QUESTION 1

In which cloud deployment model do enterprises retain complete control over the construction and delivery of all cloud services?

- A. hybrid cloud
- B. private cloud
- C. community cloud
- D. public shared cloud

Correct Answer: B

QUESTION 2

What are two key infrastructure components for data migration when planning a move to cloud? (Choose two.)

- A. storage
- B. network
- C. monitoring
- D. data mining
- E. high availability

Correct Answer: AB

QUESTION 3

A company is building a cloud environment to host applications.

What kind of inter- component coupling is ideal for a cloud-based application?

- A. Tight coupling is ideal because intra-application messaging is difficult in a cloud environment.
- B. Tight coupling is ideal because the company can easily scale the entire application up or down.
- C. The degree of coupling is not a factor when considering an application's affinity for a cloud environment.
- D. Loose coupling is ideal because components of the application can independently scale based on need and impact on performance.

Correct Answer: D

**QUESTION 4**

An enterprise has migrated one of its Web-based database application to Amazon EC2 cloud with the database hosted in the cloud.

Which action will help save ongoing costs for this enterprise application?

- A. The database is configured to use 200 MB less memory.
- B. The database is configured to generate uncompressed backups.
- C. The database is configured to drop temporary tables and indexes.
- D. The database is configured to use compression for the databases.

Correct Answer: D

QUESTION 5

What is a function of image management?

- A. monitoring
- B. request services
- C. billing and metering
- D. discover and deploy

Correct Answer: D

QUESTION 6

What is the scope of the service management capabilities as part of IBM Cloud Computing Management Platform Reference Architecture?

- A. public cloud only
- B. hybrid cloud only
- C. private cloud only
- D. private, hybrid, and public cloud

Correct Answer: D

QUESTION 7

Which area of the current IT enterprise availability and redundancy components must be addressed in order to move to

a cloud operational model?

- A. server capacity to service capacity
- B. workload availability to service availability
- C. application availability to workload availability
- D. server mean time between failures (MTBF) to service MTBF

Correct Answer: C

QUESTION 8

A company is transitioning many of their applications to a public cloud.

Which statement is true concerning their application data and the public cloud?

- A. They can move application data to the public cloud without further analysis.
- B. They cannot move application data to the public cloud because the files require too much space.
- C. They must modify all their applications because data access mechanisms in the public cloud are different.
- D. They should carefully analyze legal and regulatory concerns for application data before moving data to the public cloud.

Correct Answer: D

QUESTION 9

Public cloud infrastructure should be architected to accommodate which business risk?

- A. over subscription of customers
- B. legal and regulatory non-compliance
- C. over achieving service levels committed to customers
- D. increased investment in surplus network infrastructure

Correct Answer: B

QUESTION 10

Which is an IBM product that is used to manage storage capacity for a cloud solution?

- A. IBM Tivoli Service Request Manager

- B. IBM Tivoli Storage Productivity Center
- C. IBM ILOG Optimization Decision Manager
- D. IBM System Storage SAN Volume Controller

Correct Answer: B

QUESTION 11

Four different business units would like to utilize a shared services environment.

What is a key characteristic of a shared services environment?

- A. all application workloads utilize the same infrastructure
- B. all servers, workloads, and storage systems run on the same network
- C. the business units agree to coordinate their systems downtime activities
- D. the business units must have the same service level agreements in place

Correct Answer: A

QUESTION 12

Which IBM offering enables companies to rapidly connect on-premise applications with applications running in a public cloud?

- A. IBM Tivoli Cast Iron Cloud2
- B. IBM Tivoli Cast Iron Connection Manager
- C. IBM WebSphere Cast Iron Connection Manager
- D. IBM WebSphere DataPower Cast Iron Appliance

Correct Answer: D
