**QUESTION 1**

The ability for a specific user to query on specific columns can be controlled by which two methods?

- A. security groups
- B. Application Designer
- C. database configuration
- D. Start Center templates
- E. Key Performance Indicator dashboards

Correct Answer: AC

QUESTION 2

The customer plans to use a Novell directory server for user authentication with IBM Maximo Asset Management (Maximo). Which statement provides a reason to change the customer's Maximo deployment plan based on security integration?

- A. The customer's environment has an unsupported LDAP capable server.
- B. The customer needs an additional user to be supported by user interface JVMs.
- C. The customer has a single sign-on solution that can be integrated with the selected J2EE server.
- D. The customer wants their groups to be managed by Maximo and the users to be managed by a LDAP capable server.

Correct Answer: A

QUESTION 3

Which two steps must be completed to disable the Maximo Integration Framework (MIF) on a specific IBM Maximo Asset Management Java Virtual Machine?

- A. rebuild the MIF EAR file on the application server
- B. comment out message driven bean sections in the ejb-jar.xml
- C. set the parameter mxm.int.donotrun in the maximo.properties file
- D. delete the ibm-ejb-jar-bnd.xmi file from the applications directory
- E. rebuild and deploy the Maximo EAR file on the application server

Correct Answer: AB

**QUESTION 4**

What can cause the IBM Maximo Asset Management V7.5 installation to fail?

- A. Simple file sharing is disabled.
- B. The Windows firewall is disabled.
- C. The database server is inaccessible.
- D. The Oracle WebLogic Server is inaccessible.

Correct Answer: C

QUESTION 5

Each supported database platform contains special index types that can improve performance in specific cases and must be managed outside the Maximo Database Configuration application. Which special index type is available only at the database level?

- A. Unique Index
- B. Bitmap Index
- C. System Index
- D. Text Search Index

Correct Answer: B

QUESTION 6

How can it be verified which interim fix has been installed in an IBM Maximo Asset Management V7.5 (Maximo) environment?

- A. run the ifix utility
- B. view the Maximo EAR date
- C. run the installation verification utility
- D. view the Maximo system information

Correct Answer: D

QUESTION 7

A customer is having performance problems and needs to understand how to resolve these performance issues. Their environment runs a single Java Virtual Machine (JVM).

How can clustering help with the performance issues?

- A. Clustering provides a means to spread some of the workload across multiple heap spaces.
- B. Clustering speeds garbage collection by having more garbage collectors to purge the application space.
- C. Clustering creates multiple TCP/IP ports for a single JVM to allow for more connections to the application.
- D. Clustering provides failover so that the failure of an overburdened application server can be met by a hot standby cluster member.

Correct Answer: D

QUESTION 8

VMMSYNC is an IBM Maximo Asset Management V7.5 cron task that can be used for what purpose?

- A. to synchronize users from a LDAP capable server when using IBM WebSphere Application Server (WebSphere)
- B. to synchronize users from a LDAP capable server when using Oracle WebLogic Server (WebLogic)
- C. to synchronize users from a LDAP capable server and to enable external application authorization
- D. to synchronize users from a LDAP capable server when using IBM WebSphere or WebLogic

Correct Answer: A

QUESTION 9

A company has decided to move the IBM Maximo Asset Management (Maximo) database to a new server for capacity reasons. The new database server has a different hostname and port.

Which Maximo property must be modified to access the Maximo database?

- A. mxe.db.url
- B. mxe.db.user
- C. mxe.db.driver
- D. mxe.registry.port

Correct Answer: A

QUESTION 10

What are the licensing implications of using the IBM Maximo Asset Management (Maximo) supplied middleware?

- A. The customer is free to use the middleware however they choose.
- B. The customer is licensed to use the middleware only for the Maximo implementation.
- C. The customer must contact IBM and discuss licensing for the proposed environment.

D. The customer is licensed to use the middleware as long as it is all installed on a single server.

Correct Answer: B

QUESTION 11

Which statement is true regarding version.bat?

- A. It checks the Windows registry for installed products and versions.
- B. It connects to the J2EE server and uses MXSession to query the application.
- C. It connects to the database and runs queries against a table containing product versions.
- D. It checks the file structure of the administrative workstation for files written by the product installer.

Correct Answer: C

QUESTION 12

Which system property provides a running count of cron task executions?

- A. mxe.mbocount
- B. mxe.db.mboMonitor
- C. mxe.db.logSQLTimeLimit
- D. mxe.db.fetchResultLogLimit

Correct Answer: A

QUESTION 13

Which operating system(s) are supported for the IBM Maximo Asset Management V7.5 installation on the administrative workstation?

- A. Windows
- B. Windows and AIX
- C. Windows and Linux
- D. Windows, AIX, and Linux

Correct Answer: A

QUESTION 14

A company has recently installed IBM Maximo Asset Management 7.5 (Maximo) and experienced a few bugs that are fixed with the latest fix pack. The Maximo administrator shuts down the Maximo Java Virtual Machine and proceeds to uninstall all the Maximo applications from the J2EE server. Once the fix pack is installed, the administrator builds a new Maximo EAR and redeploys it to the J2EE server. The administrator logs in and validates the new fix pack has been installed by checking the version from Help > System Information and determines the fix pack installation was successful. Later that day the Help Desk calls and says that no one can view any application help information, and the help link is not available. Why?

- A. The Maximo fix pack has disabled the help functions in Maximo.
- B. The Maximo administrator did not install the Maximo fix pack correctly.
- C. The Maximo administrator did not update the properties for the Help application.
- D. The Maximo administrator did not build and deploy the maximoiehs.ear file after installing the fix pack.

Correct Answer: D

QUESTION 15

What does the installValidation utility validate?

- A. IBM Maximo Asset Management (Maximo) product installations only
- B. The Maximo database installation
- C. The middleware installations only
- D. Both the Maximo product and middleware installations

Correct Answer: A
