QUESTION 1

What changes are required to run IBM Notes applications in a browser using the Notes Browser Plug-in?

A. None, the Notes Browser Plug-in allows Notes applications to run unmodified in a browser.

B. The Notes Browser Plug-in requires that Notes applications be modified to support XPages.

C. The Notes Browser Plug-in requires that Notes applications be converted using the Browser Plug-in Application Tool (BPAT).

D. The Notes Browser Plug-in allows Notes applications to run in a browser if the Plug-in is listed in the ACL.

Correct Answer: A

QUESTION 2

What is a difference between the Replace Design and Refresh Design features in IBM Notes and IBM Domino?

A. Refresh Design will not give an option to select a new template.

B. Replace Design will not give an option to select a new template.

C. Replace Design can be performed only with Manager access to a database while Refresh Design can be performed with Editor access.

D. Refresh Design of a database will remove all Design elements in a database and replace them with those from a new template. This process also resets the database properties. Replace Design will do the same thing, but the Design properties of the database will not change.

Correct Answer: A

QUESTION 3

Which is true regarding the IBM Domino 9.0 Social Edition OpenSocial component?

A. The OpenSocial component requires a Domino server running on Linux.

B. The OpenSocial component provides a mechanism to let external applications access NSF data.

C. The OpenSocial component makes social and web features of only IBM Connections available directly in the user\\'s mail.

D. The OpenSocial component provides social and web features to make third-party processes available directly in the user\\'s mail.

Correct Answer: D

QUESTION 4

Clive is using an IBM Lotus Notes 7.0 client and needs to access a database that has been saved with the latest ODS revision. Can he do this?

A. Yes, as long as the file is stored locally.

B. No, ODS revisions are not backward compatible.

C. Yes, as long as the file is retrieved via an IBM Domino server and not locally.

D. Yes, ODS revisions are backward compatible regardless of where the file is retrieved from.

Correct Answer: C

QUESTION 5

What IBM Domino task can be run to fix corrupted full-text indexes?

A. Fixup

B. Updall

C. Design

D. Compact

Correct Answer: B

QUESTION 6

What is the difference between Replace Design and Refresh Design in relation to the Database properties?

A. Both actions reset the Database properties.

B. None of the actions reset the Database properties.

C. Replacing the Design of a database resets the Database properties.

D. Refreshing the Design of a database resets the Database properties.

Correct Answer: C

QUESTION 7

Can database replicas with different On Disk Structures (ODS) replicate?

A. No.

B. Yes, regardless of the release.

C. Yes, as long as all servers are of the same release.

D. Yes, although cluster replication requires the same ODS for cluster replicas of a database.

Correct Answer: B

QUESTION 8

The IBM Domino Configuration Tuner points to a remote server to pull configuration and updated design information from IBM. Which outbound port access does the Domino server need to pull the updated information?

A. TLS

B. UDP

C. HTTP

D. NRPC

Correct Answer: C

QUESTION 9

A. Domain Catalog

B. Personal Address Book

C. Extended Directory Catalog

D. Condensed Directory Catalog

Correct Answer: C

QUESTION 13

Which can be done to make data transmissions between an IBM Notes workstation and IBM Domino server or between two Domino servers more secure?

A. enable private ports

B. enable port encryption

C. enable port compression

D. enable Extended Access Control List

Correct Answer: B

QUESTION 14

Julie, the IBM Domino administrator, wishes to simplify the IBM Notes mail connection topology in her organization. She has numerous Connection documents she wishes to consolidate on her hub server. Which would be the best solution?

A. Add a Connection document with a wildcard as the source server and the hub as the destination.

B. Add the hostname of each destination server into the hub server notes.ini and remove all the Connection documents.

C. Change the topology to have each spoke connect to the hub server and have a new Connection document created for each spoke

D. Modify the server configuration documents for each spoke server adding the hub server as a destination domain for all Notes mail routing.

Correct Answer: A

QUESTION 15

The IBM Domino Configuration Tuner database in the environment contains outdated rulesets. In what way are new rules applied?

A. The new rules must be manually copied from the Domino server into the existing database.

B. The new template design is retrieved from the Domino server and applied to the database with the new rules.

C. The new rules must be manually created for the environment from the descriptors provided by the Domino server.

D. The Domino Configuration Tuner server task must be stopped, and the existing database must be deleted. Restarting the Domino Configuration Tuner task will build a database with the new rulesets.

Correct Answer: B
