### QUESTION 1

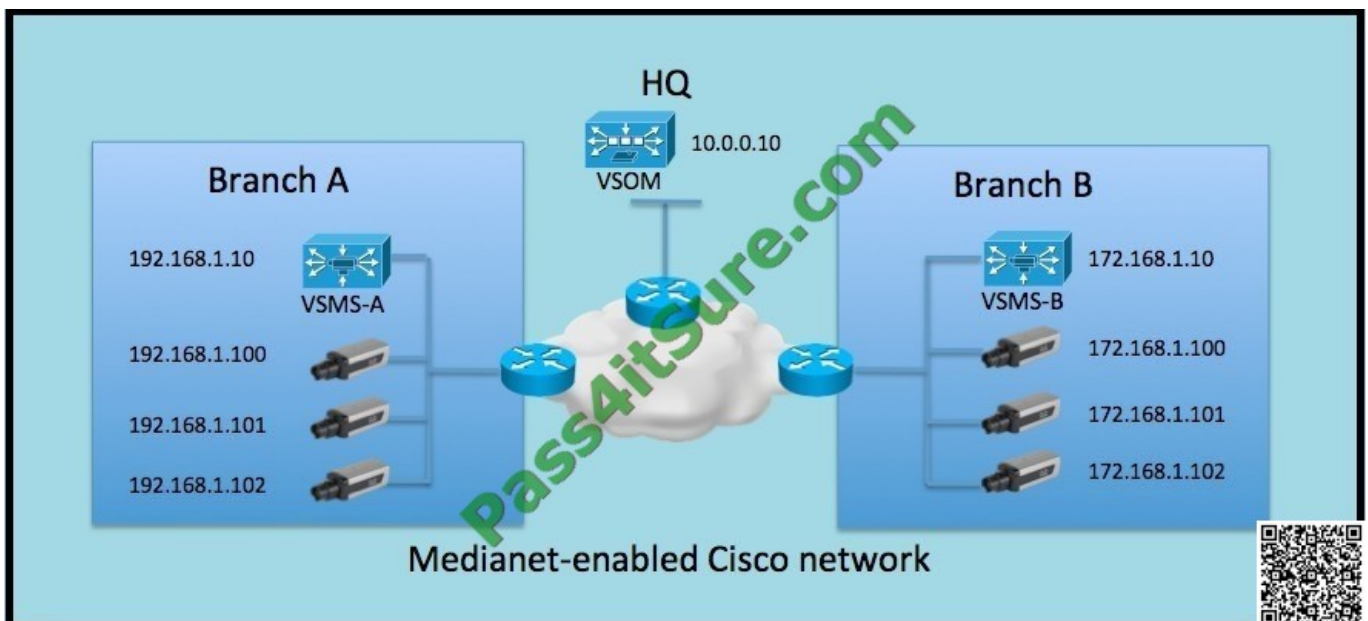

When configuring an event in Cisco VSOM, which of the following is not a valid configuration option?

- A. Soft Trigger
- B. Analytics Trigger
- C. Time-Based Trigger
- D. Device Trigger

Correct Answer: C

### QUESTION 2

Refer to the exhibit.

Cisco VSOM, Cisco VSMS servers, and IP cameras in the shown Cisco VSM deployment are utilizing default NTP behavior to ensure that time settings are synchronized across all devices.

What is the IP address of the pointed-to NTP server for the device with IP address 172.168.1.101?

- A. 10.0.0.10
- B. 172.168.1.10
- C. 172.168.1.101
- D. 192.168.1.101

Correct Answer: B

**QUESTION 3**

In VSM 6.3.2, which archive clip format allows for the downloading and playing back of multiple camera feeds simultaneously?

- A. CVA
- B. AVI
- C. WMV
- D. BWM

Correct Answer: A

---

**QUESTION 4**

When an installation of VSM is complete, what is the Cisco recommendation and best practice for the final step that should be taken?

