QUESTION 1

Review the image shown here:

Which of the following statements is TRUE?

A. The component rule for the Trailer Record uses the REJECT function.

B. The component rule for the Trailer Record uses the ONERROR function.

C. The data audit setting for Trailer Record is set to Track=Error, Details=Error, and Item Data=Occurrence.

D. The data audit setting for CustomerOrder is set to Track=Error, Details=Error and Item Data=Occurrence.

Correct Answer: B

QUESTION 2

An application developer needs to split a file consisting of 10 records into 10 output files each with one record. The file name of the output files must contain the record number from the input file. Which two functions can be used in this map to achieve this task?

A. INDEX and RUN

B. CHOOSE and GETANDSET

C. INDEX and SETFILENAME

D. COUNT and CREATEFILE

Correct Answer: A

QUESTION 3

The Analyze Tree results contain the message: L201 ?Different data objects of COMPONENT 1 are not distinguishable in TYPE \\'File Data\\' (warning) What action does an application developer need to take?

A. Add delimiters to the File group.

B. Add a Terminator to the File group.

C. Write a map designed to help you identify the bad data.

D. Define component 1 of File differently, or more specifically.

Correct Answer: D

QUESTION 4

An application developer has a file which consists of fixed length records. The first record is a header record followed by some number of detail records. The number of detail records is expressed by a value found in the header record. How does the developer define this type of data in WebSphere Transformation Extender?

A. Index the input based on the count in the header record.

B. Use a Map function to keep track of how many detail records there are.

C. Write a custom function to store the number of detail records in the map context.

D. Use a component rule to compare the current record to the value found in the header.

Correct Answer: D

QUESTION 5

In addition to the adapters, what WebSphere Transformation Extender component would be needed in a production environment?

A. Design Studio

B. Transformation Engine

C. Integration Flow Designer

D. Database Interface Designer

Correct Answer: B

QUESTION 6

A Referenced Map is a map that:

A. resides in another map source.

B. is known to run with any XML schema.

C. is distributed with the product as a sample.

D. uses indirect references for a source or target.

Correct Answer: A

QUESTION 7

What is the method for indicating a reference to a specific occurrence of an input object in a map rule?

A. Use the INDEX function with the occurrence number as the argument.

B. Call a functional map and use the COUNT function to track the number of occurrences.

C. Enter the occurrence number in square brackets immediately after the input object name.

D. Use the MEMBER function with the input object name as the first argument and the occurrence as the second argument.

Correct Answer: C

QUESTION 8

One way to modify a type tree to increase performance is to: A. map the unused elements that are not used to =NONE.

B. change the numeric type elements to alphanumeric type elements.

C. move the unused elements into a reserved category called \\'NonUsed\\'.

D. combine any contiguous elements that will not be mapped into a large blob.

Correct Answer: D

QUESTION 9
