QUESTION 1

Which statement describes User Management Service Teams?

- A. An option to perform authorization on behalf of the apps and components
- B. A company-wide API tool that manages business-oriented user KPIs
- C. A company-wide user registry with many groups
- D. A collection of users, groups, and other teams to administer global units across different Cloud Pak components

Correct Answer: D

QUESTION 2

Which product can be used by a business analyst to configure an ontology?

- A. Business Automation Insights
- B. Business Automation Studio
- C. Datacap
- D. Business Automation Content Analyzer

Correct Answer: A

QUESTION 3

Which statement is true concerning the REST integration ability provided by Business Automation Workflow?

- A. Calling the REST service in a service task as part of a service flow is dynamic and does not need service discovery.
- B. Unlike SOAP web services, REST services do not have a "server" configuration entity.
- C. Calling REST services through JavaScript can happen only after a corresponding external service has been defined through service discovery.
- D. When a REST service URL changes, service discovery happens automatically to replace the existing service.

Correct Answer: C

QUESTION 4

In a workflow of multiple tasks, when a process task is finished, which element is correspondingly generated?

- A. Active summaries

- B. Time series
- C. Anonymization rules
- D. Completed summaries

Correct Answer: C
