

E05-001^{Q&As}

Information Storage and Management v3

Pass EMC E05-001 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass4itsure.com/e05-001.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by EMC
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

What is an accurate statement about a virtual desktop infrastructure?

- A. Each user is provided a dedicated desktop VM with its own operating system and applications
- B. Operating system and applications hosted on a client system are shared by multiple users
- C. Each user has an individual desktop session on the remote compute system in which applications execute
- D. Operating system and applications on the remote desktop are downloaded on the client for local execution

Correct Answer: A

QUESTION 2

What is enabled by the N_Port ID virtualization (NPIV)?

- A. A single physical N_Port to obtain multiple FC addresses
- B. A single virtual N_Port to act as a physical Ethernet port
- C. A virtualization layer to map virtual volumes to LUN IDs
- D. A single physical N_Port to act as a virtual HBA port

Correct Answer: A

QUESTION 3

What is a benefit of application virtualization?

- A. Avoids conflicts between different versions of the same application
- B. Enables an application to directly access a LUN on a storage system
- C. Runs applications without requiring the use of cache memory
- D. Presents more memory to an application than is physically available

Correct Answer: A

QUESTION 4

What is a benefit of source-based deduplication over target-based deduplication?

- A. Backup processing is offloaded from the backup client
- B. Less backup data is stored on the backup server

- C. Backup data can be retained longer
- D. Only unique data is sent over the network to be backed up

Correct Answer: D

QUESTION 5

What accurately describes the function of the policy engine in a file-level storage tiering environment?

- A. Facilitates moving data from primary storage to secondary storage based on pre-defined policies
- B. Creates a stub file in secondary storage pointing to data on the primary storage
- C. Ensures that primary and secondary storage have identical data for compliance
- D. Runs the backup agent and determines the files to be copied to the secondary storage

Correct Answer: A

QUESTION 6

What accurately describes an attack vector in an IT infrastructure?

- A. Series of steps that must be followed in order to complete an attack
- B. Various entry points that can be used to launch an attack
- C. Amount of effort required to exploit vulnerabilities in the infrastructure
- D. Process of identifying the system components under attack

Correct Answer: A

QUESTION 7

Which EMC product provides a software-defined storage platform to create a compute-based storage area network?

- A. ScaleIO
- B. XtremIO
- C. Isilon
- D. Atmos

Correct Answer: A

QUESTION 8

What is a component of an FCoE switch?

- A. Ethernet Bridge
- B. Virtual N_Port
- C. Converged Network Adapter
- D. FCIP Forwarder

Correct Answer: A

QUESTION 9

Which data center characteristic ensures that adequate resources are provided to efficiently store and process data?

- A. Capacity
- B. Availability
- C. Scalability
- D. Performance

Correct Answer: A

QUESTION 10

Which process uses a file-level storage tiering technique to perform policy-based data movement?

- A. Archiving
- B. Deduplication
- C. Replication
- D. Backup

Correct Answer: A

QUESTION 11

What is an accurate statement about the Common Internet File System (CIFS) protocol?

- A. Enables a CIFS server to maintain connection information regarding every connected client
- B. Uses a Remote Procedure Call mechanism to provide access to the CIFS supported file systems
- C. Contains an open variation of the stateless user datagram protocol that stores information about open files
- D. Uses file system locking to enable users to simultaneously overwrite all metadata of a file system

Correct Answer: A

QUESTION 12

What is a benefit of configuring EX_Ports on each Fibre Channel over IP (FCIP) gateway in an FCIP tunnel implementation?

- A. Enables FC-FC routing through the FCIP tunnel with outmerging the fabrics
- B. Merges the fabrics at either end of the FCIP tunnel to create a single large fabric
- C. Transfers VSAN tagged traffic over the FCIP tunnel without FC protocol overhead
- D. Creates eight virtual FC links on the FCIP tunnel that can be paused and restarted independently

Correct Answer: A

QUESTION 13

What is an accurate statement about the Network File System (NFS) protocol?

- A. Provides a set of remote procedure calls to access a remote file system
- B. Uses the server message block protocol to provide file locking capability
- C. Translates block I/O requests from a file system into object-level requests
- D. Automatically scales the file systems on clients as the workload increases

Correct Answer: A

QUESTION 14

What is an accurate statement about Platform as a Service?

- A. Consumer has control over the deployed applications
- B. Consumer has control over the operating system and database management system
- C. Consumer has control over the programming languages and tools
- D. Consumer has control over the operating system and storage

Correct Answer: A

QUESTION 15

Which VMware product provides a network virtualization platform for a software-defined data center?

- A. NSX
- B. ESXi
- C. Horizon
- D. AirWatch

Correct Answer: A
