QUESTION NO: 1

Digital identities for logging onto SaaS solutions should be issued by all the following EXCEPT:

- A. A third-party identity provider.
- B. The customer organization.
- C. The SaaS provider.
- D. A user.

Answer: D

Explanation:

QUESTION NO: 2

Why is it important to consider the cloud ecosystem when developing applications?

- A. Cloud providers will do application development.
- B. The development process needs to change.
- C. The role of the IT department will change.
- D. This can speed up the development process.

Answer: D

Explanation:

QUESTION NO: 3

Which of the following actions should a company take if a cloud computing provider ceases to uphold their contract?

- A. Consult the company's exit plan.
- B. Move the company data to the backup provider that was selected earlier.
- C. Re-host all critical applications on the company's internal servers.
- D. Evaluate the company's strategic options for an alternative provider

Answer: A

Explanation:

QUESTION NO: 4

Which of the following consequences does IT outsourcing and cloud computing have in common?

- A. Involvement of external staff
- B. Improved flexibility
- C. Reduced expense
- D. Shorter time to market

Answer: A

Explanation:

QUESTION NO: 5

Which of the following is an important new skill for an IT organization to develop in the context of cloud computing?

- A. Provisioning services
- B. Incident management
- C. Technology upgrade monitoring
- D. Security and risk management

Answer: A

Explanation:

QUESTION NO: 6

Which of the following is the function of orchestration services?

- A. Assemble functional requirements for application development
- B. Configure application clusters with Web services
- C. Enable and disable load balancers
- D. Manage the starting and stopping of application server clusters

Answer: D

Explanation:

QUESTION NO: 7

Which of the following is a reason for business users to be interested in cloud computing?

- A. Desire for vendor lock-in reduction
- B. Desire for improved security
- C. Desire for improved user experience
- D. Desire for reducing compliance issues

Answer: C

Explanation:

QUESTION NO: 8

Which of the following is important to standardize?

- A. Information standards and applications
- B. User names and hardware providers
- C. Virtual machine images and applications
- D. Virtual machine images and identity information standards

Answer: D

Explanation:

QUESTION NO: 9

Cloud computing _____ capital cost to variable cost.

- A. increases
- B. reduces
- C. shifts
- D. equates

Answer: C

Explanation:

QUESTION NO: 10

Privacy is the right of _____ to selectively disclose information about _____ and restrict the further use of that information by any party.

- A. companies, others

- B. companies, themselves
- C. individuals, others
- D. individuals, themselves

Answer: D

Explanation:

QUESTION NO: 11

Which of the following IT processes is likely to become more important due to the adoption of cloud computing?

- A. Capacity management
- B. Troubleshooting management
- C. Project management
- D. Request fulfillment management

Answer: A

Explanation:

QUESTION NO: 12

Which of the following is the primary way to access PaaS?

- A. Web services
- B. Websites
- C. Web hosting providers
- D. Data integrations

Answer: A

Explanation:

QUESTION NO: 13

How can an organization successfully implement a SaaS strategy?

- A. Manage the risks associated with bringing in external providers
- B. Continuously execute performance analytics to monitor providers

- C. Open up internal databases with Web service access for easier access
- D. Standardize on a limited set of virtual machines to increase security

Answer: A

Explanation:

QUESTION NO: 14

Which of the following is the MOST important service management consequence of elastic capacity?

- A. The need for better application development
- B. The need for better security management
- C. The need for good performance monitoring and management
- D. The need to improve the fulfillment and provisioning process

Answer: C

Explanation:

QUESTION NO: 15

Which of the following is a typical concern for business and IT leaders when adopting cloud computing?

- A. Current cost structure of IT
- B. Quality of web-based user interfaces
- C. Security of current IT solutions
- D. Technical maintenance of current IT assets

Answer: C

Explanation:

QUESTION NO: 16

Which of the following does IT outsourcing and cloud computing typically have in common?

- A. Pay as you go agreements
- B. Short-term financial commitment

- C. Tailor-made applications based on client needs
- D. Vendor lock-in potential

Answer: D

Explanation:

QUESTION NO: 17

Which of the following does the server virtualization layer do?

