QUESTION 1

A company's entertainment website contains the following features:

A homepage with a consistent toolbar and listing of articles by category

A community page

Individual article pages containing a combination of text and images.

End users are able to create new forums, browse article by category, log in using a modal dialog box, and search from the toolbar.

How many AEM templates should the architect create?

- A. Ten
- B. Seven
- C. Five
- D. Three

Correct Answer: B

QUESTION 2

A non-profit organization plans to migrate to AEM. The organization uses a content management system with a relational database to store content and HTML forms to input content. Currently, business users must upload images as part of a form element that will be rendered on a page.

During the discovery sessions, business users express major concern with this authoring experience.

Which AEM feature should be described to the business users to reduce their concern?

- A. Authors can search for images and drop them on to pages in edit mode.
- B. AEM can output content in multiple formats (html, json).
- C. Authors can edit the content in place on the pages in edit mode.
- D. AEM can store content in supported RDBMS.

Correct Answer: D

QUESTION 3

A brick-and-mortar company purchases AEM.

Which application component is NOT well suited to be implemented in AEM?

- A. Store finder as AEM does NOT integrate with Google Maps.
- B. Store finder as AEM does NOT support geospatial search.
- C. Training video site section as AEM is unable to record user interactions.
- D. Training video site section as AEM does NOT bundle a video player.

Correct Answer: C

QUESTION 4

An architect is helping a multi-national news company design its project and determine requirements. The functionality requires several external feeds to display breaking news and live scores for major sporting events.

What is the most important factor for the architect to consider when meeting the performance requirements?

- A. The authentication requirements from each feed
- B. The number of JCR nodes each feed item requires
- C. The import frequency of the feed
- D. The payload type in which the feeds are returned

Correct Answer: A

QUESTION 5

Which two business requirements can be achieved by using OOTB AEM components? (Choose two.)

- A. A store details page displays an embedded map from Bing Maps.
- B. A sidebar contains a list of PDF files tagged with the "Product Data Sheet" tag.
- C. An article can be composed of an arbitrary combination of text, videos, and images.
- D. An article has a Facebook Like button; the number of clicks are stored in Adobe Social.

Correct Answer: CD

QUESTION 6

An architect is integrating a customer's AEM authoring system to authenticate with the company's Active Directory (AD) directory service. The architect must configure the LoginModule used by the identity provider.

Which Java security framework should the architect use?

- A. OWASP
- B. PAM

C. JAAS

D. Apache Shiro

Correct Answer: C

QUESTION 7

A large telecommunications company is leveraging the capability of AEM to integrate with SAML.

The architect must configure the SAML Authentication Handler. By default the SAML 2.0 Authentication handler is disabled.

Which two OSGi configuration properties must the architect set to enable the SAML 2.0 Authentication handler? (Choose two.)

A. The public certificate of the identity provider

B. The identity provider POST URL

C. The Service Provide Entity ID

D. The Service Ranking

Correct Answer: BC

QUESTION 8

A customer is introducing blog and forum functionality. To handle the moderation of data between the publisher and author instances, the customer needs to add reverse replication agents. The architect must create documentation based on a proposed solution architecture.

Which two architectural diagrams should the architect modify?

A. Logical

B. Physical

C. Conceptual

D. Data Flow

Correct Answer: AD

QUESTION 9

A client acquires multiple companies that operate autonomously and want to use AEM to host all of their websites.

How should the author users be grouped?

- A. Company-specific groups for workflow approval steps and general groups for content editing
- B. General groups for workflow approval and content editing
- C. Separate company-specific groups for both content editing and workflow approval steps
- D. Default AEM groups for workflow approval and company-specific groups for content editing

Correct Answer: C

QUESTION 10

Which type of architecture diagram should an architect use to present application code and content flow?

- A. Deployment
- B. Physical
- C. Data Flow
- D. Logical

Correct Answer: C

QUESTION 11

A large retail company has integrated AEM into its commerce stack. Logged in users can submit product ratings through the ratings" component. To ensure initial ratings do not skew results too far positive or negative, the company plans to show the tallied ratings only after a minimum number of submissions has occurred.

For which reason must the ratings component be extended to meet these requirements?

- A. Only the average rating is available via API
- B. The Tally/Rating Component API does not provide the number of user responses.
- C. The author must be able to provide the minimum number of votes for display.
- D. A custom rating service must be created to support this functionality.

Correct Answer: B

QUESTION 12

An architect must optimize the performance of the home page of a client's website. The client requires that search engines index the home page content.

The home page must NOT be cacheable because it displays a list of recently shared articles.

This list is generated by using an AEM component that performs a real-time look-up to an API from a third-party company.

Which solution should the architect choose?

- A. Replace the real-time API access with a scheduled job inside AEM that runs every 15 minutes to update the data and trigger a dispatcher cache flush
- B. Replace the AEM component's server-side logic with a JavaScript widget provided by the third p
- C. Cache the home page using the Dispatcher and implement a cron job to remove the cached file every 15 minutes
- D. Cache the rest of the home page and deliver the recently shared article list using AJAX

Correct Answer: A

QUESTION 13

Which three tasks can business users perform using AEM OOTB functionality/components/plugins? (Choose three.)

- A. Provide ratings for a particular page
- B. Present and sort order status client side
- C. Customize content using Twitter profile data
- D. Display a list of completed workflow items

Correct Answer: ACD

QUESTION 14

Which three requirements, can be met by using AEM OOTB features/components? (Choose three.)

- A. Use Google + to personalize user content
- B. Hide pages within content hierarchy
- C. Index PDF documents uploaded to AEM repository
- D. Enter additional data while approving workflow content

Correct Answer: BCD

QUESTION 15

A client installs AEM using an application server. The architect must implement HTTPS in the client's QA environment with an application server as well.

Which three AEM components/configurations must be changed relative to the QA environment? (Choose three.)

- A. Add secure flag to dispatcher configuration file
- B. Install the SSL version of the dispatcher

C. Configure the CQ servlet engine HTTP service to use SSL using the company certificate

D. Configure replication agents to use SSL

Correct Answer: ACD
