**QUESTION 1**

The DBA updated the uto_crsd Scheduler task in the SYSADMIN database with the following SQL commands: UPDATE ph_task SET tk_enable = 1 WHERE tk_name = uto_crsd; UPDATE ph_task SET tk_enable = 0 WHERE tk_name = uto_crsd; UPDATE ph_threshold SET value = 5000 WHERE name = UTODEFRAG_ENABLED; UPDATE ph_threshold SET value = 1000 WHERE name = UTOCOMPRESS_ROWS; UPDATE ph_threshold SET value = 1000 WHERE name = UTOCOMPRESS_ROWS; What will be the effect of auto_crsd database scheduler task on the tables?

- A. Compress all tables with less than 5000 rows.
- B. Compress and defragment tables with more than 5000 uncompressed rows.
- C. Compress, repack and shrink tables with more than 5000 uncompressed rows.
- D. Do not compress, repack, shrink and defragment any table with more than 5000 rows.

Correct Answer: C

QUESTION 2

During the database server initialization process, a number of environment variables are required. What is the order of precedence if the -file option is used?

- A. User local shell, system global
- B. System global, user local shell
- C. System global, user local shell, onconfig file
- D. Onconfig file, user local shell, system global

Correct Answer: D

QUESTION 3

Which statement is FALSE about dbspace configurable page sizes?

- A. Dbspace page size can only be set for non-critical dbspaces.
- B. Possible page sizes are multiples of the default page size up to 16 kb.
- C. Configure page sizes as close to the backup / restore and network buffer size as possible for efficient data transfer across the wire.
- D. Dbspace page size should be configured to accommodate the greatest number of average row sizes with a minimum of remainder pages being used.

Correct Answer: C

QUESTION 4

Which two statements are true? (Choose two.)

- A. Logical log files must always reside in rootdbs.
- B. Having too little log space does not affect performance.
- C. Having too much log space does not affect performance.
- D. Simple large objects in blobspaces are not logged and they are included in the log backup in which the object was created.
- E. Simple large objects in blobspaces are not logged and they are not included in the log backup in which the object was created.

Correct Answer: CD

QUESTION 5

Which is NOT a component of the IBM Mobile Database offering?

- A. IBM DB2
- B. IBM Informix
- C. IBM solidDB
- D. IBM InfoSphere Warehouse

Correct Answer: D

QUESTION 6

Which parameter is used to enable transactions to complete after failover of the primary server?

- A. HA_FOC_ORDER
- B. FAILOVER_CALLBACK
- C. CLUSTER_TXN_SCOPE
- D. FAILOVER_TX_TIMEOUT

Correct Answer: D

QUESTION 7

Which OpenAdmin Tool feature is used to analyze the state of the Informix database server and can alert the DBA

through email?

- A. SQL Toolbox
- B. Health Advisor
- C. Server Administration
- D. Performance Analysis

Correct Answer: B

QUESTION 8

Consider the following statements: DBSPACETEMP=tempdbs1, tempdbs2, tempdbs3; CREATE DATABASE mydb WITH LOG IN datadbs1; CREATE TEMP TABLE temp1 (col1 int); Which statement is true?

- A. The temp table will be created in datadbs1.
- B. The temp table will be created in root dbspace.
- C. The temp table will be created in one of the dbspaces listed in DBSPACETEMP.
- D. The temp table will be created round-robin across the dbspaces in DBSPACETEMP.

Correct Answer: B

QUESTION 9

What is the primary benefit of a Storage Pool?

- A. It allows data to be shared across instances.
- B. It allows data to be shared across dbspaces.
- C. It allows space to automatically be added to dbspaces.
- D. It allows space to be reserved for critical database operations.

Correct Answer: C

QUESTION 10

When KAIO is available and raw disk is used, which statement is true?

- A. Logical Log IO is performed by the LIO VP.
- B. Physical Log IO is performed by the PIO VP.
- C. Logical Log IO is performed by the KAIO VP.

D. Physical Log IO is performed by the CPU VP.

Correct Answer: D

QUESTION 11

Which two statements are true about blobspace? (Choose two.)

- A. The TEXT or BYTE objects are stored in the logical log files.
- B. A blobspace is a logical storage unit that stores only TEXT and BYTE data.
- C. The TEXT or BYTE objects that are assigned to a blobspace are physically logged.
- D. A newly created blobspace is immediately available for storage of TEXT or BYTE data.
- E. The database server writes data stored in a blobspace directly to disk without passing it through the bufferpool.

Correct Answer: BE

QUESTION 12

Where must the HA_FOC_ORDER configuration parameter be set?

- A. Any server in the cluster.
- B. The primary server only.
- C. The SDS secondary only.
- D. The HDR secondary only.

Correct Answer: B

QUESTION 13

Which statement accurately describes the selective row-level auditing feature in Informix?

- A. Auditing can be configured so that row-level events of only selected views are recorded in the audit trail.
- B. Auditing can be configured so that row-level events of only selected tables are recorded in the audit trail.
- C. Auditing can be configured so that events of only selected rows within a table are recorded in the audit trail.
- D. Auditing can be configured so that row-level events of only selected partitions are recorded in the audit trail.

Correct Answer: B

QUESTION 14

Where are the Primary Storage Manager catalog tables stored?

- A. sysutils database
- B. sysadmin database
- C. sysmaster database
- D. A location as specified by the PSM_CATALOG_PATH configuration parameter

Correct Answer: D

QUESTION 15

Which table attribute defines the percentage of changes (insert/update/delete) threshold to consider the statistics as stale?

- A. STATAUTO
- B. STATFORCE
- C. FORCE AUTO
- D. STATCHANGE

Correct Answer: D