- A. It allows the underlying physical server hardware to be shared
- B. It allows the virtual machines to be dependent on each other
- C. It allows the virtual machines to be load balanced
- D. It prohibits the use of virtual machines by unauthorized users

Answer: A

Explanation:

QUESTION NO: 18

Which of the following are essential steps to take when creating a virtual server?

- A. Select a machine image to run, select an application set to run, select security credentials.
- B. Select a machine image to run, select an application set to run, select the size of the virtual machine.
- C. Select a machine image to run, select security credentials, select the size of the virtual machine.
- D. Select an application set to run, select security credentials, select the size of the virtual machine.

Answer: C

Explanation:

QUESTION NO: 19

Which of the following technologies are related to Web services?

- A. HTML, IDM, JSON

- B. HTML, IDM, XML
- C. HTML, JSON, XML
- D. DM, JSON, XML

Answer: C

Explanation:

QUESTION NO: 20

Web hosting is a service that enables customers to deploy a website quickly. This is an example of:

- A. IaaS.
- B. SaaS
- C. PaaS.
- D. On-demand software.
- E. None of the above.

Answer: C

Explanation:

QUESTION NO: 21

Which of the following describes the amount of data that can be sent across a link in a given time?

- A. Network bandwidth
- B. Network QoS
- C. Network latency
- D. Network speed

Answer: A

Explanation:

QUESTION NO: 22

How can the internal IT department successfully react to cloud computing?

- A. By becoming an external cloud provider

- B. By becoming an internal cloud provider
- C. By outsourcing all IT services
- D. By solely focusing on security issues

Answer: B

Explanation:

QUESTION NO: 23

Which of the following is a business reason for IT outsourcing and cloud computing?

- A. Improving cost structure
- B. Improving customer satisfaction
- C. Increasing control over IT systems
- D. Decrease of security issues

Answer: A

Explanation:

QUESTION NO: 24

Which of the following applications is MOST suitable for a cloud computing pilot?

- A. Applications that are currently expensive to maintain because of interconnections
- B. Applications that are easy to migrate and have some business value
- C. Applications with high risk and little business value
- D. Legacy applications that are coupled to specific hardware and systems software

Answer: B

Explanation:

QUESTION NO: 25

Which of the following is an important skill for an organization wanting to adopt an IaaS strategy?

- A. Visualization technology
- B. Application service procurement
- C. Customer relations

D. Security and risk management

Answer: A

Explanation:

QUESTION NO: 26

Which of the following is an example of a cloud-related security risk?

- A. Losing network connectivity
- B. Not having enough software licenses
- C. Not knowing what the cloud provider will charge
- D. Storing customer data at a provider

Answer: D

Explanation:

QUESTION NO: 27

Why do management tools introduce a risk?

- A. The management tools present a vendor lock-in
- B. The management tools are indispensable above a specific scale of operation
- C. The migration may not be successful
- D. Too many software licenses are needed

Answer: A

Explanation:

QUESTION NO: 28

How do demand management processes change with the introduction of SaaS?

- A. New vendors have to be accommodated
- B. Users can procure SaaS solutions themselves
- C. The number of virtual machines can fluctuate with demand
- D. Maintenance will become easier

Answer: B

Explanation:

QUESTION NO: 29

Why does hardware and operating system maintenance take less effort with SaaS?

- A. Maintenance becomes irrelevant
- B. Cloud provider takes care of it
- C. Hardware vendor takes care of it
- D. Operating system vendor takes care of it

Answer: B

Explanation:

QUESTION NO: 30

Which of the following is a unique characteristic of virtualization?

- A. Security features
- B. Federated identities
- C. Shared hardware
- D. Sourcing challenges

Answer: C

Explanation:

QUESTION NO: 31

Which of the following is the MOST complex security provisioning problem in a cloud environment?

- A. Handling credit cards for purchasing cloud services
- B. Keeping track of cloud provider performance
- C. Managing users and their rights across multiple providers
- D. Software assets that are introduced and can expire

Answer: C

Explanation:

QUESTION NO: 32

How can an organization successfully implement a PaaS strategy?

- A. Open up internal databases with Web service access.
- B. Take inventory of the application portfolio and select external suppliers
- C. Standardize on a limited set of virtual machines.
- D. Continuously execute performance analytics to monitor providers

Answer: A

Explanation:

QUESTION NO: 33

Eucalyptus is open-source software for quickly provisioning virtual servers. This is an example of:

- A. PaaS
- B. IaaS
- C. SaaS.
- D. On-demand software.
- E. None of the above.

