**QUESTION 1**

Nicolas, a computer science student, decided to create a guest OS on his laptop for different lab operations. He adopted a virtualization approach in which the guest OS will not be aware that it is running in a virtualized environment. The virtual machine manager (VMM) will directly interact with the computer hardware, translate commands to binary instructions, and forward them to the host OS.

Which of the following virtualization approaches has Nicolas adopted in the above scenario?

- A. Hardware-assisted virtualization
- B. Full virtualization
- C. Hybrid virtualization
- D. OS-assisted virtualization

Correct Answer: B

QUESTION 2

In an organization, all the servers and database systems are guarded in a sealed room with a single entry point. The entrance is protected with a physical lock system that requires typing a sequence of numbers and letters by using a rotating dial that intermingles with several other rotating discs.

Which of the following types of physical locks is used by the organization in the above scenario?

- A. Digital locks
- B. Combination locks
- C. Mechanical locks
- D. Electromagnetic locks

Correct Answer: B

QUESTION 3

An attacker with malicious intent used SYN flooding technique to disrupt the network and gain advantage over the network to bypass the Firewall. You are working with a security architect to design security standards and plan for your organization. The network traffic was captured by the SOC team and was provided to you to perform a detailed analysis. Study the Synflood.pcapng file and determine the source IP address.

Note: Synflood.pcapng file is present in the Documents folder of Attacker-1 machine.

- A. 20.20.10.180
- B. 20.20.10.19
- C. 20.20.10.60

D. 20.20.10.59

Correct Answer: B

QUESTION 4

The IHandR team in an organization was handling a recent malware attack on one of the hosts connected to the organization's network. Edwin, a member of the IHandR team, was involved in reinstating lost data from the backup media. Before performing this step, Edwin ensured that the backup does not have any traces of malware.

Identify the IHandR step performed by Edwin in the above scenario.

- A. Eradication
- B. Incident containment
- C. Notification
- D. Recovery

Correct Answer: D

QUESTION 5

You are Harris working for a web development company. You have been assigned to perform a task for vulnerability assessment on the given IP address 20.20.10.26. Select the vulnerability that may affect the website according to the severity factor.

Hint: Greenbone web credentials: admin/password

- A. TCP timestamps
- B. Anonymous FTP Login Reporting
- C. FTP Unencrypted Cleartext Login
- D. UDP timestamps

Correct Answer: C

QUESTION 6

Bob was recently hired by a medical company after it experienced a major cyber security breach. Many patients are complaining that their personal medical records are fully exposed on the Internet and someone can find them with a simple Google search. Bob's boss is very worried because of regulations that protect those data. Which of the following regulations is mostly violated?

- A. HIPPA/PHI
- B. PII

C. PCIDSS

D. ISO 2002

Correct Answer: A

QUESTION 7

Ashton is working as a security specialist in SoftEight Tech. He was instructed by the management to strengthen the Internet access policy. For this purpose, he implemented a type of Internet access policy that forbids everything and imposes strict restrictions on all company computers, whether it is system or network usage.

Identify the type of Internet access policy implemented by Ashton in the above scenario.

A. Paranoid policy

B. Prudent policy

C. Permissive policy
