QUESTION 1

Refer to the exhibit.

An organization has the requirements listed below for a server's backup data.

Two copies must be retained for the same backup data.

One copy must be sent to disk with a retention period of one month.

A second copy must be sent to tape with a retention period of six months.

The copy on disk may only be automatically deleted by Symantec NetBackup after one month.

This must be configured without use of storage lifecycle policies.

How can a Symantec NetBackup 7.5 administrator configure a backup policy, maximizing automation, to meet these requirements?

- A. create a basic disk staging storage unit with a fixed retention of one month and staging to tape with a retention of six months; configure the backup policy to use this disk
- B. configure the backup policy to back up to a basic disk with retention of one month; run the `bpduplicate` command to duplicate to tape with retention of six months
- C. configure two identical schedules for the same policy, then configure one schedule to go to a basic disk with retention of one month and configure the other schedule to go to tape with retention of six months

D. configure the backup policy so that the schedule creates multiple copies: one to basic disk with one month retention, and one to tape with six months retention

Correct Answer: D

QUESTION 2

An organization plans to upgrade its master server to Symantec NetBackup 7.5. A Symantec NetBackup media server is being used to perform a backup of the catalog.

Which Symantec NetBackup version or versions are supported on the media server performing the catalog backup?

A. 6.5, 7.0, or 7.1

B. 7.5 only

C. 7.1 or 7.5 only

D. 7.0, 7.1, or 7.5

Correct Answer: B

QUESTION 3

Which Symantec NetBackup 7.5 command is used to report the potential free space of Advanced Disk storage units?

A. nbdevquery

B. nbdevconfig

C. nbemmcmd

D. nbdiag

Correct Answer: A

QUESTION 4

Refer to the exhibit.

Site 1	Site 2
Master server	Media server
Storage Lifecycle Policy	Storage Lifecycle Policy
Backup template	Import template
Duplicate template	

An administrator needs to perform Auto Image Replication. The administrator has configured the environment as displayed below.

Which component is missing from the configuration to complete Auto Image Replication?

- A. site 1 media server
- B. site 2 master server
- C. site 1 import template
- D. site 2 duplicate template

Correct Answer: B

QUESTION 5

When collecting data from assets, what is the primary factor in determining the types of data that will be collected?

- A. scope
- B. standard
- C. baseline
- D. reference asset

Correct Answer: B

QUESTION 6

Refer to the exhibit.

Two media servers, each with one standalone tape drive, exist in the Symantec NetBackup 7.5 environment displayed in the exhibit. Both weekly full and daily differential incremental backups need to run for the clients and each schedule has a different retention period. Because of network topology, some clients back up to media server 1 and some back up to media server 2.

How can the administrator minimize the number of times tapes will need to be changed manually?

- A. enable "Enable unrestricted media sharing for all media servers"
- B. enable "Allow backups to span tape media"
- C. enable "Allow multiple retentions per media"
- D. increase "Maximum mounts"

Correct Answer: C

QUESTION 7

Which step is recommended before scheduling any dashboard job?

- A. back up the reporting database
- B. run the Scheduled Reporting Database Purge job
- C. run the Scheduled Reporting Database Synchronization job

D. preview the dashboard

Correct Answer: C

QUESTION 8

The following steps have been taken:

Create a CSV file in the supported format

Share the CSV file on the computer where the Symantec Control Compliance Suite 9.0 console has been installed

Configure the CSV settings for the platform from which the CSV file is being imported Which job will be executed?

A.

Entitlements Import job

B.

Asset Import job

C.

Automatic Entitlements Import job

D.

Evaluation job

Correct Answer: B

QUESTION 9

Which user action can be performed on a read-only policy in the Symantec Control Compliance Suite 9.0 web portal?

A. Request Clarification

B. Request Exception

C. Accept

D. Decline

Correct Answer: A

QUESTION 10

Communications between Symantec Control Compliance Suite 9.0 (CCS 9.0) components rely on a signed digital

certificate.

What is the root certificate authority in the CCS 9.0 environment?

- A. Microsoft Certificate Authority Server
- B. Certificate Management Console Server
- C. CCS Management Service
- D. Application Server

Correct Answer: C

QUESTION 11

In which order should an administrator install a new Symantec NetBackup 7.5 patch?

- A. Master, Media 1, Media 2, Client, OpsCenter
- B. Master, Media 1, Client, Media 2, OpsCenter
- C. OpsCenter, Master, Media 2, Media 1, Client
- D. Master, OpsCenter, Media 1, Media 2, Client

Correct Answer: C

QUESTION 12

The master server has failed and must be recovered. The location containing the DR file was lost with the master server and the email containing the DR file is unavailable.

Which option exists for recovering the catalog?

- A. use `bpimport -drfile` to recover the DR file from the catalog tape
- B. use `bprecover -wizard -nodrfile` to recover the catalog
- C. use `bprestore -nodrfile` on the most recent catalog backup image
- D. use `bpimport` to import all the images on the catalog tape

Correct Answer: A

QUESTION 13

During catalog recovery the DR file is unavailable but the images database is intact.

Which step should the administrator take first to resolve the issue?

- A. identify catalog backup from the images database
- B. run import on all media in the robot
- C. import catalog image to disk to a temporary location
- D. run bprecover -wizard from the command line with additional switches

Correct Answer: A

QUESTION 14

Which types of information are backed up by a cumulative incremental backup schedule?

- A. files and folders that have changed since the last differential incremental, cumulative incremental, or full backup
- B. files and folders that have changed since the last cumulative incremental or full backup
- C. files and folders that have changed since the last full backup
- D. files that have changed since the last incremental or full backup

Correct Answer: C

QUESTION 15

An organization needs to automatically back up a server's data every other Sunday with a backup start window from 7:00 PM to 10:00 PM. It is expected that manual backups will never be run. How can this backup schedule be configured to ensure it runs every other Sunday at 7:00 PM?

- A. Schedule type: Calendar Calendar Schedule: Recurring Week Days: 1st and 3rd Sunday
- B. Schedule type: Calendar Calendar Schedule: Recurring Week Days: 2nd and 4th Sunday
- C. Schedule type: Frequency, once per 2 weeks
- D. Schedule type: Frequency, once per 13 days

Correct Answer: D
