### QUESTION 1

After creating a stored process from a SAS Data Integration Studio job, how can you test the stored process to make sure it runs correctly?

- A. Execute the stored process in SAS Data Integration Studio.
- B. Execute the stored process in SAS Management Console.
- C. Execute the stored process using the SAS Add-In for Microsoft Office or SAS Enterprise Guide.
- D. Execute the stored process using SAS Display Manager's Stored Process Test window.

Correct Answer: C

---

### QUESTION 2

When using the Table Loader transformation in SAS Data Integration Studio to update an existing table containing indexes or constraints, which statement is true?

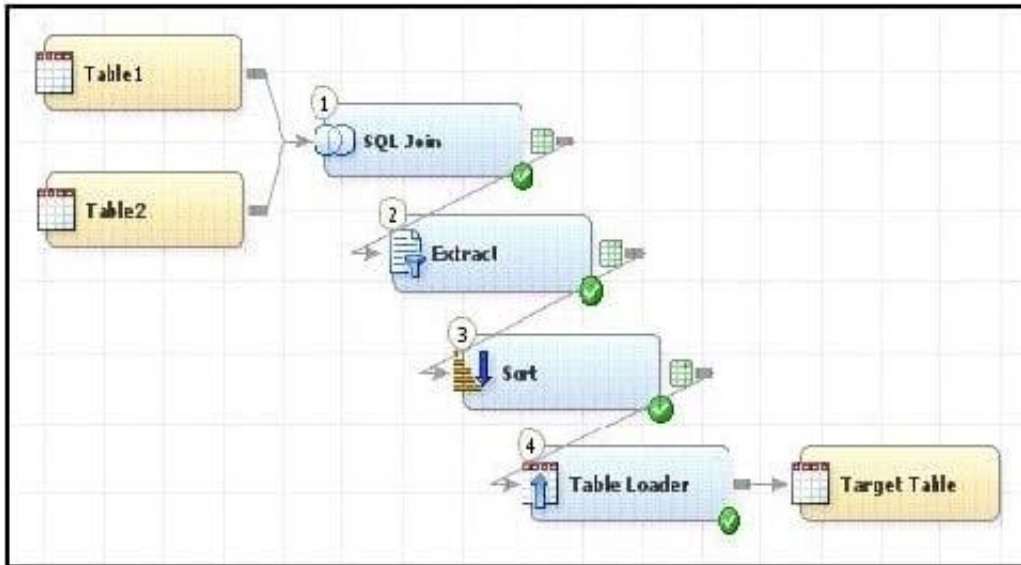

- A. You can control the removal and/or creation of indexes and constraints in the target table only if you are using a Load style other than Replace.
- B. You can control the removal and/or creation of indexes and constraints in the target table for all Load Styles.
- C. If using the Append to Existing load style, indexes and constraints can be added but not removed.
- D. For the Update/Insert load style it is possible to remove indexes not required for the Update/Insert processing, but no indexes can be added.

Correct Answer: B

---

### QUESTION 3

In the following display, can status handling be enabled for both the Extract transformation and the Sort transformation?

- A. Yes. The Return Code Check transformation can be added to the job flow immediately following the Sort transformation - the Status Handling tab in this Return Code Check transformation properties can then establish the desired status handling for both the Extract and Sort transformations.
- B. No. Both the Extract and the Sort transformations do not have a Status Handling tab in their corresponding properties window, therefore it is not possible to establish status handling for these transformations.
- C. Yes. The Return Code Check transformation can be added to the job flow twice, once immediately following the Extract, and again immediately following the Sort - the Status Handling tab in each of the Return Code Check transformations properties can then establish the desired status handling.
- D. Yes. The status handling tab in the job properties window will allow you to select which transformation (or even several transformations) that you want to define status handling for.

Correct Answer: C

#### QUESTION 4

Which action is performed by the Lookup transformation in SAS Data Integration Studio?

- A. combines rows from multiple tables into a single row
- B. combines rows from multiple tables into multiple rows
- C. validates that values are unique
- D. validates that values are not null

Correct Answer: A

#### QUESTION 5

Which statement correctly defines a System DSN?

- A. Not specific to an individual user. Anyone with permission to access the data source can use it.
- B. Specific to an individual user. It is available only to the user who creates it.
- C. Not specific to an individual user. It can be shared among users even though it is created locally.
- D. Specific to an individual user. But it can be shared among users.