- A. Create a configuration backup on the same server
- B. Create a backup in a location other than the server
- C. Delete any batch administration files left over from the installation
- D. Stop and restart each archive

Correct Answer: B

---

**QUESTION 5**

The headquarters of a California regional bank wants to deploy a redundant IP video surveillance solution using Cisco VSM 7. The IT manager is asking for a redundant video storage solution, however, with minimal infrastructure cost.

How should a Cisco VSM 7 redundancy be designed for this scenario?

- A. An IT engineer can define a cluster of Cisco VSMS servers, which all fall back to a backup Cisco VSMS server if any should fail.
- B. For redundancy, each media server needs to be doubled and servers then operate in load balancing fashion.
- C. VSM 7 can record the primary stream of each camera on Cisco media server (either MSP or virtual machine), and the secondary stream can be recorded to NAS storage for a cost-effective solution.
- D. Cisco VSM 7 does not support redundancy for Cisco VSOM and Cisco VSMS.

Correct Answer: A

---

## QUESTION 6

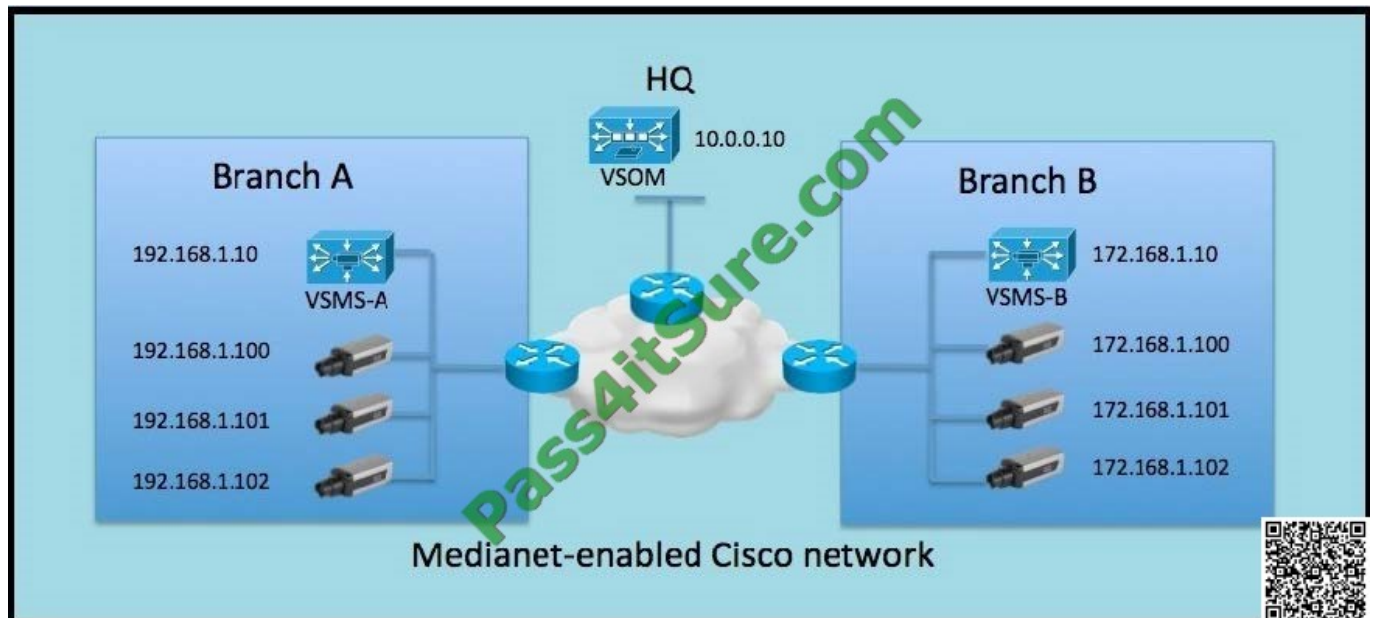

How are SNMP traps configured?

- A. SNMP traps can be added in the SNMP Trap Destinations section of VSMC
- B. SNMP traps are configured directly on the operating system
- C. SNMP traps are configured through VSOM, on the server network traps setup pages
- D. SNMP traps cannot be configured directly on the system, and a third-party application is needed

Correct Answer: A

## QUESTION 7

Refer to the exhibit.

