

Exam : 920-221

Title : Nortel Converged Campus
ERS Installation &
Configuration

Version : Demo

www.Pass4itSure.com

1. You are using the Nortel Network Command Line Interface (NNCLI) to modify a VLAN or a port. Which NNCLI command mode are you using?

- A. Global Configuration Mode
- B. Interface Configuration Mode
- C. Privileged EXEC Mode
- D. Router Configuration Mode

Answer: B

2. If you do not know the IP address of an Ethernet Routing Switch 5510, how can you upload code?

- A. Use Telnet.
- B. Use Console Access.
- C. Use the Web browser.
- D. Use the Java Device Manager.

Answer: B

3. A customer would like to configure an IP address for an existing VLAN on an Ethernet Routing Switch 5510. You use the following Command Line Interface (CLI) command sequence: From the initial CLI prompt, enter privilege mode, enter config mode, enter config-if mode for the VLAN interface. Enter the command, "ip address". What information do you enter next?

- A. Enter the appropriate IP address of the backup CPU.
- B. Enter the appropriate IP address and subnet mask in dotted decimal notation.
- C. Enter the appropriate IP address for the out-of-band management port.
- D. Enter the appropriate IP address for the in-band management port.

Answer: B

4. You can use the User Interface (UI) button on the Ethernet Routing Switch 5500 to temporarily reset a switch to the default IP address. Which two statements are true about the default IP address set via the UI button? (Choose two.)

- A. The default IP address overrides the IP address currently in use by the switch stack.
- B. The default IP address overwrites the onfigured IP address settings that are set via console, Command Line Interface (CLI), or Web.
- C. The default IP address changes if there is a change in the state of the switch, such as if the switch joins or leaves a stack.
- D. The default IP address is saved in NVRAM across resets of the switch/stack.

Answer: A C

5. Which two statements are true about Power over Ethernet (PoE)? (Choose two.)

- A. PoE requires a significant increase in power capacity.
- B. PoE enables cooling systems and load-sharing power supplies.
- C. PoE provides increased power, resiliency, and redundancy at low cost.
- D. PoE is used to power IP telephones, Web cameras, and access points.

Answer: A D
