QUESTION 2

You need to recommend a solution for enabling licensing reports based on the compliance requirements.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

A. From the Assets and Compliance workspace of the Configuration Manager console, import license data in the CSV format.

- B. From the Administration workspace of the Configuration Manager console, modify the Default Client Settings.
- C. From the Assets and Compliance workspace of the Configuration Manager console, edit the inventory classes.
- D. From the Administration workspace of the Configuration Manager console, modify CCS3.
- E. From the Assets and Compliance workspace of the Configuration Manager console, import license data in the XML format.

Correct Answer: AD

QUESTION 3

You need to create a configuration item that will evaluate the compliance of the Configuration Manager client cache size. Which settings should you configure? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Configuration item data settings:

Registry value	<input type="checkbox"/>
Script	<input type="checkbox"/>
WQL query	<input type="checkbox"/>

Configuration item data type:

Boolean	<input type="checkbox"/>
String	<input type="checkbox"/>

Configuration item compliance rule type:

Existential	<input type="checkbox"/>
Value	<input type="checkbox"/>

Correct Answer:

Answer Area

Configuration item data settings:

Registry value	<input type="checkbox"/>
Script	<input checked="" type="checkbox"/>
WQL query	<input type="checkbox"/>

Configuration item data type:

Boolean	<input type="checkbox"/>
String	<input checked="" type="checkbox"/>

Configuration item compliance rule type:

Existential	<input type="checkbox"/>
Value	<input checked="" type="checkbox"/>

**QUESTION 4**

Your network contains one Active Directory domain. The domain contains a deployment of Microsoft System Center 2012 R2 Configuration Manager.

You need to update the Configuration Manager catalog from the information in System Center Online.

Which site system role should you add?

- A. Application Catalog web service point
- B. Asset intelligence synchronization point
- C. Application Catalog website point
- D. Windows Intune connector

Correct Answer: B

QUESTION 5

You need to configure the folder redirection policies to meet the technical requirement of Customer2. Which three actions should you perform? Each correct answer presents part of the solution.

- A. Enable user data and profiles for compliance settings.
- B. Create a baseline.
- C. Create a deployment to Collection2.
- D. Create a user data and profiles configuration item.
- E. Create a Group Policy object (GPO).
- F. Create a deployment to Collection1.

Correct Answer: ACD

QUESTION 6

You need to resolve the Windows update issue. What should you do?

- A. Modify the Group Policy objects (GPOs) in Active Directory.
- B. Synchronize software updates from Configuration Manager.

- C. Create an automatic deployment rule.
- D. Add distribution points to each branch office.

Correct Answer: D

QUESTION 7

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All client computers have the Configuration Manager client installed.

You have two collections. One collection contains all of the client computers that connect to the network remotely by using a VPN connection. The other collection contains all of the servers.

You have a server named WSUS1 that has the Windows Server Update Services (WSUS)

server role installed. WSUS1 and Configuration Manager are integrated.

You need to deploy update types to meet the following requirements:

Correct Answer: C

QUESTION 8

You need to provide a solution to meet the technical requirements of Baseline1.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Create a new collection from the baseline deployment.
- B. Modify the configuration item properties.
- C. Create a collection that has a limiting collection.
- D. Modify the collection properties.

Correct Answer: B

<https://technet.microsoft.com/en-gb/library/gg712331.aspx>

QUESTION 9

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager that contains the objects shown in the following table.

Object name	Type
Object1	Inventoried software
Object2	Configuration item
Object3	Configuration baseline
Object4	Antimalware policy
Object5	Software update

You are creating a new configuration baseline.

You need to identify which objects you can use as evaluation conditions within the new configuration baseline.

Which three objects should you identify? Each correct answer presents part of the solution.

- A. Object1
- B. Object2
- C. Object3
- D. Object4
- E. Object5

Correct Answer: BCE

QUESTION 10

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager.

You need to ensure that you can view the client site assignment status messages of all clients by using Configuration Manager, even if the management point is unavailable.

Which site system role should the clients use?

- A. an out of band service point
- B. a reporting services point
- C. a System Health Validator point
- D. a fallback status point

Correct Answer: D

QUESTION 11

You deploy an application named App1 to all of the users in your company.

You need to change a registry value for App1 for the users in three of the company's departments. Each department will have a different registry value. The solution must remediate any changes to the registry value.

What should you use?

- A. three applications
- B. three packages
- C. one configuration baseline and three configuration items
- D. three configuration baselines and three configuration items

Correct Answer: D

QUESTION 12

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All site system roles are deployed. All client computers have the Configuration Manager client installed.

An application named App1 is deployed to all of the client computers. Your organization licenses App1 annually from the application vendor. The licenses are based on the number of App1 installations that exist in the organization at the end of the fiscal year.

You need to identify on which computers App1 is not being used.

What should you create first?

- A. a configuration baseline
- B. an automatic deployment rule
- C. a software category
- D. a software metering rule

Correct Answer: D
