QUESTION 1

Which SQL servers are supported by the Worklight SQL adapter?

- A. MySQL
- B. Oracle 11g
- C. DB2
- D. All of the above

Correct Answer: D

QUESTION 2

Which class should be added to an element in order for it to use a property from messages.js?

- A. resource
- B. translate
- C. localizable
- D. externalText

Correct Answer: B

QUESTION 3

Assuming it is not overridden manually, in which case will the `isSuccessful` property of the procedure invocation result be true?

- A. Worklight server is not accessible
- B. Back end that adapter tries to connect to is not accessible
- C. Internet is not available on a mobile device
- D. Specified procedure does not exist in adapter

Correct Answer: B

QUESTION 4

Which mobile environments support the TabBar control? (Choose two)

- A. BlackBerry,

B. Windows Phone

C. iOS,

D. Android

Correct Answer: CD

QUESTION 5

The correct place to specify the application's metadata is _____.

A. authenticationConfig.xml

B. worklight.properties

C. application-descriptor.xml

D. This setting should be done separately per platform in a dedicated settings file

Correct Answer: C

QUESTION 6

Which of these adapter properties is mandatory?

A. adapter name

B. display name

C. description

D. ip address

Correct Answer: A

QUESTION 7

Given the following code:

```
function wlCommonInit() {  
    for(var i = 0; i < 100; i += 1) {  
        WL.Client.setUserPref('key' + i, 'value' + i);  
    }  
  
    WL.Client.setUserPref('key1', 'updatedValue1');  
  
    alert(WL.Client.getUserPref('key1'));  
}
```

What will the alert(WL.Client.getUserPref(\\key1\\)); show?

- A. The alert will not show since WL.Client.setUserPref cannot be called in the for loop since it is an asynchronous function.
- B. updatedValue1 since WL.Client.setUserPref({\\key1\\ : \\updatedValue1\\}); will replace the value of key1 set in the for loop.
- C. value1, updatedValue1 or null since WL.Client.setUserPref is an asynchronous function and there is no guarantee which call, if any, will return first.
- D. value1 since WL.Client.setUserPref(\\key1\\, \\updatedValue1\\); will fail because WL.Client.deleteUserPref(\\key1\\) was not called before setting the new value.

Correct Answer: C

QUESTION 8

A developer is using a Worklight Studio installation that is configured with the Android 2.2 SDK and the corresponding Google USB driver. The developer has connected an Android device to the machine via a USB cable. The developer tries to run the application on the device but does not see the device listed as a target. What can be a cause for this issue?

- A. Worklight does not support testing on Android 2.2 devices.
- B. Installed Google USB driver is deprecated and must be explicitly enabled.
- C. Installed Google USB driver does not support the device connected to the machine.
- D. The worklight.properties file of the application is not configured to allow USB connection.

Correct Answer: C

QUESTION 9

Pick the login type that is not supported by Worklight.

- A. onStartUp
- B. never
- C. onAlarm
- D. onDemand

Correct Answer: C

QUESTION 10

A developer wants to test a hybrid application on a physical iOS device. The developer has enrolled in the iOS Developer Program and created a provisioning profile. Where should the developer install the provisioning profile to test

the application on a physical iOS device?

- A. the Xcode Server
- B. the physical device
- C. the Apple App Store
- D. the Application Center

Correct Answer: B

QUESTION 11

When working with a SQL adapter which of the following file should be manually added to project?

- A. JDBC connector driver
- B. Database schema
- C. Properties file containing SQL server credentials and configuration
- D. Startup script that will connect Worklight server to a specified SQL database

Correct Answer: A

QUESTION 12

In order for a plug-in to be recognized by an iOS application's JavaScript it should be added to

- A. Cordova.plist file
- B. Worklight.plist file
- C. Plugins.plist file
- D. Plug-in will be automatically recognized by JavaScript without adding it to any of above files

Correct Answer: A

QUESTION 13

What type of adapter is not provided by Worklight out-of-the-box?

- A. SQL adapter to connect to a SQL based servers
- B. HTTP adapter to communicate with a web-based service
- C. CastIron adapter
- D. SIP adapter for VoIP communications

Correct Answer: D

QUESTION 14

A Worklight application does not need to connect to a server on startup. However, when previewing the application on the device emulator, it is throwing a server connection error on start up. What is the consequence if the connection error is resolved using the `WL.Client.init({connectOnStartup:false})` API to disable the connection to the server on application startup?

- A. The application will not be able to subsequently connect to the server.
- B. Server features other than the Remote Disable or Direct Update will be disabled.
- C. Any server features the application uses will only be available when it connects to the server.
- D. There will be no potential consequences as the runtime will safely disable server connectivity errors.

Correct Answer: C

QUESTION 15

What screen width does Android assume its html file is styled for?

- A. 480
- B. 160
- C. 320
- D. 1600

Correct Answer: C
