QUESTION 1

You create a User Profile Synchronization connection.

You need to grant the necessary permissions to the synchronization account.

What should you do?

- A. Grant the account Full Control on the ActiveUsers OU.
- B. Grant the account Full Control on the AuthenticatedUsers AD security group.
- C. Grant the account Read permission on the domain.
- D. Grant the account the Replicate Directory Changes permission on the domain.

Correct Answer: D

QUESTION 2

You need to replicate the SQL Server logins for the database instance in the search farm and ensure that no replication related errors are generated. To which server or servers should you replicate the logins?

- A. SPS-DB02 only
- B. SPS-DB03 only
- C. SPS-DB01 and SPS-DB02 only
- D. SPS-DB01, SPS-DB02, and SPS-DB03

Correct Answer: A

QUESTION 3

You are setting up individual user sites.

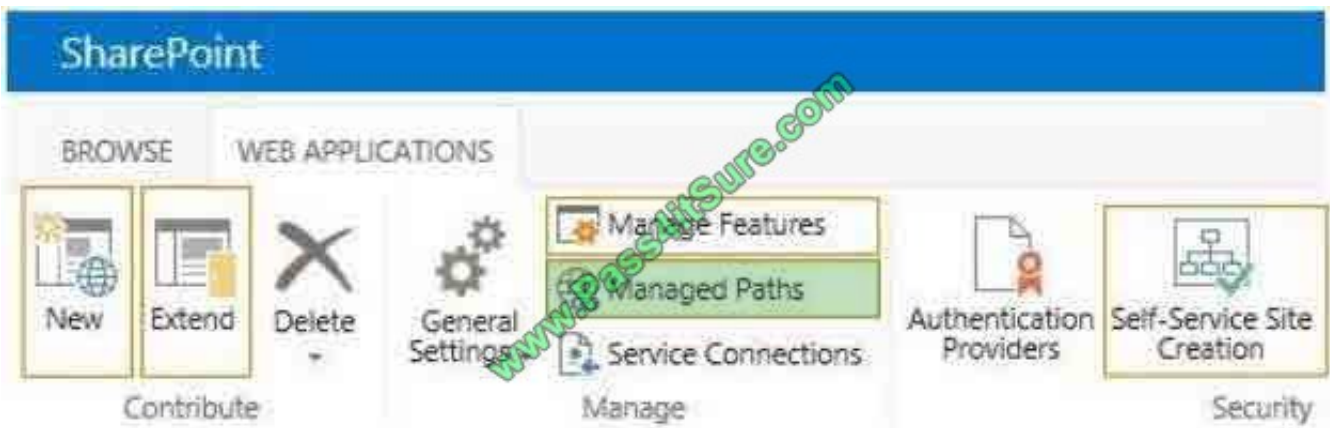

You need to ensure that site addresses follow corporate guidelines.

Which command should you use? (To answer, select the appropriate command in the answer area.)

Hot Area:

Correct Answer:

QUESTION 4

You plan to deploy a SharePoint Server 2013 server farm.

You have a network share named Share1 that contains the extracted installation files for SharePoint Server 2013.

You download a cumulative update for SharePoint Server 2013 named Cu1.exe.

You need to create a slipstreamed installation source that contains the cumulative update.

What should you do?

- A. Run cul.exe and specify the /extract parameter.
- B. Copy Cul.exe to the Updates folder in Share1.
- C. Run setup.exe and specify the /extract parameter.
- D. Create a folder named 15\Resources in Share1, and then copy Cul.exe to the 15\Resources folder.

Correct Answer: A

Explanation: Extract the contents of the downloaded update file to the Updates folder in the SharePoint installation source with the following command: {FileName}.exe /extract:C:\SPInstall\Updates

Note: SharePoint updates that have been released since the product launch provide fixes and enhancements to the product, and including these updates in a new installation is recommended. Rather than manually applying the updates after installing SharePoint, you can include them in a `slipstream` mode so that they are automatically installed with SharePoint.

QUESTION 5

A company plans to upgrade a SharePoint 2010 farm to SharePoint Server 2013. The site collection administrators will upgrade the SharePoint sites.

The SharePoint 2013 environment contains a web application dedicated to the upgrade process.

You need to migrate SharePoint 2010 content to the SharePoint 2013 environment. Before completing the upgrade process, you must ensure that all required customizations have been deployed.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Answer Area

- Run the **Test-SPContentDatabase** Windows PowerShell cmdlet.
- Run the **Mount-SPContentDatabase** Windows PowerShell cmdlet.
- In Central Administration, attach the content database.
- Run the **Move-SPWebApplication** Windows PowerShell cmdlet and apply customizations.
- In the SharePoint 2013 farm, restore the SharePoint Server 2010 databases.

Correct Answer:

Answer Area

In the SharePoint 2013 farm, restore the SharePoint Server 2010 databases.

Run the **Mount-SPContentDatabase** Windows PowerShell cmdlet.

In Central Administration, attach the content database.

Run the **Test-SPContentDatabase** Windows PowerShell cmdlet.

Run the **Move-SPWebApplication** Windows PowerShell cmdlet and apply customizations.

QUESTION 6

The application log in the Windows Event Viewer shows object caching errors. You resolve the errors by modifying a web application in the farm.

After you resolve the errors, users are unable to access sites in the web application.

You need to restore user access to the sites.