Correct Answer: A

---

#### QUESTION 6

Which statements are true regarding columns when using SAS Data Integration Studio's New Tables wizard? 1. You can access metadata for any column from any table already registered in metadata but cannot change it. 2. You can access metadata for any column from any table already registered in metadata and can override the imported information. 3. You can define new columns for the table. 4. You cannot define new columns.

- A. 1 and 2
- B. 1 and 3
- C. 2 and 3
- D. 2 and 4

Correct Answer: C

---

#### QUESTION 7

Which statement regarding propagation is FALSE?

- A. Automatic propagation can be set globally, so every new job will automatically propagate.
- B. Propagation can only occur in the direction of the job flow diagram (from beginning to end). Propagation from the end to the beginning is not available.
- C. Automatic propagation that is set globally can be overridden and disabled within a job.
- D. Automatic propagation that is set globally or at the job level can be overridden and disabled for a selected transformation.

Correct Answer: B

---

#### QUESTION 8

Which statement is FALSE regarding foreign keys?

- A. A foreign key is one or more columns that are associated with a primary key or unique key in another table.
- B. A table can have zero or more foreign keys.

- C. A foreign key cannot exist without an associated primary or unique key.
- D. A table can have only one foreign key defined.

Correct Answer: D

---

#### QUESTION 9

Registering metadata for an ODBC data source involves registering:

- A. a library that will use a SAS/ACCESS engine to a specific database
- B. only an ODBC data source definition
- C. a server definition that points to the ODBC data source and a library accessing this server definition
- D. a table pointing directly to the ODBC data source

Correct Answer: C

---

#### QUESTION 10

Which statement regarding scheduling SAS Data Integration Studio jobs is true?

- A. To schedule a job flow you must first use SAS Management Console to deploy the job for scheduling.
- B. To schedule the job on the Platform Process Manager you require a dependency generator.
- C. Multiple job flows can be scheduled to a deployment directory.
- D. To schedule a job flow in SAS Management console you must first deploy the job for scheduling using SAS Data Integration Studio.

Correct Answer: D

---

#### QUESTION 11

The ability to deploy a SAS Data Integration Studio job as a Web service or a SAS Stored Process requires additional set up that is performed in which client application?

- A. SAS Data Integration Studio
- B. SAS Enterprise Guide
- C. SAS Job Deployment Studio
- D. SAS Management Console

Correct Answer: D

---

**QUESTION 12**

The purpose of change management in SAS Data Integration Studio is to manage:

- A. metadata objects across metadata servers
- B. metadata objects within a logged on user\\'s personal folder
- C. metadata objects within a metadata server
- D. metadata objects within a logged on user\\'s Checkouts Tree

Correct Answer: C

---

**QUESTION 13**

Given the table below as a source table for the Transpose transformation in SAS Data Integration Studio:

 Name	 Month	 pay
Lee	Jan	200
Lee	Feb	1000
Lee	Mar	1100
Smith	Jan	3000
Smith	Feb	4000
Smith	Mar	800

In the Options tab in the Properties window for the Transpose transformation, if the columns are assigned as follows:  
Select columns to transpose (VAR statement): Payment  
Select a column for Output column names (ID statement): Month  
Select columns whose values define groups of records to transpose (BY statement): Name  
Which of the following tables is a possible resulting target table?

C A.

Name	Jan	Feb	Mar
Lee	200	1000	1100
Smith	3000	4000	800

C B.

Name	Jan	Feb	Mar
Lee		1000	
Lee	200		
Lee			1100
Smith		4000	
Smith	3000		
Smith			800

C C.

Month	Lee	Smith
Feb	1000	4000
Jan	200	3000
Mar	1100	800

C D.

pay1	pay2	pay3	pay4	pay5	pay6
Lee	Smith	Lee	Smith	Lee	Smith
Feb	Feb	Jan	Jan	Mar	Mar
1000	4000	200	3000	1100	800

A. Exhibit A

B. Exhibit B

C. Exhibit C

D. Exhibit D

Correct Answer: A

**QUESTION 14**

Which statement defines the characteristics of a SAS Stored Process?

A. SAS metadata that describes how to collect and store data sources.

B. A document that stores the steps and locations for building a data mart.

C. A SAS program that is stored on the server and described by metadata.

D. A user written SAS PROC step.

Correct Answer: C

---

#### QUESTION 15

In SAS Data Integration Studio, which output format is supported for the default "out-of-the- box" job report?

A. HTML

B. PDF

C. RTF

D. XML

Correct Answer: A
