**QUESTION 1**

ACME is using cycle counting and the quantity variance approval tolerances are specified at the cycle count header level, cycle count Class level, and cycle count item level. When tolerances are set up at all the levels, which tolerance is considered first by Inventory?

- A. Unit cost level
- B. Subinventory level
- C. Cycle count item level
- D. Cycle count class level
- E. Cycle count header level

Correct Answer: C

QUESTION 2

You have logged in to the Oracle E-Business Suite Release 12 instance and accessed your worklist. You see four FYI notifications in your default Worklist view. You opened the first notification and clicked the "OK" button after reviewing the content.

Identify three things that can happen after you return to your worklist. (Choose three.)

- A. You see four notifications in your worklist.
- B. You see three notifications in your worklist.
- C. Status of the first notification has been updated to "Delete."
- D. Status of the first notification has been updated to "Closed."
- E. You can view the first notification by choosing the "All Notifications" view from your worklist.
- F. You can view the first notification by choosing the "FYI Notifications" view from your worklist.

Correct Answer: BDE

QUESTION 3

Select three true statements about inventory reservations. (Choose three.)

- A. A reservation is a link between a supply source and a demand source.
- B. For on-hand inventory supply, there is only one type of reservation called high-level reservation.
- C. For on-hand inventory supply, there is only one type of reservation called low-level reservation.

D. Reservations can be created only by Oracle applications or via forms. They cannot be imported from third-party applications.

E. A reservation creates a permanent data link between a supply source and a demand source, and represents a guaranteed allotment of material to a specified demand source.

F. Item reservations prevent the allocation of material you previously set aside for a sales order, account, account alias, inventory allotment, user-defined source, process batch components or, Oracle Complex Maintenance and Repair Overhaul work order components.

G. Item reservations allow the allocation of material you previously set aside for a sales order, account, account alias, inventory allotment, user-defined source, process batch components or, Oracle Complex Maintenance and Repair Overhaul work order components as long as the quantity is not negative.

Correct Answer: AEF

QUESTION 4

A multinational company operates in three countries, with one operating unit (OU) in each. Each OU is linked to one inventory organization. One of the inventory organizations is a manufacturing plant. Which two statements are correct? (Choose two).

A. A location is a legal address, it cannot be a Ship-To site for more than one country.

B. A location is unique to a specific OU responsibility when the Global check box is selected.

C. When a location is flagged as local, you must assign the local inventory organization to it.

D. The Ship-To location and Ship-To site for the same inventory location can be in different countries.

E. You cannot set a default receiving location in the Receiving Options for each inventory organization.

Correct Answer: DE

QUESTION 5

You would set up the profile option INV: Item Master Flexfield _____.

A. for items from legacy system referenced in this field
