**QUESTION 1**

Consider the typical objectives of testing. Which of the following metrics can be used to measure the effectiveness of the testing process in achieving one of those objectives?

- A. Average number of days between defect discovery and resolution
- B. Percentage of requirements covered
- C. Lines of code written per developer per day
- D. Percentage of test effort spent on regression testing

Correct Answer: B

QUESTION 2

Which of the following is a characteristic of good testing in any life cycle model?

- A. Analysis and design of tests begins as soon as development is completed.
- B. Some, but not all, development activities have corresponding test activities.
- C. Each test level has test objectives specific to that level.
- D. All document reviews involve the development team.

Correct Answer: C

QUESTION 3

Explain how the above mentioned report may differ from a report that you produce for the project manager, who is a test specialist. Select TWO items from the following options that can be used to report to the project manager and would not be included in a report to senior management.

- A. Show details on effort spent
- B. List of all outstanding defects with their priority and severity
- C. Give product risk status
- D. Show trend analysis
- E. State recommendations for release

Correct Answer: AB

QUESTION 4

Which aspect in the test estimate is the main risk in this project?

- A. Quality of the specification
- B. Availability of end-users
- C. The costs of hardware and tools
- D. Unknown input quality due to third party development

Correct Answer: D

QUESTION 5

You are considering involving users during test execution. In general, what is the main reason for involving users during test execution?

- A. They are a cheap resource
- B. They have good testing skills
- C. This can serve as a way to build their confidence in the system
- D. They have the ability to also focus on invalid test cases

Correct Answer: D

QUESTION 6

As part of the improvement program, the organization is also looking at tool support.

Which type of tool could be used to ensure higher quality of the code to be reviewed?

- A. Review tool
- B. Test execution tool
- C. Static analysis tool
- D. Test design tool

Correct Answer: C

QUESTION 7

Which of the following team roles would be most appropriate to enhance the team and why?

- A. A person with the ability to complete tasks
- B. A quality assurance officer
- C. A person with in-depth technical skills
- D. A person who brings new ideas to the team

Correct Answer: D

QUESTION 8

Identify the THREE types of formal peer reviews that can be recognized.

- A. Inspection
- B. Management review
- C. Walkthrough
- D. Audit
- E. Technical review
- F. Informal review
- G. Assessment

Correct Answer: ACE

QUESTION 9

Considerable attention will be given in this project to defining exit criteria and on reporting back on their status. Which combination of TWO exit criteria from the list would be best to use?

- I. Total number of defects found
- II. Percentage of test cases executed
- III. Total test effort planned versus total actual test effort spent

IV.

Defect trend (number of defects found per test run over time)

A.

(i) and (ii)

B.

(i) and (iv)

C.

(ii) and (iii)

D.

(ii) and (iv)

Correct Answer: D

QUESTION 10

What is the main reason why reviews are especially beneficial in the above-mentioned scenario?

A. They ensure a common understanding of the product.

B. They find defects early.

C. They enhance project communication.

D. They can be performed without exercising the code.

Correct Answer: D

QUESTION 11

Regarding the process described above, what is the most important recommendation you would make using IEEE 1044 as a guide?

A. No priority or severity assigned

B. Incident numbering is manual rather than automated

C. No mentioning of reproduceability

D. No classification on type of incident

Correct Answer: A

QUESTION 12

Relying only on the information provided in the scenario, select the TWO items and/or features for which sufficient information is available to proceed with test design.

- A. All supported credit cards
- B. Language localization
- C. Valid and invalid advances
- D. Usability
- E. Response time

Correct Answer: AC

QUESTION 13

In addition to risk, identify TWO other components of a testing strategy.

- A. The entry and exit criteria for each test phase
- B. Test training needs for the project resources
- C. The test design techniques to be used
- D. Test performance indicators
- E. The test schedule

Correct Answer: AC

QUESTION 14

Which of the following is NOT a typical key challenge for testing in a RAD based development approach?

- A. Re-usable test scripts for (automated) regression testing
- B. Project management and control
- C. No complete requirements specification

D. Time-boxing

Correct Answer: B

QUESTION 15
