- C. controls an elementary process of the application being counted
- D. does not influence an elementary process of the application being counted

Correct Answer: B

**QUESTION 14****TAX APPLICATION**

For the TAX application the user required the migration of existing taxpayer information (name, tax identification number, location name) to the TAX application. A conversion file with taxpayer data was created and imported into the Taxpayer logical file in the TAX application. The source of the data was the Account Holder logical file.

The user required the ability to Add, Change and Delete the taxpayer information in the Taxpayer logical file.

The user required the ability to View the taxpayer information prior to changing or deleting information.

From the Names of Possible Functions listed identify the base functional components for the TAX application baseline. Select N/A if a Name of Possible Functions does not apply.
