

Exam : **1Z0-581**

Title : Pillar Axiom 600 Storage
System Certified
Implementation Specialist

Version : Demo

www.Pass4itSure.com

1.The storage administrator is viewing the Axiom storage systems and would like to create a volume for the SAN host. Which GUI component is used to manage this task?

- A. AxiomONE MaxMan
- B. AxiomONE Storage Services Manager
- C. AxiomONEStorage Manager
- D. AxiomONEQoS Manager

Answer: A

2.The storage administrator is creating a volume and wants to protect it from a full Brick failure. Identify the protection level needed to accomplish this configuration.

- A. Standard Redundancy
- B. RAID10
- C. Double Redundancy
- D. assigning the volume to a Storage Domain

Answer: C

3.The development team needs a volume that contains data from the production system for testing. Identify the best Pillar Axiom storage system method that can solve this challenge.

- A. Copy LUN
- B. Clone LUN
- C. Snapshot
- D. Clone Volume

Answer: B

4.The storage administrator is creating a LUN. Which organizational units can the LUN be assigned to?

- A. Storage Class
- B. Typical Access
- C. Volume Group D. Storage Domain
- E. Clone LUN Group

Answer: C

5.From which three sources can the system information be collected and placed into the bundle?

- A. Slammer hardware components
- B. Brick hardware components
- C. Client hosts with APM
- D. AxiomONEStorage Manager
- E. SAN Switch

Answer: A,B,C

6.By using which Pillar Axiom feature can you allocate system resources and handle data flow according to its business priority?

- A. Quality of Service
- B. Thin Provisioning

- C. Storage Domains
- D. Storage Profiles

Answer: A

7. Why does it matter if the source power for a PDU is 115v, 208v, or 230v?

- A. The Bricks, Slammers, and Pilots will draw different amperes depending on the input to the PDU.
- B. The Bricks and Slammers will draw different amperes depending on the input to the PDU but the Pilot will not draw much to make a difference.
- C. The Bricks and Pilots will draw the same amperes and not enough to make a difference but the Slammers will draw different amperes depending on the input to the PDU.
- D. It does not matter because the Bricks, Slammers, and Pilots will draw the same amperes.

Answer: A

8. Identify the information required during the installation of the Axiom VSS plug-in. Select all that apply.

- A. User Name
- B. Password
- C. System Serial Number
- D. VSS Provider Name
- E. Port Number

Answer: A,B,C

9. Identify what must be required in order to receive alerts and email notifications from the Axiom storage system.

- A. Email server
- B. SNMP host
- C. Call Home enabled
- D. Primary Administrator created

Answer: A

10. The storage administrator needs to download the CLI for scripting purposes. Identify where administrator should go to download the CLI.

- A. the HTML from the Pilot:
- B. the customer FTP site
- C. the Support tab in the AxiomONE GUI
- D. the customer support center
- E. the customer support portal

Answer: C

11. The storage administrator is looking for a specific event in the event log. Identify three event severities that can be filtered.

- A. Informational
- B. Critical
- C. Error
- D. Warning

E. Normal

Answer: A,B,D

12. Which three Axiom storage system resources can the storage administrator monitor?

- A. Running Tasks
- B. Storage Usage
- C. System Alerts
- D. SAN Host Performance
- E. SAN Switch Tasks
- F. Power Usage

Answer: A,C,D

13. Data Protection Manager gives you the capability to schedule backups of the application data on regular basis. Identify the name for the scheduled backups.

- A. checkpoints
- B. consistency groups
- C. point-in-time backups
- D. application-aware backup

Answer: D

14. The storage administrator would like to modify one of the system profiles. How can the storage administrator do this?

- A. by selecting "Manage Standard Storage Profiles" and modifying the system profile
- B. by selecting "Manage Advanced Storage Profiles" and modifying the system profile
- C. by selecting "Manage Standard Storage Profiles" and duplicating the system profile
- D. by selecting "Manage Advanced Storage Profiles" and duplicating the system profile

Answer: D

15. Identify what the default trending charts provide.

- A. Default trending charts provide a quick overview of the most commonly referred to characteristics of the selected LUN over the last few hours.
- B. Default trending charts provide a quick overview of the most commonly referred to characteristics of the selected LUN over the last 24 hours.
- C. Default trending charts provide a detailed overview of the most commonly referred to characteristics of the selected LUN over the last few hours.
- D. Default trending charts provide a detailed overview of the most commonly referred to characteristics of the selected LUN over the last 24 hours.

Answer: A
