**QUESTION 1**

Which of the following monitoring tools are designed to monitor AS Java-based SAP systems? (Choose two)

- A. Transaction ST02 (Tune Summary) in a central AS ABAP-based monitoring system
- B. SAP NetWeaver Administrator (NWA)
- C. Config tool
- D. Transaction RZ20 (CCMS Monitor Sets) in a central AS ABAP-based monitoring system

Correct Answer: BD

QUESTION 2

Which of the following statements is correct regarding online Oracle database backups?

- A. The database must be running in archivelog mode.
- B. The database does not write to online redo log files during online backups.
- C. Online database backups are not supported by Oracle.
- D. A complete online backup consists of tablespace data files and the control file, all of which are necessary for restoring the database to a consistent state.
- E. Users may only read data and may not enter data while the backup is running.

Correct Answer: A

QUESTION 3

When using the transaction SCU0 (Cross-System Viewer) and the transaction SM30 (Maintain Table Views) to compare clients, which of the following statements are correct? (Choose three.)

- A. Table content can be compared between SAP R/2 and SAP ECC Systems.
- B. Customizing data can be adjusted across clients using transaction SM30 (Maintain Table Views).
- C. Table content can be compared between different clients in different SAP Systems.
- D. Table content can be compared between different clients in the same SAP System.
- E. Table content can only be compared directly on the database level.

Correct Answer: BCD

QUESTION 4

Which statements are correct with regard to updating data in AS ABAP-based SAP systems? Note: There are 2 correct answers to this question?

- A. Only Update work processes can update table content.
- B. Dialog and background processes can update table content.
- C. "Update (UPD)" and "Update 2 (UP2)" work processes can update table content.
- D. Table content has to be updated via "Asynchronous Update"

Correct Answer: BC

QUESTION 5

During the installation of an SAP ECC 6.0 system, which of the following components can be installed in a separate installation procedure? (Choose two.)

- A. The central instance
- B. The database instance
- C. The message server

Correct Answer: AB

QUESTION 6

Which of the following statements regarding services provided by the Internet Communication Framework (ICF) in AS ABAP are true? Note: There are 2 correct answers to this question.

- A. ICF services can only be created by SAP. It is not possible for customers to create new ICF services.
- B. Business Server Pages (BSP) are accessed via ICF.
- C. ICF services replace the remote function call (RFC).
- D. ICF services provide HTTP-based access to selected functions within AS ABAP.

Correct Answer: BD

QUESTION 7

Your business requires data synchronization between one client (source client) in an AS ABAP- based SAP system (source system) and three different clients (target clients) in a second AS ABAP-based SAP system (target system).

How do you implement this requirement using RFC technology?

- A. Define three RFC connections to the source client in the target system.
- B. Define one broadcast RFC connection of type "M" (multiple targets) to the target system in the source system.

- C. Define three RFC connections to the target clients in the source system.
- D. Define RFC connections between the three clients in the target system.

Correct Answer: C

QUESTION 8

You are running an AS Java-based SAP system. You are maintaining local settings using the Visual Administrator. These settings become effective immediately. You want to make sure that the new settings are still valid after the next restart of your system. How do you fulfill this requirement?

- A. No further steps are necessary in this scenario.
- B. Mark check box "Activate in profile".
- C. Maintain the same settings in the global settings using the Visual Administrator.
- D. Maintain the same settings in the Config Tool.

Correct Answer: A

QUESTION 9

During an online database backup, which files must be saved to ensure that the Oracle database can be restored to an internally consistent state?

- A. The tablespace data files, the database control file, and the database parameter file
- B. Oracle online redo log files and the database control file
- C. The Oracle executables, the database parameter file, and the tablespace data files
- D. Tablespace data files, the database control file and all database redo logs written during the online backup
- E. Offline redo log files, the database control file, and the Oracle executables

Correct Answer: D

QUESTION 10

When deciding on the network bandwidth needed to connect front ends to an SAP system (using a WAN connection), you should consider which of the following? (Choose three.)

- A. The number of users connecting using this line.
- B. Using SAP's advanced online data compression technology (SAP ODCT) to minimize the network load. The software needed for this feature is sold separately.
- C. The volume of "non-SAP-related" traffic (for example, office documents) using the same connection.

D. It might be useful to switch on the "Low speed connection" flag for the remote connections.

Correct Answer: ACD

QUESTION 11

Which of the following processes connect to the database during the startup of an instance of an SAP system based on AS ABAP?

- A. The message server, in order to check a valid SAP license
- B. The gateway process, via remote function call (RFC)
- C. The dispatcher process via JDBC
- D. All work processes connect to the database

Correct Answer: D

QUESTION 12

You are running an AS ABAP-based SAP system.

Which of the following can you achieve by using operation modes? (Choose two)

- A. You can define the number of work processes reserved for RFC communication.
- B. You can define the number of background work processes reserved for jobs of class "A".
- C. You can switch background work processes to dialog work processes.
- D. You can switch spool work processes to dialog work processes.

Correct Answer: BC