Answer: E

Explanation:

QUESTION NO: 34

Why do business users prefer to deal with cloud providers directly, instead of via the IT department?

- A. It reduces financial risks to the business
- B. The IT department does not accommodate variable costs
- C. They can better measure the provider's quality
- D. They can use their own payment options

Answer: B

Explanation:

QUESTION NO: 35

Why does request fulfillment become more complicated in a cloud environment?

- A. All processes must become automated.
- B. Processes must be redesigned with the user experience in mind.
- C. The IT service team must be expanded.
- D. Users should be aware of the benefits before changes to the process are incorporated

Answer: B

Explanation:

QUESTION NO: 36

Private clouds are operated solely for _____ organization(s)

- A. governmental
- B. specific
- C. for-profit
- D. multiple

Answer: B

Explanation:

QUESTION NO: 37

Why are traditional chargeback systems not compatible with cloud computing?

- A. Cloud computing is low cost and does not accommodate charge back fees
- B. Cloud computing can be more expensive than in-house capacity
- C. Licensing models can become outdated quickly
- D. Resources that are used can fluctuate throughout the budget cycle

Answer: D

Explanation:

QUESTION NO: 38

How does cloud computing improve business flexibility?

- A. Easier access by users outside of the organization
- B. Faster deployment of applications
- C. Rapidly growing and shrinking capacity
- D. All of the above are correct

Answer: D

Explanation:

QUESTION NO: 39

How can cloud-related financial risks be managed?

- A. Credit cards must be used for handling transactions
- B. Eliminating legacy IT systems
- C. Making sure that cloud assets are generating revenue
- D. Renegotiating license agreements

Answer: C

Explanation:

QUESTION NO: 40

Which represents the MOST important business continuity risk?

- A. Incomplete Service Level Agreements (SLAs)
- B. Network connectivity interruption
- C. Privacy laws
- D. Providers going out of business

Answer: D

Explanation:

QUESTION NO: 41

Which of the following is a private SaaS?

- A. An application for external use only, on company-owned assets.
- B. An application for external use only, on public cloud-based systems.
- C. An application for internal use only, on company-owned assets.
- D. An application for internal use only, on public cloud-based systems.

Answer: C

Explanation:

QUESTION NO: 42

Which of the following roles can the IT department play in the selection process of cloud computing providers?

- A. Help understand and explain the application lifecycle
- B. Help understand performance parameters
- C. Help understand provider quality
- D. All of the above are correct

Answer: D

Explanation:

QUESTION NO: 43

Cloud computing has the greatest benefit for which of the following user populations?

- A. User populations which steadily increase in size.
- B. User populations that vary and are unpredictable.
- C. User populations that are of fixed size.
- D. User populations that vary in size on a seasonal basis.

Answer: B

Explanation:

QUESTION NO: 44

Google Apps is a set of online applications allowing users to create and share documents and spreadsheets. This is an example of:

- A. PaaS
- B. SaaS.
- C. IaaS.
- D. None of the above.

Answer: B

Explanation:

QUESTION NO: 45

Which of the following is a limitation of owning servers?

- A. Inability to deploy new services quickly
- B. Inability to rapidly change to a different technology
- C. Capital tied up in hardware that might become obsolete
- D. Additional resources must be hired to maintain each server

Answer: C

Explanation:

QUESTION NO: 46

Which of the following is a benefit of cloud computing?

- A. Cloud computing delivers IT capabilities that scale with demand.
- B. Cloud computing delivers a wide range of services that are easily accessible to users
- C. Cloud computing delivers IT capacity on demand.
- D. Cloud computing negates the need for a procurement department.

Answer: A

Explanation:

QUESTION NO: 47

Why is standardization of data formats important?

- A. It facilitates movement from one provider to another.
- B. It helps encourage innovation.
- C. It leads to a more mature stage of the cloud computing landscape
- D. It leads to more efficient machine utilization.

Answer: A

Explanation:

QUESTION NO: 48

Synchronization of updates is _____ than replicating data across locations because it gives better assurance that data is always _____ everywhere.

