databases.
- C. A resource catalog is a listing of tools and services that can be added into the page at run time.
- D. A resource catalog is a dictionary that contains all the business rules required for Oracle Composer.

Correct Answer: B

QUESTION 5

You are developing custom task flows.

Identify two reasons for using connections.xml to store required connection details for external services.

- A. This is the only way to set a connection in ADF.
- B. You can change the endpoints of the connections at run time.
- C. The connections can be updated when adding the task flow to the page in Portal Builder.
- D. Maintain all connection details in a central location.

Correct Answer: CD

QUESTION 6

What are the three ways to integrate and interact with WebCenter Content from WebCenter Portal?

- A. wikis and blogs
- B. discussions
- C. the Content Presenter
- D. polls and surveys
- E. the Document Library

Correct Answer: BCE

QUESTION 7

What happens to a page if a portlet throws an exception during the render-response phase of the ADF Faces Page Request life cycle?

- A. The page renders, displaying the portlet's configured unavailable error message.
- B. The page renders with no content displayed for the corresponding portlet.

- C. The page fails to render.
- D. The page renders, with an error recorded in a log file.

Correct Answer: C

QUESTION 8

You have to deploy a WSRP producer application for High Availability. Why should you add this setting to the weblogic.xml file? /appname REPLICATED_IF_CLUSTERED

- A. to enable support for replicating HTTP session state
- B. to enable ADF Controller to track changes to ADF memory scopes and replicate the page flow scope and view scope within the server cluster
- C. to enable ADF Business Components failover
- D. to enable ADF object replication

Correct Answer: C

QUESTION 9

A customer has a requirement to display BI reports on portal pages. What approach would you suggest?

- A. Develop a custom task flow to render BI data similar to an existing BI report.
- B. Add a BI folder that contains these reports to the Resource Catalog.
- C. Use a report URL in iFrame.
- D. Use Pagelet Producer to register a pagelet for each report.

Correct Answer: B

QUESTION 10

Which two skinnable components are WebCenter specific (as against basic ADF)?

- A. showDetailFrame
- B. showDetailItem
- C. panelCustomizable
- D. decorativeBox

Correct Answer: BD

QUESTION 11

When developing custom task flows for a Portal application, you should ensure that _____.

- A. no custom task flow contains any JavaScript
- B. the correct ADF version is used for your version of Portal environment
- C. the Content Repository is running, because this is where the task flows are stored
- D. all CSS styling of the task flows is kept within the taskflow, because Portal Skins cannot change the look and feel of a custom task flow

Correct Answer: D

QUESTION 12

What is the role of ADF Business Components in the development of a custom taskflow?

- A. It handles communication with data sources, such as a database and data persistence. It's also responsible to handle data validation.
- B. In an MVC model, it represents the Controller layer, handling navigation between pages or page fragments, and session information.
- C. It's a set of visual components aimed for business users. Graphs, Charts, and Reports are examples of Business Components.
- D. It's a set of facade classes that abstract the complexity of handling visual components in the UI layer. Users can add Business Components to the Portal page by using the drag-and-drop functionality.

Correct Answer: D

QUESTION 13

Which two key tasks can be performed in JDeveloper?

- A. Create Page Styles
- B. Deploy Assets to Portal Server
- C. Preview Portal on a mobile device
- D. Create Page Variants

Correct Answer: AC

QUESTION 14

Portal Server A has custom page templates and page styles deployed as shared assets. One of the page templates needs to be used in a different Portal Server B. What are the two ways in which an administrator can get this page template to Portal Server B?

- A. The administrator can download (export) the page template, save it into an archive from Portal Builder, and upload it into the target Server B using Portal Builder.
- B. The administrator can use `exportWebCenterResource/importWebCenterResource` WLST commands to do this.
- C. Shared assets cannot be copied across instances. The entire WebCenter Portal Instance needs to be copied over.
- D. Download/export the page template and page style from Portal server A as an archive and deploy the archive from JDeveloper to Portal Server B.

Correct Answer: CD

QUESTION 15

Users Lucy and Tom are editing a page or task flow simultaneously using Page Composer. Lucy deletes a component while Tom is trying to personalize (for example, move) that same component in View mode. What three things happen?

- A. A WebCenter error page is displayed to Tom.
- B. Tom cannot perform any action while Lucy is editing the page.
- C. The deleted component does not appear, and Tom can continue working on other components.
- D. Tom has to simply navigate back to the original page.

Correct Answer: ABD
