QUESTION 1

Your company has an intranet site that is hosted on Microsoft SharePoint Online. The site is currently available in English only. You need to ensure that users can navigate the intranet site in English and in Spanish. What should you do?

A. Change the Regional settings of the intranet site.

B. Activate the SharePoint Server Enterprise Site Collection features.

C. Change the Language settings of the intranet site.

D. Change the Working Languages in the term store.

Correct Answer: D

QUESTION 2

You need to determine which Office 365 users have active Microsoft Exchange Online mailboxes. Which two actions can you perform to achieve this goal? (Each correct answer presents a complete solution. Choose two.)

A. View the mailboxes in the Users and Groups section of the Exchange Control Panel.

B. Run the Show-Mailbox Windows PowerShell cmdlet.

C. View the users in the User Management section of the Office 365 Portal.

D. Run the Get-Mailbox Windows PowerShell cmdlet.

Correct Answer: AD

QUESTION 3

Your company has an intranet site that is hosted on Microsoft SharePoint Online. The site is currently displaying documents and list items in the incorrect time zone (UTC -08:00). You need to ensure that the site displays content in the Eastern Time zone (UTC -05:00). What should you do?

A. Modify the language settings of the intranet site.

B. In the SharePoint Online Administration Center, modify the time zone of the site collection.

C. Modify the regional settings of the intranet site.

D. Activate the SharePoint Server Enterprise Site Collection features.

Correct Answer: C

Specify regional settings

Microsoft Office SharePoint Server 2007 provides a seamless, culture-specific experience that enables site owners to create sites in a specific language and configure the regional settings that are appropriate for those sites.

These settings include:

Time Zone: Controls the time zone for the Web site.

QUESTION 4

You use the Microsoft Directory Synchronization Tool (DirSync) to populate your company\\'s Office 365 directory. You add a user to the local Active Directory Domain Services (AD DS) directory. The user is not shown in the Microsoft Online Services Management Console. You need to force a manual synchronization of the directories. Which Windows PowerShell cmdlet should you run?

A. New-Mailbox

B. Connect-MsolService

C. Start-OnlineCoexistenceSync

D. Test-Connection

Correct Answer: C

QUESTION 5

You need to select an Office 365 subscription that provides Microsoft Exchange Online email, Microsoft SharePoint Online, Microsoft Lync Online, Microsoft Office Web Apps, and a hosted website for your business. Which three plans meet

the requirements? (Each correct answer presents a complete solution.

Choose three.)

A. Office 365 EI Plan

B. Office 365 PI Plan

C. Office 365 E3 Plan

D. Office 365 P2 Plan

E. Office 365 E4 Plan

F. Office 365 E2 Plan

Correct Answer: CEF

QUESTION 6

Your company has a Microsoft SharePoint Online environment that does not currently have a public website. You need to create a public website by using SharePoint Online. What should you do?

A. From the Site Collections area of the SharePoint Online Administration Center, create a public website.

B. Create a site collection. In the site settings of the root site, activate the Public Website feature.

C. Create a site collection. In the Site Collections Administration Center of the root site, activate the Public Website feature.

D. Create a site collection. In the site settings of the root site of the site collection, under Site Collection Administration, select the Public Website option.

Correct Answer: A

QUESTION 7

Your company has an Office 365 E3 Plan subscription with 60 licenses. You import and license all 60 users in your Office 365 directory. How much Microsoft SharePoint Online storage space does the subscription provide?

A. 30 GB

B. 40 GB

C. 60 GB

D. 70 GB

Correct Answer: B

QUESTION 8

Your company has an Office 365 subscription for midsize businesses and enterprises. You need to create a user account. Which Windows PowerShell cmdlet should you use?

A. Get-MsolUser

B. Set-MsolUser

C. Add MsolUser

D. New MsolUser

Correct Answer: D

QUESTION 9

Your company has a Microsoft SharePoint Online environment. The Department field of each user profile contains the department of the user. The most recent version of Microsoft Office is installed on all client computers. The Marketing department has a Shared Documents library named MarketingDocs. You need to ensure that only users in the Marketing department can select the MarketingDocs library from the Locations list that appears when the user selects the Save to SharePoint command in Microsoft Word. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. From the Configure Personalization Site page, create a link.

B. Create a SharePoint group for the marketing department.

C. Create an Audience for the Marketing department.

D. From the Published links to Office client applications page, create a link.

Correct Answer: AD

QUESTION 10

Your company has an on-premise deployment of Microsoft Exchange Server 2003. Users access their mailboxes by using RPC over HTTP and Exchange ActiveSync. You purchase an Office 365 subscription. From the Office 365 Portal, you create and verify the accepted domain of the company. From the Exchange Control Panel, you attempt to migrate the mailboxes to Microsoft Exchange Online. An error message indicates that the remote server is unavailable. You need to identify the problem.

Which tool should you use?

A. Microsoft Remote Connectivity Analyzer

B. Office 365 Deployment Readiness Tool

C. Microsoft Online Services Directory Synchronization Configuration Wizard

D. Exchange Server Deployment Assistant

Correct Answer: A

QUESTION 11

You need to generate a list of all Office 365 users who have NOT accessed their mailboxes during the past 90 days. Which Windows PowerShell cmdlet should you run?

A. Get-MsolContact

B. Get-LogonStatistics