On the Manage Web Applications page, which option should you configure? (To answer, select the appropriate option in the answer area.)

Hot Area:

Security

- Authentication Providers
- Self-Service Site Creation
- Blocked File Types
- User Permissions
- Web Part Security

Policy

- User Policy
- Anonymous Policy
- Permission Policy

Correct Answer:

QUESTION 7

You are customizing search results in a SharePoint Server 2013 server farm.

You need to create a webpage that users can use to search Knowledge Base articles stored in an external Microsoft SQL Server database. Searches performed from the new page must not display

content from other sources.

What should you do?

- A. Create a page by using the (Welcome Page) Search results page layout. Configure a content type hub.
- B. Create a page by using the (Welcome Page) Search box page layout. Configure a content type hub.
- C. Create a page by using the (Welcome Page) Search box page layout. Create a result source that has a query transformation.
- D. Create a page by using the (Welcome Page) Search results page layout. Create a result source that has a query transformation.

Correct Answer: A

QUESTION 8

You need to choose the Performance Monitor counter to use to meet the new monitoring requirements for the production environment. Which performance counter should you use? (To answer, select the appropriate counter in the answer area.)

Hot Area:

SharePoint Publishing Cache

- Publishing cache flushes / second
- Publishing cache hit count
- Publishing cache hit ratio
- Publishing cache hits / sec
- Publishing cache miss count
- Publishing cache misses / sec
- Total number of cache compactions

Correct Answer:

SharePoint Publishing Cache

- Publishing cache flushes / second
- Publishing cache hit count
- Publishing cache hit ratio
- Publishing cache hits / sec
- Publishing cache miss count
- Publishing cache misses / sec
- Total number of cache compactions

QUESTION 9

You have a SharePoint farm.

You need to configure Active Directory Federation Services (AD FS).

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Configure AD FS with the web application as a relying party.
- Configure web applications to use claims-based authentication that use AD FS as the trusted identity provider.
- Configure SharePoint: 2013 to trust AD FS as a relying party.
- Configure AD FS with the web application as an identity provider.
- Configure SharePoint: 2013 to trust AD FS as an identity provider.

Answer Area

Correct Answer:

Actions

- Configure AD FS with the web application as a relying party.
- Configure SharePoint: 2013 to trust AD FS as a relying party.
- Configure AD FS with the web application as an identity provider.

Answer Area

- Configure AD FS with the web application as a relying party.
- Configure SharePoint 2013 to trust AD FS as an identity provider.
- Configure web applications to use claims-based authentication that use AD FS as the trusted identity provider.

QUESTION 10

You need to configure Search to support resource coordinators.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Sign in to Central Administration as the Search service application administrator. Configure the service application settings.	
Configure the Type to include People Search Results .	
Configure the Type to include SharePoint Search Results .	
Sign in as the site collection administrator. Configure Site Settings in the Publishing site collection.	
Add a new results source.	

Correct Answer:

Answer Area

Sign in to Central Administration as the Search service application administrator. Configure the service application settings.

Add a new results source.

Configure the **Type** to include **SharePoint Search Results**.

Sign in as the site collection administrator. Configure Site Settings in the Publishing site collection.

Configure the **Type** to include **People Search Results**.

QUESTION 11

You have a SharePoint Server 2013 server farm.

You need to implement a site mailbox for a site.

Which link should you use from Site Contents? (To answer, select the appropriate link in the answer area.)

Hot Area:

Answer Area

Site Contents

Lists, Libraries, and other Apps

SITE WORKFLOWS

QUESTION 12

Site collections must not use Alternate Access Mappings to manage URLs. You need to build a web application that uses claims-based authentication. What should you do first?

- A. In Central Administration, create a SharePoint Web Application by using the host header main.contoso.com on port 443.
- B. In Central Administration, create a SharePoint Web Application by using a blank host header on port 443.
- C. Run the following Windows PowerShell command:

```
New-SPSite -Url 'https://main.contoso.com' -Name 'Portal' -OwnerAlias 'contoso\administrator' -language 1033 -Template 'STS#0'
```

- D. Run the following Windows PowerShell command:

```
New-SPSite -Url 'https://main.contoso.com' -Name 'Portal' -OwnerAlias 'contoso\administrator' -port 80 -language 1033 -Template 'STS#0' -HostHeaderWebApplication 'http://<servername>'
```

- E. Run the following Windows PowerShell command:

```
New-SPWebApplication -Url 'https://main.contoso.com' -Name 'Contoso' -port 443 -ApplicationPool SharePointPool -DatabaseName 'WebContentDatabase'
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D
- E. Option E

Correct Answer: D

Explanation: Path-based site collections use Alternate Access Mappings. We must use Host-named site collections.

For Host-named site collections we must use Windows PowerShell commands to manage URLs (Set-SPSiteURL, Remove-SPSiteURL, Get-SPSiteURL). To create a host-named site collection we use the Windows PowerShell New-SPSite

cmdlet with the -HostHeaderWebApplication parameter.

```
Example: New-SPSite '\\http://portal.contoso.com\' -HostHeaderWebApplication '\\http://\' -Name '\\Portal\' -Description '\\Customer root\' -OwnerAlias '\\contoso\administrator\' -language 1033 -Template '\\STS#0\'
```

Reference: Host-named site collection architecture and deployment (SharePoint 2013)
