QUESTION 7

Which IT controls do AWS and the customer share, according to the AWS shared responsibility model? (Choose two.)

- A. Physical and environmental controls
- B. Patch management
- C. Cloud awareness and training
- D. Zone security
- E. Application data encryption

Correct Answer: BC

B and C according to aws:

Shared Controls ?Controls which apply to both the infrastructure layer and customer layers, but in completely separate contexts or perspectives. In a shared control, AWS provides the requirements for the infrastructure and the customer must

provide their own control implementation within their use of AWS services. Examples include:

Patch Management ?AWS is responsible for patching and fixing flaws within the infrastructure, but customers are responsible for patching their guest OS and applications. Configuration Management ?AWS maintains the configuration of its

infrastructure devices, but a customer is responsible for configuring their own guest operating systems, databases, and applications. Awareness and Training- AWS trains AWS employees, but a customer must train their own employees.
