

Exam : **60-DSF**

Title : Altiris Deployment Solution
Foundation 6.8

Version : Demo

www.Pass4itSure.com

- 1.Which statement about deploying computer image files is true?
- A.The RDeploy switch used to preserve existing partitions is enabled by default.
 - B.Aborting the deployment process (after imaging as started) corrupts the destination computer's hard drive.
 - C.The maximum space required on the destination hard drive is equal to the size of the image file.
 - D.The imaging process is non-destructive, and adds data to what is already stored on an existing hard drive partition.

Answer:B

- 2.When capturing a computer's personality, the application settings used for this process are located in which file type?

- A..INI
- B..A2I
- C..ASI
- D..PBT

Answer:B

- 3.AClient (on a managed computer) has been configured to use a multicast packet to locate the Deployment Server. Which statement is now true?

- A.moving this computer to a different Deployment System requires the AClient agent be reconfigured
- B.images can be sent using unicast packets or multicast packets
- C.this setting configures images to be sent to the computer using multicasting technology
- D.the Deployment Server must be configured to obtain its IP address from a DHCP server

Answer:B

- 4.Which program lets you edit image files after they have been created?

- A.ImgViewer
- B.ImageExplorer
- C.ImageEditor
- D.ImageManager
- E.ImgManager

Answer:B

- 5.Deployment Agents (such as AClient) can be installed on remote computers using the Remote Agent Installer, but only when the remote computers are running which four operating systems? (Choose four.)

- A.Windows 2000
- B.Windows 95
- C.Windows NT
- D.Windows XP
- E.Windows 2003
- F.Linux
- G.Windows 98

Answer:A C D E

- 6.AClient has not been password protected. Which three tasks can be performed after right-clicking on the AClient icon from a managed computer? (Choose three.)

- A.initiate Microsoft's Sysprep Utility in preparation for imaging
- B.view the AClient log file when log files have been enabled
- C.change the name of the managed computer as it appears in the Deployment Console

- D.change the NetBIOS name of the managed computer
- E.monitor AClient's communication with the Deployment Server
- F.reinstall AClient
- G.edit the AClient template file

Answer:B C E

7.Which utility removes the security ID (SID) before making an image of a computer?

- A.SIDgenerator
- B.SetupCapture
- C.Sysprep
- D.ImageExplorer
- E.SIDconfig

Answer:C

8.How does a Deployment Solution job let you work with software virtualization layers? (Choose two.)

- A.layers can be imported to a managed computer
- B.layers can be created
- C.the state of a layer can be managed (activated, deactivated, and so forth)
- D.the content of a layer can be modified

Answer:A C

9.Which required symbol identifies the opening and closing of a Deployment token?

- A.%
- B.#
- C.\$
- D.*

Answer:A

10.Deployment Solution's Simple Install Helper will check for and install which required third-party software? (Choose two.)

- A.Java
- B.DirectX
- C.ActiveX
- D..NET framework
- E.Pre-boot automation operating systems
- F.SQL

Answer:D F

11.You are using the Deployment Console's New Job Wizard to migrate a computer's personality from one computer to different computer. What happens to the names of these two computers during this process?

- A.The destination computer is automatically given a new unique name.
- B.The source computer is automatically renamed and the destination computer gets the original name of the source computer.
- C.The two computers will end up with identical names, therefore you must rename one of the computers manually.

Answer:B

12.When using Altiris PXE servers in a Deployment System, which PXE statement is true?

- A.Multiple PXE servers can only be installed if a router separates them.

- B.If a PXE server is configured to delay its response, it will respond only if no other PXE server responds immediately.
- C.A managed computer only uses the first PXE server it hears from.
- D.Configuring multiple PXE servers to respond immediately causes errors on the managed computers.

Answer:C

13.While imaging computers, Deployment Solution supports the use of UNDI drivers. Which UNDI driver statements are true? (Choose two.)

- A.UNDI drivers are written specifically to work with the Altiris automation process.
- B.UNDI drivers must be downloaded and installed from Intel's Web site before they can be used.
- C.UNDI drivers let you image computers without obtaining a specific manufacturer's network driver for each network card.
- D.UNDI drivers do not support multicasting of hard disk images across the entire network.
- E.UNDI drivers support multicasting of hard disk images across the entire network.

Answer:C D

14.When using the DOS operating system, image files with an .EXE file extension _____?

- A.cannot be deployed using a Deployment job
- B.must be converted to .IMG before they can be deployed with a Deployment job
- C.cannot be converted to .IMG files
- D.can be deployed without using additional Altiris imaging software

Answer:D

15.You have deployed a hardware independent image to an ACPI Uniprocessor computer and now the computer will not start. What is the probable cause?

- A.the wrong hardware abstraction layer (HAL) was deployed
- B.Sysprep was not run on the source computer
- C.the ACPI Uniprocessor computer does not support hardware independent images
- D.a clean Windows installation was not performed on the source computer before creating the hardware independent image.

Answer:A

16.Which Altiris utility creates the necessary media to run the Initial Deployment job from a CD?

- A.ImageExplorer
- B.RapiDeploy
- C.PXE Configuration Utility
- D.Initial Deployment Configuration Utility
- E.Boot Disk Creator

Answer:E

17.You can use _____ to ensure that your PXE servers are servicing the correct managed computers.

- A.IP blocking
- B.Conditions
- C.MAC filtering
- D.NetBIOS name recognition

Answer:C

18.Which Deployment Console method lets you work with software virtualization layers?

- A.using a Deployment job
- B.selecting Tools > Software Virtualization

C.right-clicking on a computer and selecting Software Virtualization > Manage Layers

Answer:A

19.Which Deployment Solution component stores the main Deployment System program files?

- A.Deployment Server
- B.Deployment Database
- C.Deployment Share
- D.Microsoft DHCP Server
- E.Deployment PXE Server
- F.Deployment Console

Answer:C

20.AClient has been installed on your Windows XP managed computers. Which three methods can be used to change the settings AClient is currently using? (Choose three.)

- A.from the Deployment Console, right-click on the computer and select Change Agent Settings
- B.from the Deployment Console, select Tools > AClient > Configurations
- C.from the managed computer, select Start > All Programs > Altiris > AClient > Configuration
- D.from the managed computer, double-click the AClient icon located in the system tray and select Properties
- E.from the Deployment Console, double-click on a computer and edit the client properties
- F.use the Deployment Console to reinstall AClient with the desired settings

Answer:A D F
