Correct Answer: C

QUESTION 11

What is an Einstein Discovery story?

- A. An account of imaginary or real people and events told for entertainment
- B. A collection of graphs, statistical analysis, and text that helps you understand the relationships between multiple outcome variables and the factors that influence those variables
- C. A collection of graphs, statistical analysis, and text that proves exactly what caused an outcome
- D. A collection of graphs, statistical analysis, and text that helps you understand the relationships between a single outcome variable and the factors that influence that variable

Correct Answer: D

QUESTION 12

A new field called "CardBalance" is added to the standard object. Account. The team wants to add this new field to an Einstein Analytics dataset that sources the Account object; however, the team needs to limit the users who are able to view that field's data in the dataset.

How can an Einstein Consultant help them implement this new requirement?

- A. Add the new field to the existing dataset and use the XMO file parameters to hide the new field from users who should not have access to it.
- B. Add the new field to the existing dataset and activate "Sharing inheritance" in the Account object so only users who have access to the field in Salesforce will have access in Einstein Analytics.
- C. Create a new Account dataset containing the new field and give access to this dataset only to users who should be able to see the new field.
- D. Add the new field to the existing dataset and use "Security Predicates" to hide it from users who should not access it.

Correct Answer: C

QUESTION 13

In Einstein Discovery:

- A. "What Is The Difference" insights are comparative insights that help you better understand the relationships between explanatory variables and the goal (target outcome variable) in your story. These insights, based on a statistical analysis of your dataset, help you figure out which factors contribute to the biggest changes in the outcome

variable. Einstein Discovery uses waterfall charts to help you visualize comparisons in What Is The Difference insights.

B. \\\Why It Happened\\' insights help you take a deeper look into the exact factors that led to an outcome. Why It Happened s/ Q insights drill deeper into the various factors that contributed to your story\\'s goal. These insights are based on a statistical analysis of your dataset. Einstein Discovery uses waterfall charts to help you visualize Why It Happened insights.

C. \\\Predictions and Improvements\\' insights help you explore what might happen in the future. For example, you can interactively perform "what if analyses in your story. Einstein Discovery provides you with predictions and suggested improvements based on a statistical analysis of your dataset and predictive analytics. To help you visualize these insights, Einstein Discovery uses:

D. - waterfall charts for predictions

-bar charts for suggested improvements

E. \\\What Happened\\' insights are the primary insights in your story. They are descriptive insights that help you explore, at an y/ Q overview level, what factors contributed to the outcome, based on a statistical analysis of your dataset. Einstein Discovery uses bar charts to help you visualize What Happened insights.
