**QUESTION 1**

You have an Azure Virtual Desktop host pool.

You add a French language pack to each session host in the host pool.

Several days later, users report that English displays when they connect to Azure Virtual Desktop.

After an investigation, you discover that the French language pack was removed, and the session hosts reverted to English.

You need to ensure that the French language pack is always available on the session hosts.

What should you do?

- A. Configure the international settings on each host
- B. Assign a default time zone on each host
- C. Apply a Group Policy setting to disable the Time and language settings
- D. Apply a Group Policy setting that blocks the cleanup of unused language packs

Correct Answer: D

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/languages-overview?view=windows-11#block-cleanup-of-unused-language-packs>

---

**QUESTION 2**

You have a Windows Virtual Desktop deployment.

You need to provide external users with access to the deployment. The external users have computers that run Windows 10 Pro and Windows 10 Enterprise. The users do not have the ability to install applications.

What should you recommend that the users use to connect to the deployment?

- A. Microsoft Edge
- B. RemoteApp and Desktop Connection
- C. Remote Desktop Manager
- D. Remote Desktop Connection

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/governance/entitlement-management-external-users>  
<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-web>

---

**QUESTION 3**

You have a Windows Virtual Desktop host pool.

You need to install Microsoft Antimalware for Azure on the session hosts.

What should you do?

- A. Add an extension to each session host.
- B. From a Group Policy Object (GPO), enable Windows 10 security features.
- C. Configure the RDP Properties of the host pool.
- D. Sign in to each session host and install a Windows feature.

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/azure/security/fundamentals/antimalware>

---

#### QUESTION 4

You have an Azure Virtual Desktop host pool in the East US region.

You need to implement a disaster recovery solution that meets the following requirements:

1.

If users cannot connect to the Azure Virtual Desktop resources in the East US region, the users must be able to connect to the equivalent resources in the West US region.

2.

Users must connect to the Azure Virtual Desktop resources in either the East US or the West US region by selecting a single icon in the Remote Desktop client?

3.

In the event of a disaster, failover between the Azure regions must be initiated manually by an administrator.

4.

Failover times must be minimized. What should you do?

- A. Configure a shared image gallery that has replicas in the East US and West US regions
- B. Create new session hosts in the West US region and add the session hosts to an existing host pool
- C. Create an additional host pool in the West US region
- D. Enable Azure Site Recovery replication of the virtual machines to the West US region
- E. Enable Azure Backup to a Recovery Services vault in the West US region

Correct Answer: D

Reference: <https://docs.microsoft.com/en-us/azure/virtual-desktop/disaster-recovery>

---

**QUESTION 5**

You have an Azure Virtual Desktop deployment.

You plan to use FSLogix profile containers.

You need to recommend a solution that will be used to store the containers. The solution must meet the following requirements:

1.

The containers must be stored on solid-state drives (SSDs)

2.

Minimize administrative effort

3.

Minimize cost

What should you recommend?

A. Azure NetApp Files

B. Azure Files Standard

C. Azure Blob Storage Premium

D. Azure Files Premium

Correct Answer: D

Azure Files integration with Azure Active Directory Domain Service FSLogix profile containers performance and features take advantage of the cloud. On August 7th, 2019, Microsoft Azure Files announced the general availability of Azure Files authentication with Azure Active Directory Domain Service (Azure AD DS). By addressing both cost and administrative overhead, Azure Files with Azure AD DS Authentication is a premium solution for user profiles in the Azure Virtual Desktop service. Premium file shares enable highly I/O-intensive workloads, with high throughput and low latency. Premium file shares are offered on high-performance solid-state drive (SSD) based storage.

<https://azure.microsoft.com/en-us/pricing/details/storage/files/>

---

**QUESTION 6****HOTSPOT**

You have an Azure Virtual Desktop host pool named HostPool1 that must support 60 sessions.

The session hosts for HostPool1 are configured as shown in the following exhibit.

Home > Azure Virtual Desktop > HostPool1

# HostPool1 | Session hosts

Host pool

>> + Add Refresh Assign Export to CSV Turn drain mode on ...

Filter by name Status: 12 ... Drain mod...

