QUESTION 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You install Windows 10 on several devices.

You need to add a trusted root certificate to the devices. You must achieve the goal without reinstalling Windows 10.

What should you do?

A. Mount the Install.wim file.

B. Mount the Boot.wim file.

C. Modify the Winpeshl.ini file.

D. Create an answer file.

E. Modify the Windows.ini file.

F. Create a provisioning package.

G. Load a catalog file (.clg).

H. Create a cabinet file (.cab).

Correct Answer: F

QUESTION 2

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You are building a new image of Windows 10.

You have several pictures that you plan to make available as desktop backgrounds.

You copy the installation media for Windows 10 to Computer1.

You need to ensure that the Windows 10 image contains the desktop backgrounds.

What should you do first?

A. Mount the Install.wim file.

B. Mount the Boot.wim file.

C. Modify the Winpeshl.ini file.

D. Create an answer file.

E. Modify the Windows.ini file.

F. Create a provisioning package.

G. Load a catalog file (.clg).

H. Create a cabinet file (.cab).

Correct Answer: A

QUESTION 3

You plan to create an image of Windows 10 that contains a push-button reset solution. The solution will have custom settings for each edition of Windows 10.

You need to prepare the push-button reset solution.

What should you include in the solution?

A. an unattended file and a bare metal recovery configuration

B. an unattended file and extensibility scripts

C. extensibility scripts and system restore points

D. a bare metal recovery configuration and Scanstate packages

Correct Answer: B

References: https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-a-script-to-push-button-reset-features

QUESTION 4

You deploy an image of Windows 10.

From audit mode, you install several applications for a customer, and then you run sysprep.exe/oobe/quit.

You need to identify whether any errors occurred when you ran sysprep.exe.

Which folder contains the log files?

A. %WINDIR%\Logs

B. %WINDIR%\System32\LogFiles

C. %WINDIR%\Panther\

D. %WINDIR%\System32\Sysprep\Panther

Correct Answer: C

QUESTION 5

You have an image of Windows 10.

You discover that files in the Windows Component Store are corrupt.

You need to repair the files in the component store.

What should you do?

A. Run dism.exe and specify the /Cleanup-Image and the /RestoreHealth parameters.

B. Run dism.exe and specify the /Cleanup-Image and the /StartComponentCleanup parameters.

C. Run sfc.exe and specify the /scanfile and /offwindir parameters.

D. Run sfc.exe and specify the /scannow parameter.

Correct Answer: A

QUESTION 6

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You run dism.exe/Get-Packages, and then you pipe the output to dism.exe/Add-Package.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

using-dism

QUESTION 7

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You create the working directories for the customization of a Windows Preinstallation Environment (Windows PE) image.

You need to modify the regional setting used in Windows PE.

What should you do first?

A. Mount the Install.wim file.

B. Mount the Boot.wim file.

C. Modify the Winpeshl.ini file.

D. Create an answer file.

E. Modify the Windows.ini file.

F. Create a provisioning package.

G. Load a catalog file (.clg).

H. Create a cabinet file (.cab).

Correct Answer: B

QUESTION 8

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You copy all the updates to the same folder. You run dism.exe/Add-Package once and specify the /PackagePath parameter once.
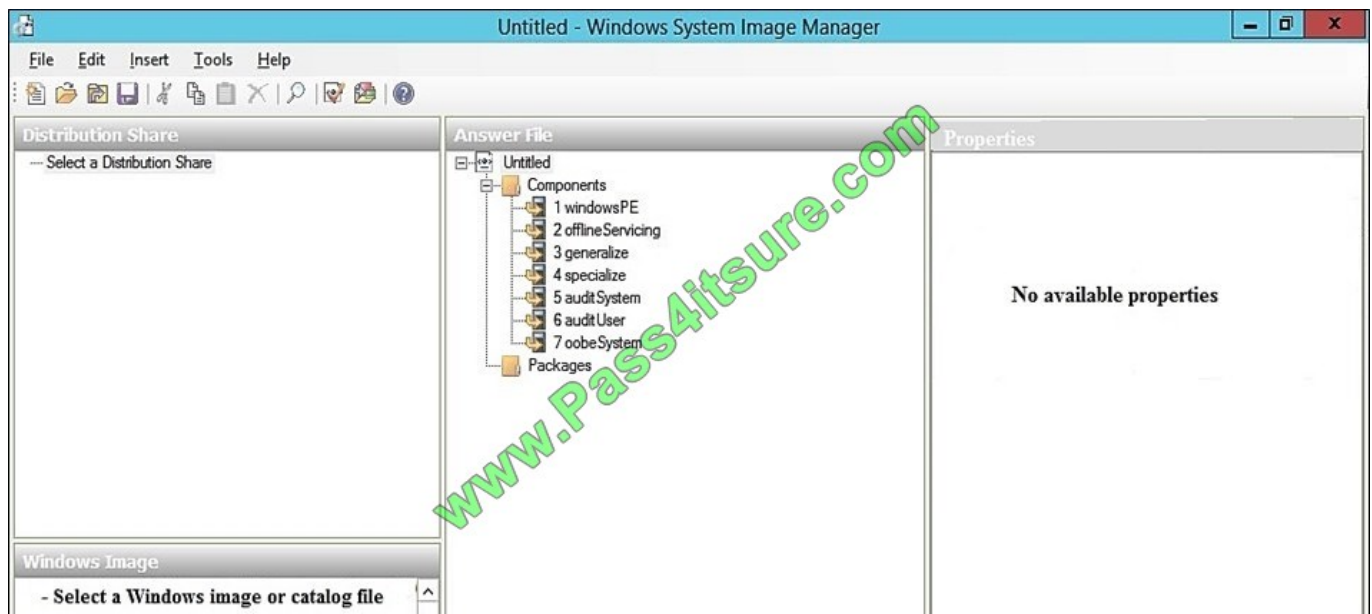

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 9

You have a computer named Computer1 that runs Windows 10.

On Computer1, you have a DVD that contains the installation source files of Windows 10 Pro.

You open Windows System Image Manager as shown in the exhibit. (Click the Exhibit tab.)

You need to configure the answer file for Windows 10 by using Windows System Image Manager (Windows SIM). What should you do first?

A. Copy the installation files for Windows 10 to a hard disk.

B. Create a catalog file (.clg).

C. Select a distribution share.

D. Select an image of Windows 10.

Correct Answer: A

QUESTION 10

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution.

You need to test whether push-button reset works as expected.

Solution: From Windows 10, you open the Settings app, you click Update and security, and then you click Recovery. From Reset this PC, you click Get Started.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

References: https://support.microsoft.com/en-us/help/12415/windows-10-recovery-options https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/push-button-reset-overview

QUESTION 11

You have a computer that runs Windows 10. The computer starts in UEFI mode and has a 64-bit processor.

You insert a USB key in the computer. The USB key has a drive letter of F.

You need to ensure that you can start the computer by using Windows Preinstallation Environment (Windows PE) from the USB key.

Which two commands should you run? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. makewinpemedia.cmd /UFD C:\WinPe F:

B. makewinpemedia.cmd /ISO C:\WinPe F:

C. copype.cmd amd64 C:\WinPe

D. dism.exe /Export-Image /SourceImageFile:C:\WinPE\boot.wim/SourceIndex:1/DestinationImageFile:F:\boot.wim

E. copype.cmd x86 C:\WinPe

Correct Answer: AE

References: https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usb-bootable-drive

QUESTION 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create an EFI system partition of 150 MB that uses the NTFS file system.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