- A. better, secure
- B. better, up to date
- C. worse, secure
- D. worse, up to date

Answer: B

Explanation:

QUESTION NO: 49

Which of the following risk results if cloud computing providers limit their Service Level Agreement (SLA) liabilities?

- A. Compliance risk
- B. Legal risk
- C. Privacy risk
- D. Security risk

Answer: B

Explanation:

QUESTION NO: 50

Amazon Elastic Cloud Computing (EC2) is a facility for quickly providing virtual servers. This is an example of:

- A. SaaS
- B. IaaS
- C. PaaS
- D. QoS.

Answer: B

Explanation:

QUESTION NO: 51

Which of the following is an essential step in the start-up process of a virtual server?

- A. Identify the location of the physical machine
- B. Select identity providers
- C. Select security credentials
- D. Select the application set that will run on it

Answer: C

Explanation:

QUESTION NO: 52

Which of the following is MOST typically accessed through Web services?

- A. IaaS
- B. PaaS
- C. SaaS
- D. None of the above

Answer: B

Explanation:

QUESTION NO: 53

Which of the following is the MOST important impact of cloud computing on managing service

levels?

- A. Capacity can be more elastic.
- B. External providers can deny a capacity increase when required.
- C. Providers measure their own performance.
- D. Scarcity of resources can occur if not monitored

Answer: A

Explanation:

QUESTION NO: 54

Which of the following do business accountants prefer with respect to the cost of cloud computing?

- A. Budgets to be fixed
- B. Costs that are related to number of users
- C. Costs that are related to profits
- D. Costs to be fixed

Answer: C

Explanation:

QUESTION NO: 55

Why can cloud computing be a challenge in relation to compliance risks (e.g. compliance with the Sarbanes-Oxley Act)?

- A. It makes it harder to know where a company's important assets are.
- B. It is harder to limit the provider's liability in the contract.
- C. It makes it harder to know where a company's physical assets are.
- D. Industry regulations change more frequently to ensure compliance.

Answer: A

Explanation:

QUESTION NO: 56

levels? Twitter is a service that allows users to exchange short text messages. This is an example of:

- A. PaaS
- B. SaaS
- C. IaaS
- D. QoS

Answer: B

Explanation:

QUESTION NO: 57

Which of the following can cause user response times to deteriorate?

- A. High CPU usage and low network bandwidth
- B. High network latency and high volume of data stored
- C. Low network bandwidth and high network latency
- D. Low network bandwidth and high volume of data stored

Answer: B

Explanation:

QUESTION NO: 58

Which of the following is a characteristic of cloud computing?

- A. Cloud computing is typically based on open Internet technology
- B. Cloud computing is typically based on web technology
- C. Cloud computing is cheaper compared to virtualization
- D. Cloud computing typically uses XML or JSON technologies

Answer: A

Explanation:

QUESTION NO: 59

Which of the following assets have risks related to a cloud provider going out of business?

- A. Data stored at the provider
- B. Cloud management tools housed at the provider
- C. Investment in servers at the provider
- D. Machine capacity at the provider

Answer: A

Explanation:

QUESTION NO: 60

Which of the following is included in a compliance audit?

- A. Analyzing chargeback agreements
- B. Analyzing cloud provider Service Level Agreements (SLAs)
- C. Analyzing identity management and access controls
- D. Analyzing the provider release calendar

Answer: C

Explanation:

QUESTION NO: 61

How does cloud computing influence service operations?

- A. Cloud computing is more cost effective
- B. The provisioning of servers and services is quicker or ceases to be an issue
- C. The provisioning of servers and services can be much slower
- D. The security level will increase

Answer: B

Explanation:

QUESTION NO: 62

Cloud computing brings new challenges to _____ management, because traditional licensing models do not fit well with scalable resources.

- A. commercial

- B. financial
- C. legal
- D. service

Answer: B

Explanation:

QUESTION NO: 63

Which of the following is indicated by a high number of variations of different virtual servers?

- A. Lack of an automated provisioning process of the virtual machines
- B. Lack of automation of virtual machine image manufacturing
- C. Lack of manpower to monitor the virtual machines
- D. Lack of physical servers to accommodate the different virtual servers

Answer: B

Explanation:

QUESTION NO: 64

Cloud computing is priced according to _____ or has _____, rather than having upfront costs.

