### QUESTION 1

Which PacketShaper feature can be applied to the Folder class?

- A. Matching rule
- B. Partition
- C. Policy
- D. Outbound/Default classification

Correct Answer: A

---

### QUESTION 2

What is the purpose of a "Traffic Class"?

- A. It enforces the policy by normalizing all traffic
- B. It applies source routing features for load balancing
- C. It identifies the traffic type, which allows a policy to be applied
- D. It forwards traffic to the Measurement Engine

Correct Answer: A

---

### QUESTION 3

Which three (3) criteria are to be specified in a matching rule? (Select three)

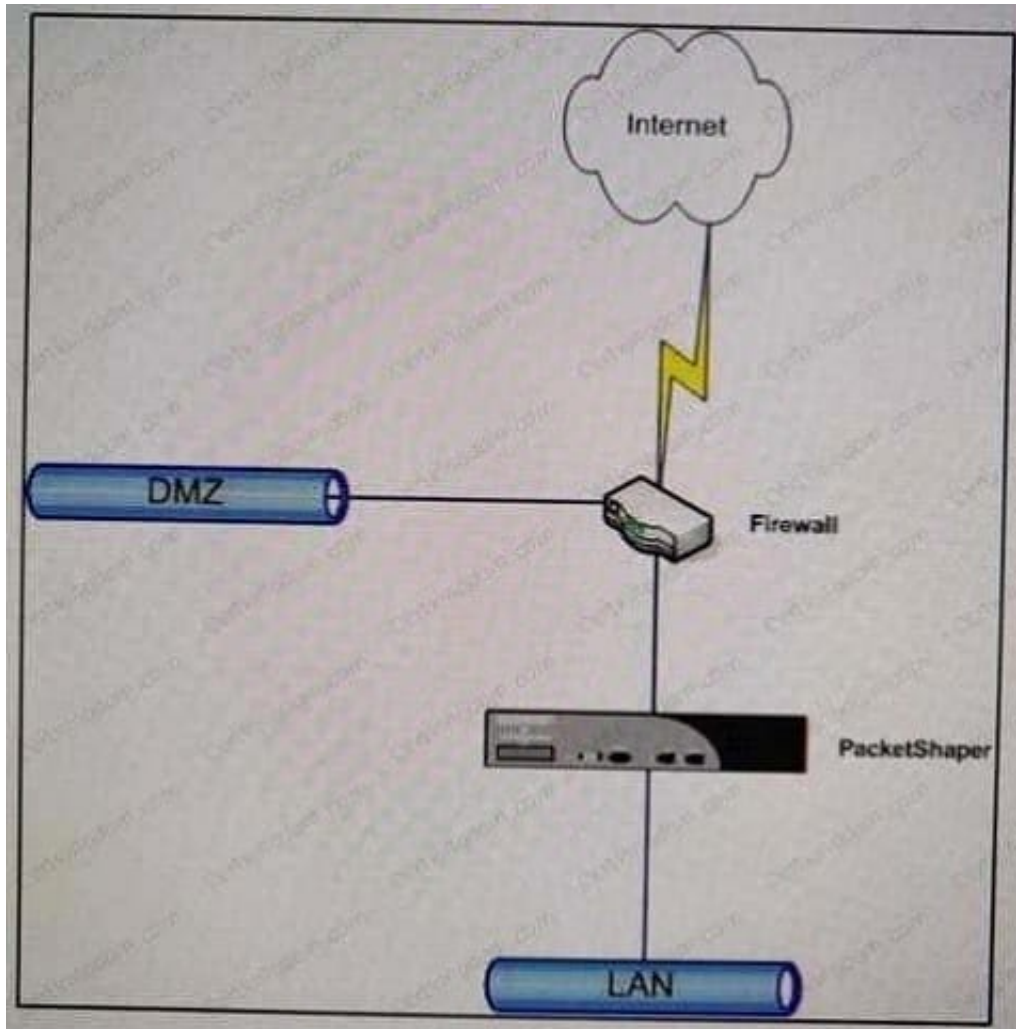

- A. Service group
- B. Diffserv marking
- C. Traffic type
- D. SSL URL P
- E. Interface
- F. VLAN identification

Correct Answer: ABC

---

**QUESTION 4**

Refer to the exhibit.

Which task must the administrator perform to make sure that traffic between (he IAN and DMZ is treated as pass-through PacketShaper installed as shown?

