Correct Answer: D

QUESTION 6

A Case Team needs to determine whether to enable Symantec Clearwell eDiscovery Platform 7.x to extract images from emails and files. Which two considerations should influence the Case Team's decisions? (Select two.)

- A. Extracting images can expand the attachment list during review and export.
- B. If images extraction is disabled, images are unavailable for viewing.
- C. Clearwell gives no indication of whether there are images in a document, so extracting images is an essential step to ensure they will be reviewed.
- D. Extracting images is supported for email only.
- E. Extracting images enables users to apply OCR to the images, thus generating text and making the images searchable.

Correct Answer: AE

QUESTION 7

An organization plans to switch from Microsoft Exchange to an Open Source mail platform. The organization will replace Outlook on all user machines with a new mail program that stores messages in the MBOX format. Which workflow

should the System Manager implement to properly process email from the new system?

- A. collect the mail and leave it in its MBOX format, as Clearwell can process mail in the MBOX format
- B. collect the mail, leave it in its MBOX format, and have it converted to Outlook (PST) by a third party before processing in Clearwell
- C. employ a third-party software solution to convert the MBOX files to Outlook (PST), then process the converted files in Clearwell
- D. collect the mail and prepare to review it in its native format, then convert only responsive messages to Outlook (PST) for processing in Clearwell

Correct Answer: A

QUESTION 8

A Case Team needs to search for all items that include the word "jasmin" because it refers to a project that is under investigation. The Case Team also wants to include variations such as "jasmen," "jasmine," and "jasminum".
