### QUESTION 1

A company requires all requests to be viewed by a member of the Executive Leadership and a member of its Legal Department. These reviews must be executed independently of each other. Once these reviews are completed, an email is sent out to all relevant process stakeholders informing them of the outcome of the reviews. Review the following business process definition.

How should a BPM application developer model the remainder of the subprocess, "Conduct Request Reviews?"

- A. Draw two sequence flow lines from Reviews Start to Conduct Executive Review and Conduct Legal Review. From each review activity, draw a sequence flow to Reviews End.
- B. Draw a sequence flow line from Reviews Start to Conduct Executive Review. From Conduct Executive Review, draw a sequence flow line to Conduct Legal Review. From Conduct Legal Review, draw a sequence flow line to Reviews End.

C. Draw a sequence flow line from Reviews Start to a Parallel Gateway. From the Parallel Gateway, draw two sequence flow lines to Conduct Executive Review and to Conduct Legal Review. From each review activity, draw a sequence flow line to Reviews End.

D. Draw a sequence flow line from Reviews Start to an Exclusive Gateway. From the Exclusive Gateway, draw two sequence flow lines to Conduct Executive Review and to Conduct Legal Review. From each review activity, draw a sequence flow to Reviews End.

Correct Answer: C

---

## QUESTION 2

A BPM application developer is creating an "Order Management" process that needs to wait for inventory readiness status from a separate inventory application. If the received status is "ready", the process can resume its regular flow. If the received status is "not-available", the process needs to start a "Re-stocking" process flow. The application developer has exposed an inbound web service in IBM BPM to be called by the external inventory application.

How can the BPM application developer configure the process to allow the response from the incoming web service request to direct the flow of the process? Associate the inbound web service with:

- A. a service with a JavaScript invocation of an Ad-Hoc event in the "Re-stocking" process flow.
- B. a service with a JavaScript invocation of an Ad-Hoc event in the "Order Management" process.
- C. a service that invokes an Undercover Agent, and a receive message event on the "Re-stocking" process flow that is associated to the same Undercover Agent.
- D. a service that invokes an Undercover Agent, and a receive message event on the "Order Management" process that is associated to the same Undercover Agent.

Correct Answer: D

---

## QUESTION 3

A BPM application developer has completed the development of a high profile process application and is now ready to deploy the solution into the test environment. The application developer has been told to allow one peer developer and the technical team lead to review and approve the work before it can be installed onto the test server. The application developer's manager has requested that the process of gathering these approvals be automated for auditing purposes.

What steps must the BPM application developer take in order to fulfill this requirement? The BPM application developer must:

- A. enable governance on the high profile process and use wsadmin to install the process.
- B. create a business process definition, inside of the high profile process application, to implement the approvals governance process.
- C. ask a user with the administrative authority to create a System Governance toolkit dependency to create a process

application that will be used for governance.

D. ensure that there is a task in the governance process that will allow a designated person to install the process, using Process Center, after all approvals have been received.

Correct Answer: C

---

#### QUESTION 4

A BPM application developer has been asked to estimate the number of user story points needed to implement an activity within IBM Business Process Manager V8.0 based upon the following user story: As a Call Center Supervisor, I need to review the Call Center Representative's notes for any call that lasts longer than 15 minutes. Assuming this is the only user story that pertains to this activity, how must the BPM application developer proceed?

- A. Find out which system stores the call notes before providing an estimate.
- B. Build a prototype of the activity, so that an accurate estimate can be provided.
- C. Provide a user story estimate that is greater than 2, because there are two roles involved
- D. Ask a user story owner to revise the user story, so that it includes the business value statement.

Correct Answer: D

---

#### QUESTION 5

A BPM application developer has created three process applications containing multiple business processes to automate a customer's order fulfillment activities. During development, a single tracking group was used in the three process applications to support a reporting solution that will track data across all three process applications.

How will the BPM application developer retrieve data from the Performance Data Warehouse while completing the implementation of the reporting solution? The data will be retrieved from:

- A. a single database view, with an ID to distinguish each implementation.
- B. a single database view, with a single ID to identify the collection of implementations.
- C. three database views, with an ID to distinguish each implementation.
- D. three database views, with a single ID to identify the collection of implementations.

Correct Answer: A

---

#### QUESTION 6

A BPM application developer is asked to include the process instance id, in the subject of an activity, so that it appears when the task is shown in a user's portal inbox. To accomplish this type of display, which one of these Javascript API calls does the BPM application developer need to include?

- A. tw.system.step.id
- B. tw.process.instanceId
- C. tw.system.process.instanceId
- D. tw.system.local.process.instanceId

Correct Answer: C

---

#### QUESTION 7

The business owner of a purchasing process has requested a report that displays the total time of three activities.

What should the BPM application developer use to send the data to the Performance Data Warehouse to create this report?

- A. A Timing Interval
- B. A Service Level Agreement
- C. Exposed Process Variables
- D. Shared Business Objects

Correct Answer: A

---

#### QUESTION 8

After the completion of several tasks, an order shipping process for electronic devices must wait to receive a message from a separate inventory replenishment process before proceeding to an activity for order delivery.

How should the BPM application developer implement the receive message event?

- A. As an Ad-hoc event.
- B. As a message start event.
- C. As an intermediate event in the process flow.
- D. As an intermediate event attached to the order delivery activity.

Correct Answer: C

---

**QUESTION 9**

A BPM application developer is asked by a system administrator to fix an issue with a failed process instance in a on-line runtime environment. The system administrator has determined that the problem is with a variable called `tw.local.carSelection`. The value of `tw.local.carSelection` is incorrect and needs to be set to "Truck". Assuming the BPM application developer has been granted all security privileges required, which of the following approaches are valid to fix the problem? (Choose two)

A. Using the Inspector tab via the Process Designer:

1.