- A. recurring subscription, a yearly contract
- B. a yearly contract, usage-based charges
- C. recurring subscription, usage-based charges
- D. number of users, a yearly contract

Answer: C

Explanation:

QUESTION NO: 65

Which change in the security processes is introduced by cloud computing?

- A. Increased security of accessing credit card information
- B. Regulations need to be updated more frequently

- C. Storing passwords in the Configuration Management Database (CMDB)
- D. Working with multiple providers of user identities

Answer: D

Explanation:

QUESTION NO: 66

Who is responsible for granting access to a user in federated identity management?

- A. Identity provider
- B. Relying party
- C. SaaS provider
- D. User

Answer: B

Explanation:

QUESTION NO: 67

Which of the following is a definition of virtualization?

- A. Virtualization is a method to organize servers in a more efficient manner to double the number of accessible users
- B. Virtualization is a set of techniques for hiding software resources behind hardware abstractions.
- C. Virtualization is a set of techniques for hiding hardware resources behind software abstractions.
- D. Virtualization is a method to structure data in a more efficient manner with less cost to the user.

Answer: C

Explanation:

QUESTION NO: 68

Which of the following confidentiality risks is introduced by cloud computing?

- A. Company information can be transmitted electronically
- B. Digitizing information makes it easier to copy
- C. Government regulations require data to be disclosed
- D. Having files stored on the servers of a cloud provider

Answer: D

Explanation:

QUESTION NO: 69

Which of the following processes needs to be changed to better handle Change Management in the cloud?

- A. Financial chargeback
- B. Security management
- C. Hardware maintenance
- D. Software distribution

Answer: D

Explanation:

QUESTION NO: 70

In which of the following ways do IT outsourcing and cloud computing differ?

- A. Cloud computing services are typically much more scalable.
- B. Cloud computing is much cheaper.
- C. Hardware and software assets are typically customizable.
- D. IT outsourcing promotes innovation.

Answer: A

Explanation:

QUESTION NO: 71

How can an organization successfully implement an IaaS strategy?

- A. Standardize on a limited set of virtual machines

- B. Continuously execute performance analytics
- C. Open up internal databases with Web service access
- D. Take inventory of the application portfolio and select external suppliers

Answer: A

Explanation:

QUESTION NO: 72

Which of the following are strategic exit options?

- A. Change the system applications
- B. Change the cloud provider
- C. Re-host in-house
- D. All of the above

Answer: C

Explanation:

QUESTION NO: 73

All of the following are important design decisions when deploying SaaS EXCEPT:

- A. How existing company data is integrated in or migrated to the application.
- B. How the application will be integrated with other applications.
- C. The number of users that will access the application simultaneously
- D. Where or by whom will digital identities be issued for logging on to the application.

Answer: C

Explanation:

QUESTION NO: 74

Which of the following application types is suitable for a cloud computing pilot?

- A. Desktop productivity applications
- B. Marginal applications
- C. Mission-critical applications

D. Legacy applications

Answer: A

Explanation:

QUESTION NO: 75

A military facility is NOT able to fully embrace cloud computing because of which of the following?

- A. High degree of confidentiality and operational assurance
- B. The associates cost and infrastructure needs
- C. Constantly changing and unpredictable workloads
- D. Constantly changing data and accessibility needs

Answer: A

Explanation:

QUESTION NO: 76

All of the following are availability risks that are introduced by cloud computing EXCEPT:

- A. Dependence on an external provider.
- B. Dependence on internal IT
- C. Increase in users who can change data.
- D. Network connectivity

Answer: C

Explanation:

QUESTION NO: 77

How does scalability work with cloud computing?

- A. Servers and storage can be added quickly.
- B. Servers and storage can be released quickly.
- C. Users can be added and removed quickly.
- D. All of the above is correct.

Answer: D

Explanation:

QUESTION NO: 78

Which of the following risks occurs when a cloud provider stops serving the company?

- A. Continuity risk
- B. Financial risk
- C. Legal risk
- D. Confidentiality risk

Answer: A

Explanation:

QUESTION NO: 79

Which of the following is a relevant component of the cloud ecosystem?

- A. Hypervisors
- B. Image factory
- C. Security procedures
- D. Trained IT staff

Answer: B

Explanation:

QUESTION NO: 80

Which of the following business benefits do cloud computing and IT outsourcing have in common?