<input type="checkbox"/>	Name ↑↓	Status ↑↓	Drain mode ↑↓	Assigned User ↑↓	Active sessions ↑↓
<input type="checkbox"/>	HP1-0	✓ Available	Off	-	59
<input type="checkbox"/>	HP1-1	✓ Available	Off	-	0
<input type="checkbox"/>	HP1-2	✓ Available	Off	-	0
<input type="checkbox"/>	HP1-3	✓ Available	Off	-	0

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

HostPool1 is a **[answer choice]**.

- personal host pool that uses automatic assignment.
- personal host pool that uses direct assignment.
- pooled host pool that uses breadth-first load balancing.
- pooled host pool that uses depth-first load balancing.

The Max session limit setting of HostPool1 must be set to **[answer choice]** to maximize performance and provide user access if a single session host fails.

- 15
- 20
- 30
- 60

Correct Answer:

### Answer Area

HostPool1 is a **[answer choice]**.

	▼
personal host pool that uses automatic assignment.	
personal host pool that uses direct assignment.	
pooled host pool that uses breadth-first load balancing.	
pooled host pool that uses depth-first load balancing.	

The Max session limit setting of HostPool1 must be set to **[answer choice]** to maximize performance and provide user access if a single session host fails.

### QUESTION 7

You need to modify the custom virtual machine images to meet the deployment requirements. What should you install?

- A. the RSAT: Remote Desktop Services Tools optional feature
- B. the Azure Virtual Desktop Agent
- C. the Microsoft Monitoring Agent
- D. the FSLogix agent

Correct Answer: D

Reference: <https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-customize-master-image>

### QUESTION 8

You have an Azure subscription that contains 500 users. The users are assigned Microsoft Office 365 E1 licenses.

You deploy an Azure Virtual Desktop solution that contains Windows 10 multi-session hosts and streams a custom remote app named App1.

You need to ensure that the users are licensed to stream App1. The solution must minimize costs.

Which license should you use?

- A. Microsoft 365 E5
- B. Office 365 E3
- C. a Remote Desktop Services (RDS) client access license (CAL)
- D. Windows 10 Enterprise E3

Correct Answer: D

App-V client. The App-V client must be enabled on any client device on which apps will be run from the App-V server. These will be the Windows 10/11 Enterprise

E3 devices.

Reference:

<https://docs.microsoft.com/sv-se/windows/deployment/windows-10-enterprise-e3-overview>

## QUESTION 9

### HOTSPOT

You have an on-premises network.

All users have computers that run Windows 10 Pro.

You plan to deploy Azure Virtual Desktop to meet the department requirements shown in the following table.

Department	Requirement
Research	Run an application that can run only on Windows Server. The application will be published as a RemoteApp.
Finance	Run Windows 10 Enterprise multi-session.

You need to recommend licenses for the departments. The solution must minimize costs.

Which license should you recommend for each department? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Research:

Microsoft 365 Enterprise E3 license
Windows 10 Enterprise E3 license
Windows Server client access license (CAL)
Windows Server Remote Desktop Services client access license (RDS CAL)

Finance:

Microsoft 365 Enterprise E3 license
Windows 10 Enterprise E3 license
Windows Server client access license (CAL)
Windows Server Remote Desktop Services client access license (RDS CAL)

Correct Answer:

**Answer Area**

Research:

Microsoft 365 Enterprise E3 license
Windows 10 Enterprise E3 license
Windows Server client access license (CAL)
Windows Server Remote Desktop Services client access license (RDS CAL)

Finance:

Microsoft 365 Enterprise E3 license
Windows 10 Enterprise E3 license
Windows Server client access license (CAL)
Windows Server Remote Desktop Services client access license (RDS CAL)

Reference: <https://docs.microsoft.com/en-us/azure/virtual-desktop/windows-10-multisession-faq>  
<https://azure.microsoft.com/en-us/pricing/details/virtual-desktop/#pricing>

**QUESTION 10**

You have a Windows Virtual Desktop deployment.

You publish a RemoteApp named AppVersion1.

You need AppVersion1 to appear in the Remote Desktop client as Sales Contact Application.

Which PowerShell cmdlet should you use?

