QUESTION 1

What happens to all the page elements in a test?

- A. They are grouped by page unless the application under test uses AJAX.
- B. They are grouped by page as a visual aid to enhance readability.
- C. They are assigned dynamically to separate virtual testers at playback time.
- D. They use separate records from a single datapool.

Correct Answer: B

QUESTION 2

What is the main difference between correlated and pooled data?

- A. Correlated data all comes from the same row of the table, while pooled data uses a different line for each request.
- B. A separate copy of correlated data is owned by each test agent, while pooled data is shared across all agents.
- C. Correlated data is varied at runtime, while pooled data is varied at record time.
- D. Correlated data is varied by the server, while pooled data is varied by the client.

Correct Answer: D

QUESTION 3

When using custom code, what is a good idea?

- A. change the package name and class name
- B. comment the Java code well
- C. move the package outside of the src directory
- D. use a meaningful class name

Correct Answer: A

QUESTION 4

Why would a tester want to substitute a datapool candidate?

- A. A new value can be provided for each virtual tester, to ensure more realistic playback.
- B. A new value can be captured for each session, to ensure more realistic recording.

- C. The data correlation will fail if the candidate is not substituted with the value returned by the server.
- D. The datapool will never get filled up with data unless it is connected to the test at playback time.

Correct Answer: A

QUESTION 5

When recording a test, how should you pace the test?

- A. record the test slowly, allowing all pages to load completely so that all elements are fully loaded before proceeding to another page
- B. record the test using your normal pace
- C. record the test quickly, as pages do not need to load completely for the recording
- D. record the test with varying paces to simulate the behavior of various types of users

Correct Answer: A

QUESTION 6

Your test has three groups: 40% of the users are assigned to User Group 1, 60% of users are assigned to User Group 2, and 1 user is assigned to User Group 3. The user load is set to 51 users How many users are assigned to Group 1?

- A. 1
- B. 20
- C. 40
- D. 60

Correct Answer: B
