### QUESTION 1

How does Boot Camp Assistant prepare a Mac OS X v10.6 computer for Windows installation?

- A. It reformats the target hard disk as a FAT32 volume, then modifies the hard disk to act as a Windows startup disk.
- B. It does not modify the target hard disk, but creates a disk image at the root of the target hard disk, and formats the disk image as a Windows volume.
- C. It initializes the target hard disk with two partitions, and formats one partition as a Mac OS Extended (Journaled) volume, and the other as a Windows volume.
- D. It resizes an existing partition on the target hard disk as needed, then creates a new partition on the hard disk, and formats the new partition as a Windows volume.

Correct Answer: D

---

### QUESTION 2

When you enable File Sharing in the Sharing preferences on a Mac OS X v10.6 computer, which protocol(s) is (are) enabled by default?

- A. AFP
- B. NFS
- C. SMB
- D. FTP
- E. AFP and FTP
- F. AFP and SMB
- G. FTP and SMB
- H. NFS and FTP

Correct Answer: A

---

### QUESTION 3

When upgrading the operating system on a computer to Mac OS v10.6, which four steps should you perform prior to running the Installer? Choose four.

- A. Backup vital files.
- B. Disable the root account.
- C. Check for firmware updates.

- D. Verify application compatibility.
- E. Document configuration settings.
- F. Enable ownership on mounted volumes.
- G. Disable ownership on mounted volumes.
- H. Unmount all mounted external volumes.

Correct Answer: ACDE

---

#### QUESTION 4

A new, 5 MB file named text.rtf was backed up by Time Machine once, but the file has been edited since then, and is now 6 MB. It is about to be backed up by Time Machine again. How will Time Machine handle this backup?

- A. Time Machine will copy the 6 MB file to the backup drive, and delete the original backup copy of the file from the backup drive.
- B. Time Machine will copy the 6 MB file to the backup drive, and keep both the new backup file and the original backup file on the backup drive.
- C. Time Machine will identify the 1 MB of file changes, copy those changes to a new file on the backup drive, and keep both the new backup file and the original backup file.
- D. Time Machine will identify the 1 MB of file changes, copy those changes to a new file on the backup drive, then create a 500 KB parity file, and keep all three files: the two new files representing the 1 MB of file changes, and the original backup file.

Correct Answer: B

---

#### QUESTION 5

Which two statements are true of file and folder permissions in the Finder in Mac OS X v10.6? Choose two.

- A. A user with Write only permissions to a folder can delete any file in that folder.
- B. A user with Write only permissions to a folder can rename any file in that folder.
- C. A user with Write only permissions to a folder cannot view any files in that folder.
- D. A user with Read only permissions to a folder cannot view any files in that folder.
- E. A user with Read only permissions to a folder cannot rename any files in that folder.

Correct Answer: CE

---

#### QUESTION 6

Which task is NOT performed by loginwindow when a user logs in?

- A. Launch Dock and Finder.
- B. Launch Login Items specified in Accounts preferences.
- C. Scan for new peripheral devices and register them with Launch Services.
- D. Configure input device and system settings according to System Preferences.

Correct Answer: C

---

#### QUESTION 7

Which process will let you start up a computer in target disk mode?

- A. Start up the computer from the Mac OS X Install DVD, then choose Target Disk Mode from the Utilities menu.
- B. Hold down the S key on the keyboard while the computer starts up, then type the command `reboot -target`.
- C. Hold down the T key on the keyboard while the computer starts up, until a FireWire icon appears on the screen.
- D. Hold down the Option key on the keyboard while the computer starts up, until a dialog appears, then select Target Disk Mode from the dialog.

Correct Answer: C

---

#### QUESTION 8

The function of journaling in the Mac OS Extended (Journaled) file system is to \_\_\_\_\_.

- A. provide a backup of user files
- B. provide support for Spotlight searches
- C. protect volume integrity in cases of unexpected shutdown
- D. provide support for resource forks, extended attributes, and metadata

Correct Answer: C

---

#### QUESTION 9

You have restarted a computer from the Mac OS X v10.6 Install DVD in order to repair its hard disk. Which procedure below will let you perform the repair?

- A. Advance to the volume selection pane in the Installer, select the hard disk, and click Verify and Repair.
- B. Quit the Installer, then open Disk Utility from the `/Applications/Utilities/` folder on the DVD, select the hard disk, and click Repair Disk.
- C. Without quitting the Installer, open Disk Utility from the Utilities menu in the Installer application, select the hard disk, and click Repair Disk.

D. Quit the Installer, then open Disk Utility from the /Applications/Utilities/ folder on the computer's hard disk, select the hard disk, and click Repair Disk.

Correct Answer: C

---
