**QUESTION 1**

A Windows Forms application contains three forms named BaseForm, ChildFormA, and ChildFormB. BaseForm contains a protected button named btnHello whose background color is gray. ChildFormA and ChildFormB both inherit from BaseForm.

You set the background color of btnHello on ChildFormA to red.

On which form or forms will the background color of btnHello be changed to red?

- A. ChildFormA only
- B. ChildFormA and ChildFormB
- C. ChildFormB only
- D. ChildFormA, ChildFormB, and BaseForm
- E. ChildFormA and BaseForm

Correct Answer: A

QUESTION 2

A Windows Forms application uses forms that are inherited from a base form. A new control must appear on all of the forms.

You add the new control to one of the inherited forms, and you rebuild the application. You discover that none of the other inherited forms contain the new control.

You need to ensure that the new control appears on all of the forms.

What should you do?

- A. Add the control to the Visual Studio Toolbox.
- B. Move the control to the base form, and rebuild the application.
- C. Rebuild all forms except the form that has the new control.
- D. Rebuild the form that has the new control, and rebuild the application.

Correct Answer: B

QUESTION 3

You plan to create a desktop application that has a graphical user interface (GUI).

You need to ensure that the application can be converted to a browser-based application with the fewest possible changes to the UI implementation.

Which Visual Studio template should you use?

- A. ASP.NET Web Application
- B. Windows Presentation Foundation (WPF) Application
- C. Console Application
- D. Windows Forms Application

Correct Answer: B

QUESTION 4

You write a Windows Services application.

The installer must register the application with the:

- A. Service Management Console.
- B. Service Process Installer.
- C. Service Control Manager.
- D. System Resource Manager.

Correct Answer: C

QUESTION 5

Which control uses complex data binding?

- A. ListBox
- B. DateTimePicker
- C. CheckBox
- D. TextBox

Correct Answer: A

QUESTION 6

A Windows form contains a DataGridView control that is bound to a DataSet. You need to programmatically add a new row to the DataGridView control. What should you do?

- A. Add a new row to the DataSet.
- B. Add a new row to the DataGridView control by using the Rows property.

C. Increment the RowCount property of the DataGridView control.

D. Increment the Rows.Count property of the DataSet.

Correct Answer: A

QUESTION 7

A Windows Forms form contains button controls. The functionality of the buttons must be available to users who prefer keyboard shortcuts.

Which character should you use in the Button control's Text property to provide this functionality?

A. @ (at symbol)

B. \$ (dollar sign)

C. and (ampersand)

D. # (pound sign)

Correct Answer: C

QUESTION 8

You are preparing a Setup project for a Windows Forms application.

You need to remove any changes made by the installation process if the user cancels the installation.

To accomplish this goal, you should write code in the event handler of the:

A. Commit event.

B. Rollback event.

C. Uninstall event.

D. Install event.

Correct Answer: B

QUESTION 9

A Windows Forms application is written in VB.NET.

You need to keep all existing code and add new features in C#.

What should you do?

A. Add a directory to the existing VB.NET project. Place the new C# files in this directory.

- B. Add the new C# code to the existing VB.NET source files.
- C. Add the new C# files to the existing VB.NET project.
- D. Add a C# project to the existing solution. Place the new C# files in this project.

Correct Answer: D

QUESTION 10

You create a Windows Service and set its startup type to Automatic.

At which point during Windows startup does the service start running?

- A. After Windows starts and after a user logs on
- B. After Windows starts
- C. After the BIOS loads the network drivers but before Windows starts
- D. After the BIOS loads all the drivers but before Windows starts

Correct Answer: B

QUESTION 11

A Visual Studio solution contains several Windows Forms projects and a Class Library project. The Windows Forms projects reference the Class Library project.

You need to publish the application by using ClickOnce deployment.

What should you do?

- A. Publish the solution as a whole without the Class Library project.
- B. Publish each Windows Forms project and the Class Library project separately.
- C. Publish each Windows Forms project separately, but do not publish the Class Library project.
- D. Publish the solution as a whole.

Correct Answer: C

QUESTION 12

You set a form's `StartPosition` property to `Manual` and set its `Location` property to `20, 20`. Where will the form be located on the user's screen?

- A. 20 pixels from the bottom and 20 pixels from the left
- B. 20 pixels from the top and 20 pixels from the left

C. 20 pixels from the bottom and 20 pixels from the right

D. 20 pixels from the top and 20 pixels from the right

Correct Answer: B