You are the system administrator for a newly deployed Cisco Video Surveillance solution. Branch A cameras are streaming to Cisco VSMS-A and Branch B cameras are streaming to Cisco VSMS-B. Cisco VSOM is reporting a "Timed out waiting for server response" error when trying to load video from camera 192.168.1.102, but network pings are being responded to from your workstation at HQ. All other cameras from the 192.168.1.0 network are working as expected.

Which three options could have caused the error message? (Choose three.)

- A. There is a network configuration issue with the switch and switch port that camera 192.168.1.102 is connected to.
- B. Media server 192.168.1.10 is down and not responding.
- C. The Branch A and HQ routers are updating their routing tables and they have not yet converged.
- D. There is an IP address conflict on the 192.168.1.0 network.

E. The password on the camera was changed.

Correct Answer: ADE

### QUESTION 8

Which statement best describes the physical and virtualized Cisco VSM 7 platforms that Cisco recommends?

- A. Operations Manager must be deployed on a physical MSP server, media server can be deployed on physical MSP servers and/or as virtual machines on Cisco UCS.
- B. Media server must be deployed on physical MSP server(s), Operations Manager can be deployed on physical MSP or as a virtual machine on Cisco UCS servers.
- C. Cisco VSM deployments should be either on dedicated physical MSP servers or virtualized UCS servers, but not both.
- D. Cisco VSM is interchangeable and interoperable across physical MSP and virtualized Cisco UCS deployments and can be mixed without additional configurations.

Correct Answer: D

### QUESTION 9

Refer to the exhibit.

```
Device ID: 00254519F716
Entry address(es):
  IP address: 10.10.10.202
Platform: CIVS-IPC-4500, Capabilities: Host
Interface: FastEthernet0/7, Port ID (outgoing port): eth0
Holdtime : 145 sec

Version :
1.0.1

advertisement version: 2
Duplex: full
Power drawn: 13.000 Watts
Power request id: 51694, Power management id: 4
Power request levels are:13000 0 0 0 0
Management address(es):
  IP address: 10.10.10.202

Switch#
```

Which statement can be determined from the output shown?

- A. This is the output from the show power inline command.
- B. The connected device is an 802.af class 3 PoE camera.

- C. The switch management IP address is 10.10.10.202.
- D. The PoE device is connected to switch port 0.

Correct Answer: B

---

#### QUESTION 10

Which of the following reports are available in the Cisco Video Surveillance solution?

- A. User Configuration Report only
- B. Device Activity Report only
- C. Application History Report only
- D. User Configuration, Device Activity, and Application History reports are available in the Cisco Video Surveillance solution.
- E. User Configuration, Device Activity, and Application History reports are not available in the Cisco Video Surveillance solution.

Correct Answer: E

---

#### QUESTION 11

Order the servers from lowest to highest usable capacity.

- A. 2RU (6 x 1 TB), 2RU (12 x 1 TB), 2RU (6 x 2 TB), 2RU (12 x 2 TB)
- B. 2RU (6 x 1 TB), 2RU (6 x 2 TB), 2RU (12 x 1 TB), 2RU (12 x 2 TB)
- C. 2RU (12 x 2 TB), 2RU (12 x 1 TB), 2RU (6 x 2 TB), 2RU (6 x 1 TB)
- D. 2RU (12 x 2 TB), 2RU (6 x 2 TB), 2RU (12 x 1 TB), 2RU (6 x 1 TB)

Correct Answer: B

---

#### QUESTION 12

As the system administrator, you have been asked to immediately delete cameras in Cisco VSM that are located at a building that was recently vacated by your company. However, due to security and corporate retention policy, you must keep the archived video for 14 days.

What method does Cisco recommend to accomplish this task and ensure that the retention policy is met?

- A. "Soft Delete" the camera.
- B. Connect to the Cisco VSM server via FTP and transfer the video files to another server.
- C. Select the Retain Video and Blacklist option when deleting the camera.

D. Set up Advanced Recording features and use an LTS server for retaining archives.

Correct Answer: A