- A. Create a class for LAN-to-DMZ traffic and apply a 100 MB partition to it. ...
- B. Create a class for IANto-OMZ traffic and apply a 100-MB rate policy to it.
- C. Create a class for IAN-tO-DMZ traffic and apply an ignore policy to it.
- D. Configure the PacketShaper to automatically identify Inside and Outside hosts, therefor\* no special configuration is required.

Correct Answer: B

### QUESTION 5

Which module allows an administrator to set bandwidth minimums and maximums, control bandwidth allocation, and ensure clear streams for voice and video?

- A. Acceleration
- B. Shaping
- C. Monitoring
- D. Measurement engine

Correct Answer: A

---

### QUESTION 6

When would the traffic class Inbound/HTTP inherit its policy from another class?

- A. When Inbound/HTTP has an ignore policy applied
- B. When Inbound/HTTP has a rate policy applied
- C. When Inbound/HTTP has a priority policy applied
- D. When Inbound/HTTP does not have a policy applied

Correct Answer: D

---

### QUESTION 7

Which statement about dynamic partitions is true?

- A. All fixed partitions are converted to dynamic as users become active in a traffic class
- B. They can only be configured for the aggregate traffic class
- C. Child class partitions, automatically convert the parent class into dynamic partitions
- D. The minimum subpartition size is 1024 bps

Correct Answer: A

---

### QUESTION 8

Why would an administrator configure the failover feature in PacketShaper Guided Setup?

- A. To enforce policies to react to a new link speed when the primary WAN link fails
- B. To configure advanced system settings, such as Packet Engine, auto discovery, and dynamic partitions
- C. To configure PacketShaper for use with WCCP when the primary WAN link fails
- D. To schedule commands to execute at a specific time or on a recurring basis

Correct Answer: B

---

#### QUESTION 9

Which CLI command will display the current rate and connection information about active hosts?

- A. hostdb hosts
- B. hostdb accounting
- C. hostdb info
- D. hostdb show

Correct Answer: B

---

#### QUESTION 10

Which option allows an administrator to differentiate Citrix-based applications and protect their performance?

- A. Choose Priority 7 from the matching rule's Citrix-specific classification criteria to identify print traffic.
- B. Assign the default partition and policy to all parts of the Citrix traffic tree, regardless of application urgency.
- C. Enable discovery and let PacketShaper discover the Citrix-based applications, then create a traffic class for each one.
- D. When Citrix applications generate a large amount of print traffic, merge multiple Citrix-based applications into one traffic class

Correct Answer: A

---

#### QUESTION 11

Which option best defines an "unreliable network" within PacketShaper?

- A. It has NO traffic trees defined in the PacketShaper
- B. Its latency is decreased, meaning that the frequency of time-outs and retransmissions spike
- C. It offers no guarantees that packets will NOT be delayed, damaged, or lost
- D. Its acknowledgments are in UDP, NOT TCP

Correct Answer: A

---

#### QUESTION 12

Which control limits the number of simultaneous TCP flows in a class?

- A. class licenses
- B. policy delay bound
- C. system limits
- D. policy flowlimit

Correct Answer: B

---

#### QUESTION 13

What is required on the network to allow classification of traffic flow by a specific user?

- A. Install the Blue Coat Authentication and Authorization Agent (BCAAA) on a separate server.
- B. Nothing. Users are automatically discovered by your PacketShaper.
- C. Enable Users and Groups on the PacketShaper Setup page.
- D. Install the Blue Coat Authentication and Authorization Agent (BCAAA) on your PacketShaper appliance.

Correct Answer: A

---

#### QUESTION 14

Refer to the exhibit.

The Global Intelligence Network Of WebPulse service classifies .1 website as "Entertainment; Mumor/tokes." The current configuration of PacketShaper has traffic discovery enabled within the Inbound/HTTP class and has the class tree shown as in the exhibit with WebPulse enabled.

What two (2) classes will the traffic flow into when the client makes a request to the website in question?

(Select two)

- A. Inbound/Local host
- B. inbound/Entertainment
- C. Inbound/HTTP/Default
- D. Inbound/HTTP/Entertainment
- E. Inbound/Humor\_jotes

Correct Answer: AD

### QUESTION 15

Which two (2) actions are most appropriate for controlling prohibited, unsanctioned traffic flows such as music downloads? (Select two)

- A. Set a discard policy to block the traffic
- B. Set a never-admit policy to redirect the traffic
- C. Set a rate policy with 0 guaranteed, bur\*table, at high priority
- D. Set a rate policy with 0 guaranteed, burnable, at priority 6
- E. Create a static partition for each branch

Correct Answer: AE
