QUESTION 1

Sarah needs to create a URL to her portlet.

Why would she use an Action URL versus a Resource or Render URL?

- A. The request is to a JavaScript file.
- B. The request needs to be over SSL.
- C. The request changes the state of the portlet.
- D. The request is to retrieve a fragment of markup.

Correct Answer: C

Creating Portlet URLs(renderURL/actionURL/resourceURL) in Liferay through jsp and javascript

Here I am creating renderURL only.Other URL\'s can be created in the similar way

In JSP :

QUESTION 2

Which statement is true regarding responsive web design (RWD)?

- A. It uses a web design approach based on HTML5 and CSS3 to improve the rendering speed of a portlet.
- B. It uses advanced JavaScript design techniques to implement a highly responsive touch- enabled user interface.
- C. It uses tableless web design to arrange elements and text on a web page to improve the responsiveness of a web page.
- D. It uses CSS3 media queries to optimize content and layout automatically based on screen size, device, and orientation.

Correct Answer: C

QUESTION 3

Hannah is configuring a new menu feed and does not want the feed to be formatted in XML. Which language can be used instead?

- A. RSS
- B. JSON

C. HTML

D. SGML

Correct Answer: A

RSS is a format for syndicating news and the content of news-like sites, including major news sites like Wired, news-oriented community sites like Slashdot, and personal weblogs. But it's not just for news.

Pretty much anything that can be broken down into discrete items can be syndicated via RSS:

the "recent changes" page of a wiki, a changelog of CVS checkins, even the revision history of a book.

Once information about each item is in RSS format, an RSS-aware program can check the feed for changes and react to the changes in an appropriate way.

QUESTION 4

Matthew has developed a new system module to provide static JavaScript outside of the theme WAR. What is one benefit of storing the files externally?

- A. External files are loaded first.
- B. External files are more secure.
- C. External files are compressed by default.
- D. External files are shared by multiple themes.

Correct Answer: D

The difference between a static website and a portal is that three kinds of HTML files exist:

theme.html

Defines the markup that is identical for all the pages that this theme is applied to.

layout.html

Defines the decoration of the content area that can be different between pages.

skin.html

Defines the decoration of the individual portlets on the page. If the files used by the theme are not part of the theme folder, and therefore not part of the theme structure,

then those files are named external. External files are shared by multiple themes.

QUESTION 5

Which options are true regarding the Portlet State Manager Service? (Choose two.)

- A. It is obtainable by using a JNDI lookup.
- B. It changes the state of the server when called.
- C. It is not a valid IBM WebSphere Portal Service.
- D. It supports portlets that are compliant with JSR 168 and JSR 286.
- E. It is obtainable by using the tag.

Correct Answer: BD

QUESTION 6

George is using the PortletStateManager `getPortletStateManager (PortletRequest request, PortletResponse response)` method in his portlet code.

Where should George use this method in his code for best performance?

- A. `init`
- B. `doEdit`
- C. `doview`
- D. `processAction`

Correct Answer: B

:

`PortletStateManager getPortletStateManager(PortletRequest request, PortletResponse response)`

This method returns a `PortletStateManager` object which you can use during action processing and rendering (for example in the `processAction` method, `doView` method, `doEdit` method, etc.). The `PortletStateManager` interface adds

additional methods to extend the generic `StateManagerService` interface, which, for example, allows you to directly read the current request-specific navigational state of the portlet (portlet mode, window state, and render parameters).

QUESTION 7

Which feature of the Theme Optimization Analyzer portlet will analyze the theme and its components for known issues and then report the number of errors, warnings and informational messages?

- A. Reports
- B. Validation Reports
- C. Development Mode
- D. Remote Debugging

Correct Answer: B

Validation reports Use the validation portlet to verify that your theme contains no errors. The validation report analyzes your theme and theme components for known issues and reports the number of errors, warnings, and informational messages. It also includes a detailed explanation about how to fix the errors that occur.

QUESTION 8

Which methods does a developer have access to when interfacing with the IBM WebSphere Portal user repository? (Choose two.)

- A. PUMA SPI objects
- B. PUMA EJB access
- C. PUMA REST service
- D. WebSphere Portal user servlet
- E. WebSphere Application Server secure ACL API

Correct Answer: AC

QUESTION 9

Which statement is true regarding the relative width of the wpthemeCol2of 5 CSS class?

- A. It cannot be used in a custom layout.
- B. It is a semantic type relative-width class.
- C. It is a CSS class for a column that takes two-fifths of the width of the page.
- D. It is a CSS class for the second column on a page that consists of five columns.

Correct Answer: A

QUESTION 10

Chris wants to create a new custom theme without leveraging WebDAV.

What is the first step?

- A. Run the XMLAccess script to enable and register the new theme.
- B. Create a new folder in WebDAV for the new theme using the /mycontenthandler/dav/fs- type1 entry point.
- C. Create a new EAR and new WAR project then deploy it using the IBM WebSphere Portal Administration Console.
- D. Create a new EAR and new WAR project, copy the WebDAV entire Portal 8.5 directory into the WAR project, then deploy using IBM WebSphere Integrated Solutions Console.

Correct Answer: D
