**QUESTION 1**

A company needs to change the folder location for outgoing AS2 documents. Locations for inbound and outbound file storage are configured in which area for a single organization installation?

- A. Relationship
- B. Partner setup
- C. Organization setup
- D. Http Server Adapter

Correct Answer: B

QUESTION 2

The Clean-Up processes monitor available in the troubleshooter screen identifies all the system clean up processes along with status, work flow ID and last time each process was run. What are three of the required system processes that need to be run on a regular schedule? (Choose three.)

- A. Schedule_PurgeService
- B. Schedule_BackupService
- C. Schedule_AFTPurgeService
- D. Schedule_FileCleanUpService
- E. Schedule_MailboxRemovalService
- F. Schedule_IndexBusinessProcessService

Correct Answer: ABF

QUESTION 3

A customer properties file called test.properties has the following entries: ABCD = 1234 test = ABCD

What is the correct way to get the value of the ABCD property into process data VAR1?

- A.
- B.
- C.
- D.

Correct Answer: D

**QUESTION 4**

When a file arrives it must be archived. The ProcessFileArrival and ArchiveFile Business Processes (BP) handle this. The requirement is for ProcessFileArrival to invoke ArchiveFile, but not wait for ArchiveFile to finish before further processing. Which invoke mode should be used?

- A. Inline
- B. Async
- C. Queued
- D. Deferred

Correct Answer: B

QUESTION 5

A developer has been tasked with writing a communications process to connect to a partner SFTP server and get order files. Authentication of the user is being performed by a key signature to the partner SFTP server. Which two keys are required for establishing an SFTP session to the SFTP server? (Choose two.)

- A. Known Host Key
- B. Host Identity Key
- C. User Identity Key
- D. Remote Host Key
- E. Authorized User Key

Correct Answer: AC

QUESTION 6

Of the locations where persistence levels can be set, which has the highest precedence?

- A. Global
- B. System
- C. Trading Partner
- D. Business Process (BP) Definition

Correct Answer: D

**QUESTION 7**

A customer has moved the IBM Sterling B2B Integrator (SBI) database server to a new ipaddress/ hostname and needs to make the changes to SBI so that it can connect to the new server. Which procedures should be followed?

- A. Edit /properties/sandbox.cfg and change all old database ipaddress/hostname to the new one, save and run setupfiles.sh.
- B. Edit /properties/jdbc.properties.in and change all old database ipaddress/hostname to the new one, save and run setupfiles.sh.
- C. Edit /properties/jdbc.properties and change all old database ipaddress/hostname to the new one, save and run setupfiles.sh.
- D. Edit /properties/jdbc_customer.properties.in and add all database pools into this file with new ipaddress/hostname, save and run setupfiles.sh.

Correct Answer: A

QUESTION 8

A 2-node IBM Sterling B2B Integrator (SBI) clustered solution is being designed. The customer will initiate connections with external partners using HTTP, FTP and SFTP protocols. For load balancing and fail over purposes 2 client adapters for each protocol are configured on each node and Service Groups are being used. How many Service Groups will be required?

- A. 1
- B. 2
- C. 3
- D. 6

Correct Answer: C

QUESTION 9

A developer has created and deployed a LWJDBC adapter with all the setting completed. The developer has used the following SQL in the SQL parameter UPDATE TEST SET CERT = O? WHERE CERTREVIEW = ?. parameter UPDATE TEST SET CERT = ?O?WHERE CERTREVIEW = ?. Which setting needs to be added into the configuration of the LWJDBC?

- A. var1
- B. param1
- C. var1, vartype1
- D. param1, paramtype1

Correct Answer: D

**QUESTION 10**

A developer is creating an IBM Sterling B2B Integrator (SBI) Business Process (BP) using the Graphical Process Modeler (GPM). A Mailbox Delete service is being used to delete a specific message from a mailbox. The developer is assigning the parameter MessageId to delete in the name- value pair in the Service Editor. There are other services being used in the BP that create the XML tag MessageId in Process Data. Which message mode in the GPM Service Editor will be required to ensure that the value of MessageId set in the Service Editor will be used?

- A. Message from ServiceInput Msg tab: Allow Message Write
- B. Message from ServiceInput Msg tab: Allow Process Data Write
- C. Message to ServiceOutput Msg tab: Obtain Message First, then Process Data
- D. Message to ServiceOutput Msg tab: Obtain Process Data First, then Messages

Correct Answer: D

QUESTION 11

Where are two places the amount of time a Business Process (BP) remains online in the system can be updated? (Choose two.)

- A. Archive Manager
- B. archive.properties
- C. Business Process Editor
- D. Performance Tuning Wizard
- E. Retention Service configuration

Correct Answer: AC

QUESTION 12

To allow existing AS2 communications to complete, which Drain Queues option must be selected when gracefully stopping an IBM Sterling B2B Integrator (SBI) system in a controlled manner?

- A. Drain No BPs
- B. Drain ALL BPs
- C. Drain Not Started BPs
- D. Drain Not Started BPs and No Open Session BPs

Correct Answer: D

**QUESTION 13**

A client is experiencing failed Business Processes (BP) due to a resource group not having an active adapter available. Which menu path identifies the adapters that are disabled?

- A. Operations > Thread Monitor
- B. Operations > Support Tools > Support Case
- C. Deployment > Services > Configuration > List
- D. Deployment > Services > Installation > Setup

Correct Answer: C

QUESTION 14

How can a real-time overview of all the defined JDBC pools within a system be viewed?

- A. Threads
- B. System Status
- C. Host Information
- D. Database Usage

Correct Answer: D

QUESTION 15

A developer wants to see which messages were added to a mailbox between two given dates. Which service should be used in a Business Process (BP)?

- A. Mailbox List Service
- B. Mailbox Add Service
- C. Mailbox Query Service
- D. Mailbox Search Service

Correct Answer: C