- A. Clarity and budgeting ease of upfront costs
- B. Improvement of employee skills sets
- C. Reduction of capital expenditures
- D. Flexible contracts

Answer: C

Explanation:

QUESTION NO: 81

Which IT process is likely to take more effort with cloud computing?

- A. Hardware maintenance
- B. Installing operating system patches
- C. Performance monitoring
- D. Server maintenance

Answer: C

Explanation:

QUESTION NO: 82

Why does cloud computing shift capital cost to variable cost?

- A. Cloud computing is more cost-efficient
- B. IT assets are not owned by the customer
- C. Servers are better utilized
- D. Staff is no longer hired by the customer

Answer: B

Explanation:

QUESTION NO: 83

Which of the following is the risk when an IT department restricts itself to solely being an infrastructure provider?

- A. Business users will bypass the IT department
- B. Cloud providers will take over the role of the IT department
- C. Service providers will bypass the IT department
- D. All of the above are correct

Answer: A

Explanation:

QUESTION NO: 84

Which of the following cloud computing risks is compliance related?

- A. Access rights that are handled by a cloud provider
- B. Capacity management that is handled by a cloud provider
- C. Cross-charging policies that are handled by both clients
- D. Provider reputation

Answer: A

Explanation:

QUESTION NO: 85

Which of the following is the difference between cloud computing and IT outsourcing?

- A. The service levels of cloud computing are much better.
- B. IT outsourcing is not based on open standards.
- C. Contracts with cloud providers can be changed much quicker.
- D. Only IT outsourcing works with external staff.

Answer: C

Explanation:

QUESTION NO: 86

How can cloud computing help reduce integrity risks?

- A. Cloud computing makes it easier to have a backup available.
- B. Cloud computing makes it easier to monitor access and usage of data.
- C. Cloud computing makes it easier to give people access to data in the cloud.
- D. Cloud computing makes it easier to have redundancy capabilities.

Answer: A

Explanation:

QUESTION NO: 87

Which of the following is the business benefit of private PaaS?

- A. Improve the reuse of internal databases in an organization.
- B. Improve the speed of the internal development and deployment processes.
- C. Reduce cost and reliance on internal technical skills.
- D. Simplify interfaces for specific user groups.

Answer: B

Explanation:

New Questions

QUESTION NO: 88

In order for an organization to have a successful cloud implementation, which of the following must be true?

- A. The organization must perform and successfully complete a cloud readiness assessment.
- B. The organization must have used virtualization technology in the past.
- C. The organization must have an unlimited budget for allocation of cloud resources.
- D. The organization must have an in-house IT department.

Answer: A

Explanation:

QUESTION NO: 89

Which of the following correctly identifies a key difference between cloud computing and IT outsourcing?

- A. Typically, industry definitions state that cloud computing and IT outsourcing are synonymous terms with the same meaning.
- B. Cloud computing only works when there is satisfactory Internet connectivity whereas outsourcing requires dedicated WAN links.
- C. Cloud computing generally allows for on-demand utilization, whereas outsourcing is typically defined by contract terms.
- D. Cloud computing provides only external IT equipment to a company whereas outsourcing

involves external only resources managing internal company equipment.

Answer: C

Explanation:

QUESTION NO: 90

Which of the following is the BEST example of maintaining 'strategic flexibility'?

- A. Cloud provisioning models have a risk of not maintaining flexibility once services have been migrated.
- B. When choosing services to migrate into the cloud, there should be a focus on ensuring that future migration between different cloud providers can be facilitated.
- C. Cloud providers need to provide countermeasures to any consequences of not maintaining flexibility of services in a strategic manner.
- D. When choosing services to migrate into the cloud, it should be ensured that the cloud provider can change underlying hardware platforms in case the customer needs change.

Answer: B

Explanation:

QUESTION NO: 91

A company is adopting a public SaaS cloud based computing system to migrate a mission critical application. Which of the following capabilities will be MOST likely lost?

- A. Centralized management of user access to the application.
- B. Aversion of the software that will be accessed in the cloud.
- C. The ability to perform fine grained customizations to the software.
- D. The ability to access the application from the internal company network.

Answer: C
