### QUESTION 1

Which three are key considerations when designing a template architecture?

- A. a simple, clear, and consistent framework for development
- B. support for implementation of asset security
- C. reuse of page components to reduce development overhead
- D. insight into database performance
- E. risk reduction through knowledge of the site architecture

Correct Answer: BCD

---

### QUESTION 2

Your client has an existing video streaming service that is performing well. Videos are of high definition and can measure in gigabytes of data each. The Marketing team wants the ability to allow its editors to embed videos in the middle of their CKedit body attributes, with the stipulation that there is no need for any coding for the editors. Assume that the editors already know how to use all the OOTB features of CKedit. Additionally, the Marketing team wants video links to appear in lists with other heterogeneous assets throughout the website.

Which solution will best meet these requirements?

- A. Create a basic asset that has several metadata attributes, one of which stores a reference to the video stream server URL. Create a typed template that builds the JavaScript code to render the video "in situ."
- B. Train the editors to simply type the URL of the video server in their CKedit body attribute by using the source code feature.
- C. Migrate the video blob data to the WebCenter Sites database as assets. Create a typed template that streams each video asset via blob server tags "in situ" just like any other blob asset.
- D. Create a flex video asset definition that has a single attribute that stores the JavaScript to embed the video player. Create a template that simply streams the JavaScript "in situ."

Correct Answer: D

---

### QUESTION 3

Which two statements are true about the significance of any column starting with "URL" in a database table that is created using WebCenter Sites?

- A. The table column value is a reference to a record in the MungoBlobs database table.
- B. The table column value is a reference to a file on the file system.
- C. The table column value is the result of a binary field created in AssetMaker for a basic asset.

D. The table column value represents a link to an image file stored in the database as a blob.

Correct Answer: AC

---

#### QUESTION 4

In the ContributorUI, what must be done if you want your author to change the slot presentation?

- A. The usage property in the template needs to be set to "Element is used as layout."
- B. The template needs to be coded with ICS tags.
- C. The usage property in the template needs to be set to "Element defines a whole HTML page and can be called externally."
- D. The template needs to be called with the render:layout tag.
- E. The Use Slots check box should be selected to enable the slot.

Correct Answer: C

---

#### QUESTION 5

You have an asset (Article) with one dependent asset (ArticleImage). These two assets are published and available on delivery. The Article asset is edited and approved for the second time. In this case, which two statements are true?

- A. If dependency type is "Exists," you must have the ArticleImage approved.
- B. If dependency type is "Exists," you must have the Article asset approved.
- C. If dependency type is "Exact," you must have only the ArticleImage asset approved.
- D. If dependency type is "Exact," you must have only the Article asset approved.
- E. If dependency type is "Exact," you must have both the Article and ArticleImage assets approved.

Correct Answer: BD

---

#### QUESTION 6

In a default installation, which three users exist in the SystemUsers table?

- A. Fwadmin
- B. csuser
- C. ContentServer
- D. DefaultReader
- E. SatelliteServer

Correct Answer: BCE

---

#### QUESTION 7

What two are characteristics of basic assets?

- A. can be rated for use with recommendations and promotions
- B. are simple data structures with a single storage table
- C. support a fixed, predictable design with a moderate number of attributes
- D. do not work with static publishing
- E. do not allow for subtypes
- F. include main tag families such as ASSETSET, SEARCHSTATE, and RENDER

Correct Answer: BF

---

#### QUESTION 8

Which three characters can be used in a template name?

- A. Underscore (\_)
- B. hyphen (-)
- C. hash (#)
- D. any numeric value
- E. percent (%)
- F. colon (:)

Correct Answer: BCF

---

#### QUESTION 9

By default, SiteCapture can be used to crawl an instance of WebCenter Sites. Identify two tasks that SiteCapture performs.

- A. It makes PDFs of the captured site.
- B. It archives a site in a zip file with metadata, HTML, JavaScript, and blobs.
- C. It saves only the pages that were changed to the SiteCapture file system.
- D. It crawls the site as different users.

Correct Answer: AC

---

#### QUESTION 10

Your legal department has informed you that there is a new requirement that every version of every webpage must be stored for seven years going forward. The site does not use Engage but it does use translations. Currently, publishing is every 24 hours.

What is the low cost way to meet this requirement?

- A. configuring Site Capture on delivery to execute every 24 hours
- B. leveraging the built-in block-level mirroring of both the database and the shared file system in the enterprise storage area network to execute every 24 hours
- C. modifying publish to publish to two delivery destinations simultaneously
- D. running two shell scripts that tar the shared file system and the database, respectively, to execute every 24 hours

Correct Answer: C

---

#### QUESTION 11

To reproduce an environment, which two backups are required at a minimum?

- A. cold backup of the database schema
- B. backup of the WebCenter Sites shared file system
- C. backup of the WebCenter Sites web applications
- D. backup of the Webserver configuration files

Correct Answer: AC

---

#### QUESTION 12

The WebCenter Sites installation process reports that it has completed installation successfully. But a number of database tables are missing.

What could be the possible cause here?

- A. WebCenter Sites is installed as a cluster member without being installed first as a single server.
- B. The database user is not given the "unlimited space" privilege, which prevents the creation of big system tables.
- C. An incorrect database driver is used, which prevents creation of tables with unsupported data types.
- D. The maximum capacity for the connection pool is configured incorrectly.

Correct Answer: C

---

### QUESTION 13

Which one of the following accurately describes WebCenter Sites?

- A. an Records Management solution with smart WYSIWYG authoring, a preview environment, and publication workflows
- B. a Content Management System (CMS) that is complete with a delivery platform, to manage multiple business sites
- C. a .NET development platform with a high performance caching architecture
- D. a commerce site management solution to deliver multichannel, multibrand, and multilingual websites

Correct Answer: C

---

### QUESTION 14

What would you need to set to participate in a workflow that provides an email notification for users?

- A. user account
- B. user profile
- C. be a part of the workflow user role
- D. LDAP account

Correct Answer: B

### QUESTION 15

An Article asset has 12 fields and most of them are rendered on a detail template.

Which tag can be used to get all the attributes in a single call?

- A. Asset:get
- B. asset:loadall
- C. asset:scatter
- D. asset:list

Correct Answer: B
