What step do you need to perform to recover the destroyed disk groups?

- A. Use the vxvg import command to import the disk group with the disk group id.
- B. Use vxrestore command to restore the disk group.
- C. Use vxrecover disk group command to recover the disk group.

D. Use vxconfigstore to recover the disk group.

Correct Answer: A

QUESTION 5

You want to allow non-layered volume to change to layered stripe-mirror volume while remaining online. What is the correct procedure to perform this conversion?

- A. Convert the volume, stop the volume, remount the file system, and start the volume.
- B. Unmount the file system, stop the volume, convert the volume, start the volume, and remount the file system.
- C. Resync the volume, convert the volume, and mirror the volume.
- D. Stop the volume and then convert the volume.

Correct Answer: B

QUESTION 6

An incident responder is viewing a discover incident snapshot and needs to determine which information to provide to the next level responder. Which information would be most useful in assisting the next level responder with data clean-up?

- A. Incident Details: Message Body content
- B. Custom Attributes: Most Active User from Data Insight
- C. Incident Details: File Owner metadata
- D. Access Information: File Permissions

Correct Answer: B

QUESTION 7

An administrator needs to deploy a Symantec Data Loss Prevention solution that will monitor network traffic. Which traffic type is excluded from inspection when using the default configuration?

- A. HTTP-get
- B. NNTP
- C. FTP-put
- D. HTTP-post

Correct Answer: A

**QUESTION 8**

You have imported a disk group onto a new Storage Foundation 5.0 server named Srv1. The existing Storage Foundation 4.1 server named Srv1 will be decommissioned. When you attempt to use the newly imported disk group on Srv2, you

get the following error:

VxVM vxedit ERROR V-5-1-2829 Disk group version doesn't support feature. You want to resolve this error and use the features provided by VxVM running on Srv2.

How would you solve this error?

- A. Upgrade the disk group on Srv1 and then import the disk group.
- B. Explicitly upgrade the disk group to the current version.
- C. Reboot Srv2.
- D. Revert VxVM to an earlier version.

Correct Answer: B

QUESTION 9

After installing the Volume Manager, you need to configure the Volume manager for large number of servers. You also need to consider the capacity and performance in installed environment. You want to optimize the performance of mirrored volumes by applying default Volume Manager policy. Which policy will you apply to get performance of mirrored volumes?

- A. Apply the prefer policy
- B. Apply the select policy
- C. Apply the round robin policy
- D. Apply the siteread policy

Correct Answer: B

QUESTION 10