Select the failed process

2.

Use the execution evaluator to change the data

3.

Select the '\\Resume\\' button

B. Using the Inspector tab via the Process Designer:

1.

Select the failed process

2.

Select the variables tab

3.

Edit the data

4.

Select the '\\Resume\\' button

C. Using the Designer tab via the Process Designer:

1.

Open the process

2.

Change the data

3.

Deploy a new snapshot

4.

Select "Migrate Existing Instances"

D. Using a database client connected to the BPM Process DB:

1.

Open the LSW\_BPD\_INSTANCE\_DATA table

2.

Identify the failed process ID

3.

Execute SQL to update the data

E. Using the Process Inspector tab via the Process Admin Console:

1.

Select the failed process

2.

Select the failed task

3.

Open the data tree

4.

Edit the data

5.

Select '\\Retry Failed Steps\\'

Correct Answer: AE

---

## QUESTION 10

A BPM application developer has to build code that allows users to follow business process definition instances from a human service.

What is the REST API syntax that the BPM application developer needs to use?

A. PUT /rest/bpm/wle/v1/social/instance/{instanceId}/following

B. GET /rest/bpm/wle/v1/social/instance/{instanceId}/following

C. POST /rest/bpm/wle/v1/social/instance/{instanceId}/following

D. DELETE /rest/bpm/wle/v1/social/instance/{instanceId}/following

Correct Answer: C

---

### QUESTION 11

An organization has built a service called "Employee Management Workflow", which was developed in IBM Business Process Manager V8.0. This service is required to be accessed by several external enterprise applications as a SOAP web service.

How can BPM application developer meet this requirement?

A. 1. Create a Web Service

2. Add the operation, associating it with the service

B. 1. Create an Undercover Agent (UCA)

2. Attach the service

C. 1. Create an External Implementation

2.

Drag the "Web Service integration" from the palette to the canvas

3.

Define the WSDL

4.

Add the operation

D. 1. Create an Integration Service

2.

Drag the "Web Service integration" from the palette to the canvas

3.

Define the WSDL

4.

Add the operation

Correct Answer: A

---

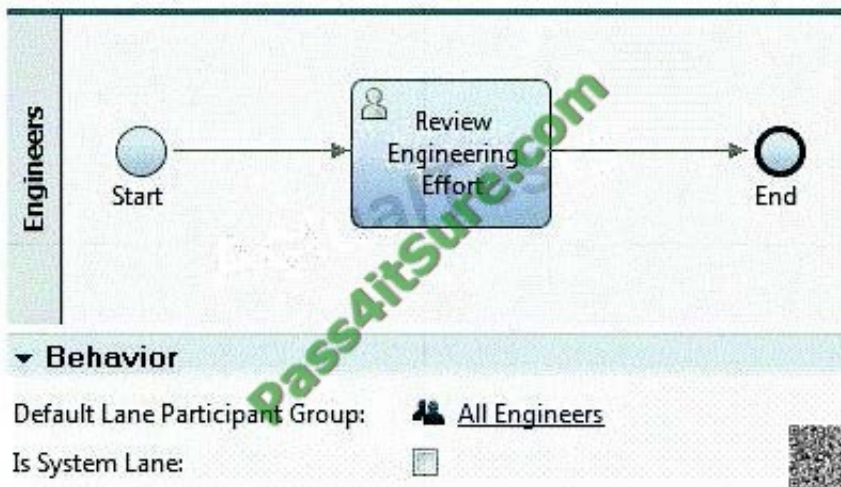

## QUESTION 12

An engineering company has requested a process to handle its engineering reviews. The company breaks up its engineering reviews in the following ways:

- Complex engineering efforts are handled by the Senior Engineers participant group (PG)
- Moderate engineering efforts are handled by the Associate Engineers PG ?Simple engineering efforts are handled by the Apprentice Engineers PG
- All other engineering efforts are handled by the All Engineers PG

Review the business process diagram (BPD) below and the specified behavior of the Engineers Swimlane.

The Review Engineering Effort activity's assignment is based on a routing policy. The routing policy is dictated by the value of the BPD's local variable engineeringEffort. Which one of the following routing conditions for the Review Engineering Effort activity will satisfy the company's request?

A.

	engineeringEffort	Adv	Assign To
1	Complex	<input type="checkbox"/>	Senior Engineers
2	Moderate	<input type="checkbox"/>	Associate Engineers
3	Simple	<input type="checkbox"/>	Apprentice Engineers

B.

	engineeringEffort	Adv	Assign To
1	"Complex"	<input type="checkbox"/>	Senior Engineers
2	"Moderate"	<input type="checkbox"/>	Associate Engineers
3	"Simple"	<input type="checkbox"/>	Apprentice Engineers

C.

	engineeringEffort	Adv	Assign To
1	Complex	<input type="checkbox"/>	Senior Engineers
2	Moderate	<input type="checkbox"/>	Associate Engineers
3	Simple	<input type="checkbox"/>	Apprentice Engineers
4	!= (Complex    Moderate    Simple)	<input type="checkbox"/>	All Engineers

D.

	engineeringEffort	Adv	Assign To
1	"Complex"	<input type="checkbox"/>	Senior Engineers
2	"Moderate"	<input type="checkbox"/>	Associate Engineers
3	"Simple"	<input type="checkbox"/>	Apprentice Engineers
4	!= ("Complex"    "Moderate"    "Simple")	<input type="checkbox"/>	All Engineers

A. B. C. D.

Correct Answer: B
