**QUESTION 1**

James has been asked to write an agent using IBM Domino Component Object Model (COM). Which statement describes COM?

- A. COM does not support the New modifier for classes used on the server.
- B. COM allows for connections to the backend classes to access or modify data.
- C. COM allows support for the concept of web related access such as document context.
- D. COM allows for access to the database by using the current environment (for example: current database, current agent, or document context).

Correct Answer: B

---

**QUESTION 2**

Mary has written an IBM Domino XPages application. What must Mary do to make XPages in her application available to users with only public access to the database?

- A. Add Mary's hierarchical name as Manager to the ACL.
- B. Set the XPage design property "Available to Public Access Users".
- C. Alter the ACL, add user Anonymous and set the user to Manager access.
- D. Alter the Server document field "Sign agents or XPages to run on behalf of the invoker" to add Mary's hierarchical name.

Correct Answer: B

---

**QUESTION 3**

What database property prevents searches against database when it is not desirable to create new views or a full text index?

- A. "Don't allow search"
- B. "Prevent all searches"
- C. "Don't allow simple search"
- D. "Disable automatic updating of views"

Correct Answer: C

---

**QUESTION 4**

Angi has a Text field named Town on her form. She also has a Formula field named MyFormula with the Literalize Fields option selected that contains the following formula: `SELECT HomeTown = Town` She creates a new document with the form and adds the value Madison to the Town field.

What is the value in the MyFormula field after she refreshes the document?

- A. 0
- B. @Error
- C. `SELECT HomeTown = Madison`
- D. `SELECT HomeTown = "Madison"`

Correct Answer: D

---

**QUESTION 5**

Sally has a form with a Readers field on it. That field is computed and its value is "Users". When a document is created with the form, what effect does the field have on that document?

- A. Members of the Users group are able to see the document.
- B. Members of the Users group are not able to modify the document.
- C. Members of the Users group are not able to replicate or copy the document.
- D. There will be no effect if the members of the Users group have higher than Reader level access to the database.

Correct Answer: A

---

**QUESTION 6**

Mary is the IBM Domino administrator and needs to deploy an agent she has written. Mary's agent reads and writes data directly to the file system, is scheduled to run on server daily, and is signed by Mary's IBM Notes ID. What does Mary need to update to ensure the agent runs correctly?

- A. the agent Security setting "Runtime Security Level" to "2. Allow restricted operations"
- B. the Execution Control List (ECL) on each workstation to trust Mary's hierarchical name
- C. the access control list of the database hosting the agent to include her hierarchical name as Manager

D. the Server document field "Sign or run unrestricted methods and operations" with Mary's hierarchical name

Correct Answer: D

---

### QUESTION 7

Mary created an agent in a new database that does the same thing as an existing agent in another one of her databases. When Mary copies the agent from the existing database to the new database, she sees the error "Error loading Use or UseLSX module TimeUtilities" on this line in her agent - Use "TimeUtilities".

What must Mary do to get this agent working in her new database?

- A. Mary needs to create a form in that database called TimeUtilities.
- B. Mary needs to recompile the agent in the new database to resolve this issue.
- C. Mary should copy the script library called TimeUtilities from the old database to the new database.
- D. TimeUtilities is a standard LSS file provided by IBM and Mary should install that LSS file on the machine with the new database.

Correct Answer: C

---

### QUESTION 8

Mary has written an XPage application which has one call to a view and will not refer to the view again. She can alter the view property dataCache to reduce memory usage in the XPage application by setting the value to which of the following?

- B. id
- C. full
- D. unload

Correct Answer: B

---

### QUESTION 9

Mary is using the OSGI console to debug an application and has ENABLE\_BREAK=1 set in the client notes.ini. What does this parameter do?

- A. runs the application one line at a time
- B. forces a Java core if a JVM failure is encountered

- C. enables the break points that Mary wrote into the application
- D. bypasses any external calls in the application being debugged

Correct Answer: B

---

#### QUESTION 10

Florence is planning an application that will consist of several forms. Each form will contain the same five fields as well as the same static text for each of the fields. What method can Florence use to make sure the fields all look the same on each of the forms?

- A. Put the fields and static text into a subform and include the subform on the form.
- B. Put the fields and static text into a response form and include the response form on the form.
- C. Put the fields and static text into a Profile document and include the Profile document on the form.
- D. Put the fields and static text into one of the forms and then make that form a Shared Form so its fields will be available to all other forms.

Correct Answer: A

---

#### QUESTION 11

What benefit does using a working set in the IBM Domino Designer client allow?

- A. In order to work on an application in the Domino Designer client, it must be in a working set.
- B. It allows source control functionality to automatically track any changes to the databases in the working set.
- C. It will prevent other designers from modifying applications while a developer is working with them in a working set.
- D. It allows a designer to group all databases that are part of a project together so only they are showing in the Application Navigator.

Correct Answer: D

---

#### QUESTION 12

How can session token information be captured using a servlet?

- A. getSessionToken
- B. getSessionCookie

- C. HttpServletRequest.getToken()
- D. HttpServletRequest.getCookies()

Correct Answer: D

---

### QUESTION 13

What is the View\_Rebuild\_Dir notes.ini parameter used to specify?

- A. the frequency the view is rebuilt
- B. the temporary folder used for view rebuilds
- C. the maximum size of a view rebuild directory
- D. the maximum amount of time a view rebuild is allowed to take

Correct Answer: B

---

### QUESTION 14

Jack is creating an application that will have several views with similar data in them and wants to use shared columns so that all the views have a similar look. How does Jack create a shared column to be used by multiple views?

- A. Click on the Shared Column button in the Advanced tab of the View properties.
- B. Drag and drop the column from one view to another and this will make it a shared column.
- C. There is no such thing as shared columns so Jack will need to create the column in each view.
- D. Click on the Shared Column button in the Columns section under the Shared Elements section of the Application Eclipse view.

Correct Answer: D

---

### QUESTION 15

How would a developer comment out a setting in xsp.properties?

- A. The setting must be deleted.
- B. Use the "#" character as the first character in the line.
- C. Use the "/" character as the first character in the line.

D. Insert "/" in the beginning of the line and "/" at the end of the line.

Correct Answer: B