- A. New-AzADApplication
- B. Update-AzWvdApplicationGroup
- C. Register-AzWvdApplicationGroup
- D. Update-AzWvdApplication

Correct Answer: D

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/customize-feed-for-virtual-desktop-users>

<https://docs.microsoft.com/en-us/powershell/module/az.desktopvirtualization/update-azwvdapplication?view=azps-5.7.0>

---

### QUESTION 11

You have an Azure Virtual Desktop host pool named Pool1 that contains three session hosts. The session hosts are configured to use FSLogix profile containers.

You need to configure Cloud Cache on the session hosts.

What should you do?

- A. Add a VHDLocations entries to the Windows registry
- B. Remove VHDLocations entries from the Windows registry
- C. Uninstall the FSLogix agent
- D. Configure FSLogix Office Container

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/fslogix/configure-cloud-cache-tutorial>

---

### QUESTION 12

You have an Azure Virtual Desktop deployment that contains a host pool. The host pool contains 10 session hosts. The session hosts are configured by using a custom image and ephemeral disks.

You need to deploy Microsoft OneDrive for Business.

Which two actions should you perform for each session host? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Install FSLogix.
- B. Install the OneDrive sync app by using the per-machine installation option.
- C. Implement Application Masking.

- D. Install the OneDrive sync app by using the per-user installation option.
- E. Deploy an MSIX app attach package.

Correct Answer: AB

The two actions you should perform for each session host in order to deploy Microsoft OneDrive for Business are:

A. Install FSLogix - FSLogix provides a single-user solution for running multiple OneDrive for Business clients simultaneously on the same session host. B. Install the OneDrive sync app by using the per-machine installation option - according to the Microsoft AZ-140 Official Guide, "OneDrive for Business supports per-machine installation, which is required for a multi-user VDI environment." This means that the OneDrive sync app must be installed on each session host using the per-machine installation option.

---

### QUESTION 13

You have an Azure Virtual Desktop host pool named Pool1. Pool1 contains session hosts that have a third-party application named App1. App1 is published by using a RemoteApp group.

A new MSI-based version of App1 is installed each month to each host. The name of the executable file is different for each version of App1.

You need to automate the process of making a new version of App1 available via RemoteApp. The process must ensure that the user experience remains the same when launching the application from the Windows Desktop client.

Which two cmdlets should you run? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Remove-AzWvdApplication
- B. New-AzWvdApplication
- C. New-AzWvdApplicationGroup
- D. New-AzWvdMsixPackage
- E. New-AzRoleAssignment
- F. Remove-AzWvdMsixPackage

Correct Answer: AB

Reference: <https://docs.microsoft.com/en-us/azure/virtual-desktop/what-is-app-attach> <https://docs.microsoft.com/en-us/powershell/module/az.desktopvirtualization/new-azwvdapplication?view=azps-6.4.0>

---

### QUESTION 14

DRAG DROP

You have an Azure Virtual Desktop host pool named Pool1, an application named App1, and an Azure file share named Share1.

You need to ensure that you can publish App1 to Pool1 by using MSIX app attach.

Which four actions should you perform in sequence before you publish App1? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

### Actions

### Answer Area

Create an MSIX image.

Generate a signing certificate.

Upload the MSIX package to Share1.

Generate an encryption certificate.

Create an MSIX package.

Upload the MSIX image to Share1.

Correct Answer:

### Actions

### Answer Area

Generate a signing certificate.

Create an MSIX package.

Upload the MSIX package to Share1.

Create an MSIX image.

Generate an encryption certificate.

Upload the MSIX image to Share1.

Reference: <https://docs.microsoft.com/en-us/windows/msix/packaging-tool/create-app-package>  
<https://docs.microsoft.com/en-us/azure/virtual-desktop/app-attach-image-prep>

### QUESTION 15

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop host pool that contains five session hosts. The session hosts run Windows 10 Enterprise multi-session.

You need to prevent users from accessing the internet from Azure Virtual Desktop sessions. The session hosts must be allowed to access all the required Microsoft services.

Solution: You configure rules in the network security group (NSG) linked to the subnet of the session hosts.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/azure/virtual-network/tutorial-filter-network-traffic>
