Vendor: IBM

Exam Code: C2040-910

Exam Name: IBM WebSphere Portal 7.0 Deployment and Administration Update

Version: Demo

QUESTION NO: 1

Mike wants to set up a very quick server farm using VMware technology. How can he do that task?

- A. Mike can use VMware with WebSphere Portal V7 clustered, none clustered, and also in a server farm.
- B. Mike cannot use VMware, because WebSphere Portal V7 doesn't support VMware
- C. Mike cannot use VMware because it cannot be due to dependency on host name.
- D. VMware can only be used when WebSphere Portal is not clustered.

Answer: A

Explanation:

QUESTION NO: 2

Which option is not a reason to select a portal farm deployment over a clustered deployment?

- A. You require more dynamic expansion and contraction of capacity by adding or removing computers, such as in a cloud-computing environment.
- B. You have a large deployment; for example, a hundred or more server instances; that would otherwise stretch the boundaries of a managed cell.
- C. You are comfortable automating administrative actions across a series of identical servers, such as restarting servers or applications, that the Deployment Manager would otherwise perform in a cluster.
- D. You prefer a comprehensive central administration point rather than owning the responsibility of administering resources on each server separately.

Answer: D

Explanation:

QUESTION NO: 3

Which of the following best describes the options available for running WebSphere Portal on IBM Smart Business development and test cloud?

- A. Different types of 32-bit and 64-bit virtual machine configurations for production
- B. Different types of 32-bit and 64-bit virtual machine configurations on operating systems other than Microsoft Windows for development and test
- C. Different types of 32-bit and 64-bit reserved and unreserved virtual machine configurations for development and test
- D. Different types of 32-bit virtual machine configurations for many operating systems, including those running on Windows Server

Answer: C

Explanation:

QUESTION NO: 4

Which one of the following can be used in order to enable Portal Light Mode?

- A. ConfigEngine enable-portal-light -DWasPassword=password
- B. Portal Light Mode is enable by default
- C. ConfigEngine enable-portal-light-startup-performance -DWasPassword=password
- D. Set portal_light_enabled="true" using wp.base_TargetMapInclList.properties

Answer: C

Explanation:

QUESTION NO: 5

Which one of the following commands is required to enable portal mashup integration?

- A. ConfigEngine.sh deploy-portal-mashup-ui
- B. ConfigEngine.sh register-mashup-module
- C. ConfigEngine.sh install-mashup-module -DApplicationName=<MyTestApplication>
- D. ConfigEngine.sh deploy-portal-page-mashup

Answer: A

Explanation:

QUESTION NO: 6

When a user who is enabled for impersonation impersonates other users, which of the following option is true?

- A. The people awareness feature is enabled for the entire session for which that user is authenticated.
- B. Client-side aggregation does not support user impersonation. For this reason, ensure that you do not activate client-side aggregation on any portal pages where the Impersonation portlet is deployed.
- C. The people awareness feature is disabled for the entire session for which that user is authenticated.
- D. Client-side aggregation is required to use user impersonation. Ensure that you activate client-side aggregation on any portal pages where the Impersonation portlet is deployed.

E. Both B and C

Answer: E

Explanation:

QUESTION NO: 7

Which parameter must be set to enable write access for all authenticated users on WebDAV file stores folders?

- A. Set filestore.writeaccess.allowed to true
- B. Set filestore.readonlyaccess.allowed to false
- C. Set WebDAV.writeaccess.allowed to true
- D. Set WebDAV.readonlyaccess.allowed to false

Answer: A

Explanation:

QUESTION NO: 8

Which of the following site analysis events cannot be logged by WebSphere Portal's logging functionality at the server level?

- A. Page management, such as creating, reading, updating, deleting pages
- B. Requests of portlets by users
- C. Amount of data fetched by a portlet from a back-end database.
- D. Session activities, such as login, logout, timeout, login failed

Answer: C

Explanation:

QUESTION NO: 9

Cooper would like to better categorize portal search but doesn't know what to use. What can he use?

- A. WebSphere Portal V7.0 only uses an external search system.
- B. Cooper can use tags for better search results.
- C. This task requires that WebSphere Portal is customized with the search API.
- D. Only Lotus Web Content Management content can be categorized with the categorize function.

Answer: B

Explanation:

QUESTION NO: 10

Select the supported types of tagging from the following options.

- A. Public or collaborative tagging
- B. Private tagging
- C. Page tagging
- D. Portlet tagging
- E. Both A and B

Answer: E

Explanation:

QUESTION NO: 11
