QUESTION 1

What is the purpose of the Allow Backup Exec to Delete All Expired Backup Sets option?

A. it ensures that a response to an alert will be required before any backup set is deleted

B. it enables all backup sets to be kept indefinitely

C. it changes the default behavior that allows Backup Exec to keep one backup set per job family regardless of settings

D. it prompts Backup Exec to delete all backups

Correct Answer: C

QUESTION 2

An administrator is using Symantec Backup Exec 2014 to back up to an LTO tape device using default settings. Backups are running slower than expected.

Which option may improve backup performance?

A. Use deduplication

B. Enable optimized duplication

C. Look for updates for the device and the controller

D. Change device concurrency settings

Correct Answer: C

QUESTION 3

Which two settings can an administrator configure to manually prevent a backup set from being deleted? (Select two.)

A. change the expiration date of the backup set

B. duplicate the backup set

C. archive the backup set

D. retain the backup set

E. catalog the backup set

Correct Answer: AD

QUESTION 4

For which backup storage type does Symantec Backup Exec 2014 store the .DR file along with the backup sets?

A. tape storage

B. deduplication storage

C. disk storage

D. virtual disk

Correct Answer: C

QUESTION 5

Which two settings can be configured in the ralus.cfg file of the Agent for Linux? (Select two.)

A. The list of files and directories to be excluded from backup jobs

B. Enable client-site replication

C. the list of Backup Exec servers to publish to

D. the list of Network Interface Cards (NIC) to use for the backup

E. the list of accounts which can access the Symantec Backup Exec server

Correct Answer: AC

QUESTION 6

Which job practice can cause Data Lifecycle Management (DLM) to take a long time to process?

A. running too many full backup operations

B. running too many incremental backups between full backup operations

C. running too many differential backups between full backup operations

D. running too many one-time backup operations

Correct Answer: B

QUESTION 7

Which tab in the SDR recovery disk menu helps to troubleshoot recovery related issues?

A. Utilities

B. Support

C. Recovery

D. Debug

Correct Answer: A

QUESTION 8

An Administrator is using a backup strategy that consists of one weekly full backup, and five daily incremental backups.

Which backup data must the administrator select to restore all data from the last available incremental backup?

A. the last full, plus each incremental that ran during that week

B. the last full, plus the last incremental

C. only the last full as Backup Exec will do the rest

D. only the last incremental as Backup Exec will do the rest

Correct Answer: D

QUESTION 9

Symantec Backup Exec 2014 allows administrators to make copies of deduplicated backup sets and transfer them to a different Backup Exec 2014 server. The transfer process is optimized, meaning only unique blocks (those not already contained in the deduplication disk storage device of the destination server) are copied.

What is the proper name of this ability?

A. optimized deduplication

B. optimized replication

C. optimized duplication

D. optimized synchronization

Correct Answer: C

QUESTION 10

An administrator needs to use Symantec Backup Exec 2014 to protect a VMware environment. The data store containing the VMware virtual machines is located on SAN disk storage. The Symantec Backup Exec 2014 server is also connected to the SAN infrastructure. The administrator needs to restrict the flow of

backup data such that it always travels over the SAN. How should the administrator proceed?

A. enable forced SAN mode on the VMware vCenter server

B. select the NBD transport option in backup properties

C. use the transport mode priority list option to only select SAN transport mode

D. enter the IP Address of the SAN data storage server

Correct Answer: C

QUESTION 11

Which task must an administrator run after performing a Simplified Disaster Recovery of SQL server to fully recover the SQL server application?

A. log in to the SQL server to verify user databases are restored

B. perform a SQL restore job from the Backup Exec server

C. run a file system validation on the server\\'s C:\ volume

D. run a consistency check on the SQL server

Correct Answer: B

QUESTION 12

How are restarts of the Symantec Backup Exec services processed when using LiveUpdate to update the Symantec Backup Exec server?

A. according to the service start schedule

B. once per patch update

C. once per LiveUpdate session

D. after 5 minutes of idle time

Correct Answer: C

QUESTION 13

Which task should an administrator complete before using Symantec Backup Exec 2014 to perform a recovery of a Unified Extensible Firmware Interface (UEFI) partition?

A. format the storage array

B. install a storage controller driver

C. create a utility partition

D. create an Intelligent Disaster Recovery Disk

Correct Answer: C

QUESTION 14

An administrator runs a Back up to Disk and Simultaneously Convert to Virtual Machine job. Which two actions occur if the backup job fails? (Select two.)

A. the conversion job fails

B. the conversion job succeeds

C. the conversion job succeeds with exceptions

D. the conversion job runs again during the next full backup

E. the conversion job runs again independently

Correct Answer: AD

QUESTION 15

What must be installed before performing an offhost GRT backup of an Exchange server?

A. Exchange Email Archiving Option

B. Advanced Disk Based Option

C. Central Admin Server Option

D. Deduplication Option

Correct Answer: B
